PART B – ITEM 3.1 - LOT 51 KENNEDY STREET, SOUTH HEDLAND – PROPOSED WORKFORCE ACCOMMODATION AND DWELLING (GROUPED) USES

Form 1 – Responsible Authority Report
(Regulation 12)

DAP Name:	Regional Development Assessment Panel	
Local Government Area:	Town of Port Hedland	
Applicant:	Element Advisory	
Owner:	SHRA Pty Ltd	
Value of Development:	$60 million ☐ Mandatory (Regulation 5) ☒ Opt In (Regulation 6)	
Responsible Authority:	Town of Port Hedland	
Authorising Officer:	Manager Planning and Economic Development	
LG Reference:	2025/044	
DAP File No:	DAP/25/02899	
Application Received Date:	15 April 2025	
Report Due Date:	8 July 2025	
Application Statutory Process Timeframe:	90 Days	
Attachment(s):	1. Development Plans. 2. Application Report and Technical Reports. 3. Design Review Panel – Report and Recommendations. 4. Schedule of Submissions.	
Is the Responsible Authority Recommendation the same as the Officer Recommendation?	☐ Yes ☒ N/A	Complete Responsible Authority Recommendation section
	☐ No	Complete Responsible Authority and Officer Recommendation sections

Responsible Authority Recommendation

That the Regional DAP resolves to:

1. **Accept** that the DAP Application reference DAP/25/02899 is appropriate for consideration as a "Workforce Accommodation and Dwelling (grouped)" land use and compatible with the objectives of the zoning table in accordance with Clause 17 of the Town of Port Hedland Local Planning Scheme No. 7;

2. **Approve** DAP Application reference DAP/25/02899 and accompanying plans in accordance with Clause 68 of Schedule 2 (Deemed Provisions) of the *Planning and Development (Local Planning Schemes) Regulations 2015*, and the provisions of Clause 32 of the Town of Port Hedland Local Planning Scheme No. 7, subject to the following conditions:

Conditions

Term of Approval Conditions

1. This decision constitutes planning approval only and is valid for a period of 4 years from the date of approval. If the subject development is not substantially commenced within the specified period, the approval shall lapse and be of no further effect.

2. All development and use of the site must be carried out in accordance with the approved plans and all information submitted as part of this application. These details shall not be altered without prior written consent of the Town of Port Hedland. This approval does not relate to any other development on this lot.

3. The 'Workforce Accommodation' use stated under this approval is temporary for a period of ten (10) years from the date the use commences on site.

4. A Decommissioning and Site Rehabilitation Plan (DSRP) shall be submitted to the satisfaction of the Town of Port Hedland, within twelve (12) months from the date of this approval. The approved DSRP shall be implemented at the end of the approval period for 'Workforce Accommodation' as stated under Condition 3 or on the cessation of the uses on the land, whichever is earlier.

Stage 1 Conditions

The following conditions must be cleared prior to the lodgement of an application for a building permit:

Public Art

5. The developer shall provide public art within the development to a minimum value of 1% (capped at $150,000) of the estimated total development construction cost, in accordance with the Town of Port Hedland Local Planning Policy - 04 'Percent for Public Art'. Alternatively, a cash-in-lieu payment of this amount shall be made to the Town of Port Hedland. For the above to be met, the applicant shall undertake the following:
   a) Option 1: Submit a Public Art Plan in accordance with the policy to the satisfaction of the Town of Port Hedland; or
   b) Option 2: Advice the Town of Port Hedland in writing if the applicant chooses to provide a cash-in-lieu payment of this amount.

Stormwater Management Plan

6. Provide detailed Stormwater Management Plans in accordance with the Town of Port Hedland's Local Planning Policy 11 Stormwater Management prepared by a suitably qualified engineer and to the satisfaction of the Town of Port Hedland shall include but not limited to i.e. kerbing, spillways, cross-sections, surface and erosion mitigation, etc.

Social Impact Management Plan

7. Provide a Social Impact Management Plan to the satisfaction of Town of Port Hedland confirming public access to the site and services and ongoing monitoring of social impacts associated with the development.

Detailed Landscaping Plan

8. Provide detailed Landscaping Plans to satisfaction of the Town of Port Hedland for approval and include the following:

   a) Indicate all existing trees/vegetation to be retained.
   b) All verges must be landscaped.
   c) Fencing design and details.
   d) The location, number and type of proposed trees and shrubs including planter and/or tree pit sizes and planting density.
   b) Plant species to be consistent with the Town of Port Hedland Preferred Planting Guide.
   c) Planting ratios along the Kennedy Street frontage as follows:
      - Trees at: 3 per 18m^2.
      - Feature shrubs at 1 per 1m^2; and/or feature ground covers and grasses at 1 per 1m^2;
      - Mulch to be either woodchips or river shingles (minimum size of 20mm), spread at a minimum depth of 100mm. Where woodchip mulch is used, a perimeter barrier / edging will be required to contain the mulch from being washed out by stormwater.
      - All areas to be reticulated.
      - Garden bed edges to be kerbed.
   d) Shade trees to be planted adjacent to parking areas at a ratio of 1 per 4 car bays, evenly throughout the parking areas except where bays are covered.
   e) Verge treatments to include ground covers and grasses.
   f) Some soft surfaces such as lawns to be established.

Fencing

9. Fencing to all streets shall be to maximum height of 1.8m from natural ground level, and visually permeable to maintain passive surveillance over the public and internal carparking areas. All fencing to be of a high quality, not to include barbwire or electrification, be consistent with the landscape design themes and consider Crime Prevention Through Environmental Design (CPTED) principles, to the satisfaction of the Town of Port Hedland.

Construction and Environmental Management Plan

10. Provide a Construction and Environmental Management Plan (CEMP) to the satisfaction of the Town of Port Hedland and thereafter be implemented throughout the construction phase of the development. The CEMP shall include, but not be limited to, the following:

    a) Tree/vegetation protection and management plan.
    b) Contact details of essential site personnel, construction period and operating hours.
    c) Community information, consultation and complaints management plan.
    d) Public safety, security and amenity.
    e) Traffic and parking management for the contractors and staff.
    f) Noise and dust management plan.
    g) Project Plan (chart outlining timing and stages, clearing, site works and construction).
    h) Temporary construction workforce plan / statement indicating housing requirements on-site or off-site, size of crew etc.
    i) Earthworks, excavation, land retaining / piling methods and associated matters, all to be contained within the development site.
    j) Stormwater and sediment control during construction.

k) The delivery of materials and equipment to the site.
l) The storage of materials and equipment on the site.
m) Impact on traffic movement.
n) Other matters likely to impact the surrounding properties

Covered Car Bays

11. The plans to be modified to include the 30 car bays for the grouped together with 49 of the car bays fronting Kennedy Street, to be covered with carport structures, in accordance with the Scheme car parking design requirements, to the satisfaction of the Town of Port Hedland.

12. Amended Traffic Impact Assessment
An amended traffic impact assessment be lodged incorporating the final information provided by the applicant on 4 July 2025, to the satisfaction of the Town of Port Hedland.

Stage 2 Conditions

The following conditions must be cleared prior to the occupation or use of the site:

Subdivision

13. Lodge a Form 1A application for subdivision to Western Australian Planning Commission in accordance with the concept subdivision master plan. The subdivision application to determine actual deliverables for open space, road network and lot parcel sizes, for future development after the 'Workforce accommodation' use has ceased.

Social Contribution

14. At the applicant's cost, enter into an agreement with Town of Port Hedland to provide a social contribution to a value of $550,000 for the ten (10) year period. The contribution shall only be used for the establishment of social infrastructure within 1 kilometre from the development site.

Footpath Link

15. Design and construct to the satisfaction of Town of Port Hedland a publicly accessible path 2 metres wide and approximately 370 metres long, between Kennedy Street and Stanley Street, to provide a better pedestrian connectivity for the area, in accordance with section 2.9 'Identified Missing Links' of the Town's Active Transport Strategy. On completion of the path, the applicant to lodge to the satisfaction of the Town, all 'As Constructed' drawing data prior to handover.

Alternatively, the applicant can make a cash contribution to the Town for the full cost of the shared path construction or equivalent, to be spent only on the shared identified path infrastructure. The contribution shall be paid in full (lump sum) or other alternative arrangements as agreed with the Town of Port Hedland.

Stormwater completion

16. The approved Stormwater Management Plan shall be implemented in full prior to the occupation or use of the site and shall be maintained thereafter to the satisfaction of the Town of Port Hedland.

Landscaping completion

17. Implement the approved landscaping plans and maintained thereafter to the satisfaction of the Town of Port Hedland. Any species that fail to establish within the first two planting seasons following implementation must be replaced in consultation with and to the satisfaction of the Town of Port Hedland.

Car parking completion

18. The approved parking areas must be fully implemented and constructed to the specification of the Town of Port Hedland prior to the occupation or use of the site/development. The parking areas must contain the following:

    a. All car bays and circulation areas designed to a 'User class 3A' with a B99 vehicle, in accordance with the Australian Standards 2890.1:2004 (or as amended).
    b. Be sealed (bitumen or concrete), kerbed, drained and line marked.
    c. Not be obstructed in any way or used for any purpose other than parking.
    d. Include wheel stops as indicated to prevent vehicles interfering with landscaping and pedestrian pathways/movement areas.
    e. car bays designed to Australian Standards 2890.6:2004 for bollard & post mounted disabled signage.

    The parking spaces shall comply with the above requirements for the duration of the development and shall be maintained to the satisfaction of the Town.

Operational Management Plan

19. Provide to the Town of Port Hedland for approval, an Operational Management Plan, which shall include but not be limited to the following:
    a. Details of the proposed operational activities on site, including the number of staff, management activities to minimise impacts on adjoining properties and residents.
    b. Safety and Security measures.
    c. Lighting management plan and demonstrate compliance with AS/NZS 4282.2023 - Control of the Obtrusive Effects of Outdoor Lighting.
    d. Waste management plan.
    e. Landscaping and reticulation management.
    f. Complaints management plan, including annual reporting.

    The approved Operational Management Plan shall be always adhered to by the landowner/operator and maintained thereafter to the satisfaction of the Town.

General Conditions

20. All external lighting shall be constructed to standard AS/NZS 4282.2023-Control of the Obtrusive Effects of Outdoor Lighting, and the approved lighting management plan.

21. The use of gravel fines (cracker/crusher dust) is not permitted as a surface treatment within the property or the verge areas.

22. Alterations or relocations of existing infrastructure within the road reserve, where required, shall be carried out and reinstated at the landowner's cost, to the specification and satisfaction of the Town.

23. Existing vegetation located within the verge shall be retained except where otherwise approved for removal by the Town of Port Hedland.

24. The Decommissioning and Site Rehabilitation Plan is to be implemented to the satisfaction of the Town of Port Hedland.

Advice Notes

1. This development approval is not a building permit or an approval to commence or carry out development under any other law. It is the responsibility of the applicant/owner to obtain any other necessary approvals (e.g. health and engineering) and to commence and carry out development in accordance with all other laws.

2. The developer is reminded of its obligations to meet the provisions and requirements under the following:
    a. Environmental Protection (Noise) Regulations 1997
    b. Environmental Protection (Unauthorized Discharges) Regulations 2004
    c. Environmental Protection (Controlled Waste) Regulations 2004
    d. Health (Treatment of Sewage and Disposal of Effluent and Liquid Waste) Regulations 1974
    e. Health (Public Building) Regulations 1992
    f. Health Act 1911
    g. Public Health Act 2016
    h. Food Act 2008.
    i. Liquor Control Act 1988.
    j. Town of Port Hedland Local Health Law 2016.
    k. Food Safety Standards and Chapter 3 of the Australian New Zealand Food Standards Code (Australia Only).

    For further information, the applicant/developer shall liaise with the Town of Port Hedland.

3. The applicant is reminded there will be a requirement for additional and separate approvals from the Town regarding the below:
    a. An application for a building permit in accordance with the Building Act 2011, prior to the commencement of any construction works.
    b. An application with engineering drawings of all crossovers, in accordance with the Town of Port Hedland Vehicle Crossover Policy and Specifications.
    c. An application for development approval for temporary accommodation (fly camp) for construction workforce.
    d. An application for any proposed advertising / site identification signs not consistent with the Town's Local Planning Policy 02 - Advertising Signs.

4. DWER has advised the following: Water and wastewater services are available to the subject site. The proposed activities occur within the proclaimed Pilbara groundwater and surface water areas and are subject to licensing requirements under the Rights in Water and Irrigation Act 1914 (RiWI). If the proponent intends to use groundwater for any purpose, they will need to apply for a 5C licence to take water, and a 26D licence if new water supply bores are needed. For any further licensing advice please contact our Water Licensing team on 9166 4100.

5. It is the responsibility of the applicant/developer to ensure that building setbacks correspond with the legal description of the land. This may necessitate resurveying and re-pegging the site, The Town of Port Hedland will take no responsibility for incorrectly located buildings.

6. All works in the road reserve, including but not limited to the construction of a crossover or footpath, relocation of light poles, kerb ramps, planting of street trees, street furniture and other streetscape works and works to the road carriageway must be to the specifications of the Town of Port Hedland. The applicant/owner shall liaise with the Town of Port Hedland in this regard.

7. If the applicant is aggrieved by this determination, there is a right of review by the State Administrative Tribunal in accordance with the Planning and Development Act 2005 Part 14. An application must be made within 28 days of the determination.

Reasons for Responsible Authority Recommendation

The proposal is a residential development consisting of 'Workforce Accommodation' and 'Dwellings (Grouped)' uses, within an established suburban residential area. The development is capable of being approved within the planning framework, the Town of Port Hedland Local Planning Scheme No. 7 (LPS7), relevant state and local planning policies and the *Planning and Development (Local Planning Schemes) Regulations 2015* (Schedule 2 Deemed provisions for local planning schemes), with respect to considering development without an approved structure plan by the Commission.

It is considered that the development is appropriately located in Urban Development zone. The application is recommended for approval, subject to conditions and advice notes outlined under the Responsible Authority Recommendation.

Details: outline of development application

Proposal:

The development is a mixed residential development consisting of 'Workforce Accommodation' and 'Dwelling (Grouped)' uses.

Building Works

If approved the building works are proposed to commence in 2025 and operations by the end of 2026. The works include the following:

- 79 accommodation units/grouped dwellings totalling 297 rooms consisting of:
  - 62 modular units of 4 rooms each, with one being an accessible module (totalling 252 rooms).
  - 15 residential (grouped dwellings) (totalling 45 rooms) consisting of 3 bedrooms each.
- Communal facilities including:
  - Administration building with reception (320m^2)
  - Recreation building (280m^2)
  - Gymnasium (480m^2)
  - Dining hall (1000m^2 for 290 persons)
  - Shared laundry areas (x4 modules)
  - Shared BBQ areas, (in landscaping areas).
  - Service areas (back of house 230m^2).
- A total of 146 car parking bays mostly fronting Kenndy Street and consists of:
  - 98 secured and lit (solar / sensor lighting) for light vehicle car bays adjacent to Kennedy Street, including 2 accessible bays and EV charging bays.
  - 18 staff and maintenance, service car parking bays to the rear of the dining hall.
  - 30 light vehicle car parking bays at the rear of the proposed grouped dwellings.
- Landscaping and site servicing/utility works.

Use & Design Features

The development proposes the following:

- Provide short and long-term housing for professional, construction, contractor and key service workers.
- To deliver an experience that prioritises on safety, well-being of occupants yet integrate into the existing community.

- Facilities such as the dining hall, convenience store and gymnasium to be made available to the local community, as well as the bus collection point for food trucks and family friendly community events.
- The accommodation units borrow design principles from the Project Blue approach, informed by Curtin University and University of Western Australia research specialising in organisational behaviour and productivity.
- Design solutions are proposed to reduce potential mental health issues, promotes productivity, and workforce satisfaction focusing on environmental influences (a sense of nature, resident comfort and social interaction).

Proposed Land Use	Workforce Accommodation; and Dwellings (Grouped)
Proposed Net Lettable Area	N/A
Proposed No. Storeys	Single
Proposed No. Dwellings	79

Background:

The site is located within the northern sector of South Hedland, surrounded by a residential housing to the North (Longtom Loop and Wrasse Crescent), to the East (Stanley Street), to the South-West (Kennedy Street) and South-East (Coppin Place). The North Regional TAFE is located immediately West on Parker Street.

The subject site abuts Lots 89, 2462 and 2945 under Department of Water and Environmental Regulation (Water Corporation) management. Lot 89 contains a water tower for the South Hedland water supply.

The site is within 1.8 kilometres to the South Hedland Town Centre, with primary and high schools located within 700 metres. Recreation ovals exist within the school grounds and the Town's recreation and community facilities on Hamilton Road.

The subject site in the past contained a BHP temporary workforce accommodation called Pundulmurra, which was decommissioned in 2015. The land was cleared in the past for construction of the temporary accommodation use and was partially cleared again after the temporary use was decommissioned.

Consultation:

Public Consultation
Pursuant to Clause 64 of Schedule 2 of the Deemed Provisions under the *Planning and Development (Local Planning Schemes) Regulations 2015*, the proposal was advertised for a period of 28 days, between 6 May 2025 until 3 June 2025 through letters to the nearby residents/landowners within 200m radius, a sign placed on site and a notice on the Town's webpage.

The Town received 45 submissions from some nearby landowners and other Town of Port Headland residents and family members, raising concerns and objections to the development. There were 37 pro-form letters opposing the development of workforce accommodation in residential areas with no clear reasons indicated.

Full details of the submissions and the Town's officer and applicant responses are outlined under the Schedule of Submissions (refer to Attachment 4) of this report.

The submissions have been given sufficient consideration as part of assessment as detailed in the Schedule of Submissions. Where necessary and comments were justifiable, advice or recommendations were provided to the applicant to consider modifying the design or applying conditions to address concerns. The Town's officers are satisfied that all matters required to be considered have been and covered under this report.

Referrals/consultation with Government & Service Agencies
A detailed submission was received from Department of Water Environment and Regulation (DWER), seeking clarity from the Applicant's Urban Water Management Plan and provided advice on DWER's requirements. Where relevant, the external referral comments have been addressed in the 'Details' section of the report, and a detailed outline and officer comments on this have been included in the Schedule of Submissions (refer to Attachment 4) of this report.

Telstra expressed concern about diminished service to South Hedland if the development goes ahead. Also advised they attempted to access the water tower on Water Corporation land but were refused. The applicant was advised of Telstra's request to find another site infrastructure/equipment to improve their service. The matter is considered an operational / service problem matter and not relevant to this assessment on suitability of the development.

Planning Assessment:

The proposal has been assessed against relevant requirements of the State and Town's Local Planning Scheme No. 7, and planning policies outlined in this report. The minor subjects have been identified in the table below. Detailed discussion on other matters important to the assessment are after the table.

Provision	Requirement	Proposal	Assessment
Clause 32. Additional site and development requirements under LPS7	On-site car parking spaces are in accordance with Schedule 1. .Under Schedule 1, the amount of bays required for Workforce accommodation is to be determined by the local government. All car parking bays and circulation areas shall be designed to a 'User class 3A' with the B99 vehicle in accordance with the Australian Standards 2890.1:2004 (or as amended) and the Building Codes. Part (9) of Design and maintenance of car requirements: *" When considering any application for development approval the local government shall have regard to and may impose conditions concerning: (a) the proportion of car parking bays to be roofed or covered and the design criteria for this covering."*	146 parking spaces, including 2 universally accessible bays throughout the site. The provision includes: • 96 x standard light vehicle passenger car parking bays; • 2 x accessible bays for persons with disabilities; • 18 x service and staff car parking bays; and • 30 car parking bays at the rear of the proposed townhouses. The proposal includes each parking bay at 3.0m × 5.5m. The provision of car parking demand is addressed associated with the 'Workforce accommodation' and 'Grouped dwelling' land uses as detailed in the TIS (Appendix G). The plans indicate no car parking spaces are proposed to be covered.	In accordance with Schedule 1, for all of the proposed land uses, the proposed parking spaces As proposed are considered sufficient given the strategy of bus transport to and from the site. A Condition has been recommended for the implementation of the approved car parking plan. The proposal meets the User Class 3A requirements with the proposed parking bays being 2.7m × 5.5m. However, a condition is still recommended to implement the approved car parking plan for a minimum Class 3A Its recommended that all the 30 bays for the Grouped be covered, together with 49 of the car bays fronting Kennedy Street. The landscaping proposed adjacent to the car parking areas has been considered as covering but will take a long time to establish.
Local Planning Policy 02 – Advertising Signs (LPP/02)	The purpose to provide guidance on signage and instances where development approval is not	The proposal does not indicate any signs.	An advice note has been recommended.

	required from the Town of Port Hedland. This policy also clarifies what signage is considered suitable by the Town for approval to provide certainty to businesses.		
Local Planning Policy 04 – Percent for Public Art (LPP/04)	The purpose of this policy is set out when development is required to provide public art or cash-in-lieu contribution as part of their development approval. This policy provides a framework for developing, funding, and managing public art.	The proposal is not supported with any public art plan.	A condition has been recommended for the applicant/developer to either provide the art onsite themselves or $150,000 for a public art contribution, in accordance with Clause 4.4 of LPP/04. This contribution will be for the specific purpose of providing a piece of public art within the Town boundaries or installed in a “publicly visible” location within the site.
Local Planning Policy 11 – Stormwater Management (LPP/11)	The purpose of this policy is to assist developers, engineers, landowners, and government to integrate suitable design measures into their own stormwater systems. The correct design and construction of appropriate systems will assist with reducing the damaging effects of heavy rainfall events on private and public property and the public drainage network.	As part of this application, the applicant submitted a Stormwater Management Plan (SMP) prepared by RSA Engineers.	As part of the assessment process it has come to attention that the SMP requires amendments to meet the LPP/11 requirements as the SMP submitted lacks the following details: • Proposed hardstand, surface treatments and their cross-sectional details; • Capacities for the Proposed soak wells; • Details of excess water discharge towards the Town's main drainage system; • Details and locations of proposed barrier/ kerb; • Cross-sectional details of the spillways; • Details of the pipes and their invert levels for the soak wells; • Clear legend for the hatchings shown on plan;

			A suitable condition has been recommended requesting a revised stormwater management plan.

Definitions and Land use Permissibility

As per LPS7, Clause 38 - 'Land use terms used', the proposed land uses are defined as follows:

Proposed Land Use	**Definition under LPS7 & Planning Regs**
Workforce accommodation (LPS7)	means premises, which may include modular or relocatable buildings, used – (a) primarily for the accommodation of workers engaged in construction, resource, agricultural or other industries on a temporary basis; and (b) for any associated catering, sporting and recreation facilities for the occupants and authorised visitors.
Dwelling (grouped) *Planning and Development (Local Planning Schemes) Regulations 2015*	Grouped dwelling has the meaning given in the R-Codes: A dwelling that is one of a group of two or more dwellings on the same lot such that no dwelling is placed wholly or partly vertically above or below another, except where special conditions of landscape or topography dictate otherwise, and includes a dwelling in a strata titles scheme with common property.

Cl 17, Table 4 – Zoning Table of LPS 7 notes permissibility for all land uses. As Table 4 does not prescribe classes for the Urban Development zone, development applications must be considered under Cl 18(7) –

"If the zoning table does not identify any permissible uses for land in a zone the local government may, in considering an application for development approval for land within the zone, have due regard to any of the following plans that apply to the land -
(a) a structure plan.
(b) an activity centre plan.
(c) a local development plan."

There is no approved structure plan, activity centre plan or local development plan to guide the development.

Urban Development Zone
The lot is zoned 'Urban Development' under LPS7. Clause 16 Zones / Table 3 – Zones Objectives, states the objectives as:

- To provide an intention of future land use and a basis for more detailed structure planning in accordance with the provisions of this Scheme.

- To provide for a range of residential densities to encourage a variety of residential accommodation.
- To provide for the progressive and planned development of future urban areas for residential purposes and for commercial and other uses normally associated with residential development.

In this instance the development does not expressly meet the objectives of the zone as there is no structure plan, activity centre plan or local development plan as contemplated by LPS7. Notwithstanding this, the *Planning and Development (Local Planning Schemes) Regulations 2015* - cl 27(2) permits a development or subdivision to be considered without an approved structure plan, where:

"(a) the proposed development or subdivision does not conflict with the principles of orderly and proper planning; and
(b) the proposed development or subdivision would not prejudice the overall development potential of the area."

The applicant has provided an indicative future development/subdivision plan demonstrating zoning, lot sizes and density. The indicative design is compatible with the surrounding residential uses and built form. Consideration of the development is permitted by the *Planning and Development (Local Planning Schemes) Regulations 2015*. The development does not conflict with the principles of orderly and proper planning.

The development is essentially residential similar to a large grouped housing site, nursing home or retirement village in terms of built form. It would share similar commercial aspects with the latter two examples, commercial level of traffic, access to bus/taxi transport to and from site for residents, on site laundries or an offsite laundry service, large kitchens, shared community and recreation facilities. The quality of accommodation and functionally of course is different. The development is compatible with the surrounding residential zoned land. The development site is highly likely to be rezoned to residential in future with a portion or portions for public open space as required under subdivision. There is no foreseeable alternative to the residential zoning for the subject land. The land is surrounded by residential zoned land.

Due to the temporary nature of the 'Workforce Accommodation' component, it cannot prejudice the overall development of the area. The applicant clearly indicates intent to transition to permanent housing development as part of this development process. The applicant will be required to obtain a subdivision approval for the land to affirm the future development outcome.

Design Review Panel Advice

The proposal was presented to the Town of Port Hedland's Design Review Panel (DRP) on 19 March 2025 in accordance with Local Planning Policy 14 – Design Review Panel (LPP/14). This was done prior to the application being formally lodged.

The DRP broadly supported the development and commended the applicant for "attempting to integrate the form of housing within the local community where it could be accessible to a wide range of facilities, rather than being in a remote location". The applicant has applied many of the DRP's recommendations by improving the landscaping and some design features. Further refinement for landscaping details, shading and colour themes and material finishes is needed and it is recommended that a condition be applied.

Local Planning Policy No. 5 - Workforce Accommodation (LPP5)

The LPP5 objectives are:

"1. To integrate workforce accommodation into the surrounding local environment through physical design and management measures which promote social cohesion.
2. To ensure the application of design standards to workforce accommodation are commensurate with the development lifespan and location
3. To encourage workforce accommodation to be located close to urban settings and commercial centres that ensures reciprocal benefits for the local community and local business from an integrated workforce accommodation facility.
4. To support high-quality, adaptive and sustainable design of workforce accommodation that responds to regional climatic conditions, provides a high level of amenity for occupants and promotes articulated frontages that avoid sterile streetscapes.
5. To facilitate workforce accommodation that is demonstrated to meet the temporary needs of a specific industry or project and allow decision makers to apply discretion regarding the duration (term) of approval, acknowledging it as a temporary and transitional use."

The development is considered meets the policy objectives for the following reasons:

- The development is within an urban area and not a remote location. Management measures to encourage social integration of the workforce occupants and community will be under the Social Impact Management Plan.
- The applicant is seeking a 10-year approval for the development. The temporary nature is acceptable, given the land is a large parcel within the Southern Hedland town boundary and has been undeveloped for a considerable time.
- The design provides a residential street front to Stanley Street of permanent grouped housing and an open fencing treatment with landscaping (including the verge) for the Kennedy Street frontage.
- The applicant indicates a high quality and new development to be provided. Whilst the room size and dimensions proposed do not exactly meet the policy requirements for high standards format, a condition will be applied requiring compliance with the requirement.
- The applicant has demonstrated a need for a small workforce accommodation facility, providing letters of support from potential clients.

The Town's assessment against Table 1 of LPP5 below:

Design Element			Acceptable Development Provisions	Town's assessment
1	Siting the Development	(a)	Street setbacks should be consistent with the surrounding streetscape or applicable Design Guidelines.	The development proposes buildings with open and active areas to Stanley Street and Kennedy Street.
2	Designing the Buildings	(a)	Where development includes 'transportable buildings' as defined by *Local Planning Policy 03 - Shipping, Sea Containers*	A building are not traditional transportable buildings and will be in-situ pad footings.

			and Transportable Buildings (LPP/03), they shall incorporate all building design elements as per LPP/03.	
3	Fencing	(a)	No barbed wire or razor fencing is permitted.	Details of fencing design is to be provided at the building application stage. A condition has been included to exclude use of barb wire or electrification devices.
		(b)	Front fencing includes visually permeable materials above 1.2m, and the height of solid walls or fences to the street does not exceed 1.2m.	Design meets this requirement.
4	Landscaping	(a)	Landscaping zones shall be established and maintained along street frontages to screen the development.	Landscape plans are required to be updated with refined details and include the verges.
5	Movement network	(a)	Proposals shall be accompanied by a Traffic Impact Statement (TIS) or Traffic Impact Assessment (TIA) in accordance with the *Transport Impact Assessment Guidelines* by the Department of Planning, Lands and Heritage.	A Traffic Impact Assessment with amended information is satisfactory to the Town 's Engineering Services.
		(b)	Shall connect to a footpath network if there is one in the area.	The plans show connections to network. The Town has identified path link between Stanley Street and Kenndy Street required as part of the Town's Active Transport Strategy and will recommend a contribution or construction of a required path link be provided.
		(c)	All road infrastructure shall be informed by the recommendations of the TIS or TIA, to the satisfaction of the Town.	As above Part 5.
6	Storage, waste and collection	(a)	Shall be fully screened from view from all public areas and set back to mitigate any observation or odours.	Design meets this requirement.
7	Signage	(a)	As per Local Planning Policy 02 - Advertising signs (LPP/2).	Not provided. To comply with LPP2 if any signages are proposed. May require a separate application.
8	Drainage	(a)	Proposals shall be accompanied by a detailed stormwater management plan in accordance with the Town's *Stormwater Drainage Design Guidelines*, and should ensure:	Stormwater Management Plan (SMP) requires amending/detailed designing in accordance with Town's Local Planning Policy 11 – Stormwater Management (LPP/11). A condition has been recommended.

			• A minimum of a 1:5 ARI event is contained on-site. • No standing water in excess of 72 hours to prevent mosquito breeding. • Sediment traps are included to prevent sediment entering the Town's reserves and drainage infrastructure; and • Erosion control measures are incorporated to prevent the erosion of embankments, swales and other areas that are unsealed.	
		(b)	All habitable floor areas have a minimum vertical freeboard of 300mm above the 1% AEP.	Details to be provided at the building application stage.
9	Cyclone safety	(a)	Provide a building or buildings that are designed for emergency cyclone sheltering purposes for all occupants the site is designed to accommodate. Such buildings shall be designed and constructed to a Building Code of Australia importance level four (4), unless otherwise agreed by the Town's emergency services.	To be considered during the building application stage.

Social Contributions

Footpath Link - Department of Transport Pilbara 2050 Cycling Strategy

The Department of Transport Pilbara 2050 Cycling Strategy and Town of Port Hedland Active Transport Strategy 2023 identify that there is a need for a publicly accessible path 2 metres wide and approximately 370 metres long, between Kennedy Street and Stanley Street, to provide a better pedestrian connectivity for the area. The 'missing link' is to be located along the northern boundary of the development and provides a more direct connection to community infrastructure such as parks, schools and recreation facilities. It is anticipated that the residents of the proposed development will contribute to an increased use of the active transport network, particularly that surrounding the site.

Under Clause 27 of the Town's Local Planning Scheme No. 7, State Planning Policy 3.6 (SPP 3.6) allows the Town to require developer contributions toward infrastructure through the development application process. Under SPP3.6 the contribution would be considered a 'standard infrastructure contribution' as it is identified as item 12 in Schedule 1, which are recognised as an essential prerequisite to development.

Should the applicant not wish to construct the footpath, its recommended a cash-in-lieu contribution be provided, with the cost being equal to that of recent footpath developments. The Town's infrastructure services have identified this as $595 per square metre for a concrete path. This approach is consistent with previous approvals for the BHP (Port Haven) – Workforce accommodation development extension (DAP2023-034 – Condition 4 refers) and

Public Open Space (POS)

The Town's Public Open Space Strategy 2019 identifies that the provision of formally classified POS in the South Hedland locality (Walnut Grove precinct) falls well below the 10% requirement at 1.57%. The Strategy recommends that POS be included within the subject site as part of a structure plan / subdivision process.

The Town's Draft Public Open Space and Street Tree Strategy 2025- 2035 has completed public advertising and will be presented to Council for adoption at the 30 July Ordinary Council Meeting. The draft strategy recommends that POS be provided on-site as it is located in an area of POS shortfall and outside of a walkable catchment area. The draft strategy also identifies that it is appropriate to require contributions, such as cash-in-lieu (CIL), from workforce accommodation developments. These contributions establish a clear nexus between the development and its impact on the POS network, ensuring that open spaces are adequately funded, maintained, and expanded.

Clause 27 of the Town's Local Planning Scheme No. 7, SPP 3.6 allows the Town to require developer contributions toward infrastructure through the development application process. Under SPP3.6 the contribution would be considered a 'standard infrastructure contribution' as it is identified as item 2 in Schedule 1, which are recognised as an essential prerequisite to development.

In line with SPP3.6 and the draft POS strategy, cash-in-lieu contributions are to be spent within the suburb, however it is proposed that to ensure that there is sufficient nexus, the contribution would be used to increase the quality of an existing POS that is located within a 1km radius of the development. Initial costings have been undertaken as part of the draft strategy formulation and yet to be made public, however a contribution of $550,000 would allow for a portion of the recommendations within Appendix D of the draft strategy to be undertaken. This action is consistent with previous workforce accommodation approvals within South Hedland.

Social Impact Management Plan

The applicant has provided a Social Impact Assessment sufficient for the purposes of this assessment in accordance with the Town's Local Planning Policy 06 - Social Impact Assessment. Further detail affirming public access to the site and services and ongoing monitoring of social impacts associated with the development require refinement through the Social Impact Management Plan. A condition has been recommended requiring the social impact management plan be approved to the satisfaction of Town of Port Hedland.

Stormwater Management Plan

Preliminary stormwater management plans provided indicated the stormwater methodology was sound but needed detailed drawings to comply with the Town's Local Planning Policy LPP - 011 Stormwater Management. A meeting was conducted with

the applicant to discuss the Town' requirements to complete endorsement. Information on levels was provided but found insufficient. An agreement was reached that further detailed plans being provided prior to the building stage. A condition has been recommended requiring detailed engineering drawings of car parking areas including kerbing, spillways, cross-sections, surface and erosion mitigation. Further details have also been required associated with landscaping plans, finished surfaces of garden beds /swales, and materials to be used which influence the stormwater design.

Construction and Environmental Management Plan (CEMP)
During construction phases of most developments, there is potential for the activity to have impact on the surrounding environment and the amenity of occupants and visitors to the existing surrounding land uses. Generally, the Town will mitigate impacts of development through preparation and implementation of the CEMP. A condition has been recommended requiring a CEMP to be submitted prior to any construction beginning onsite.

Detailed Landscaping Plan
The applicant has prepared a Landscape Masterplan and provides suggestions of landscape planting and irrigation strategy. The planting strategy proposes establishing a 'visually appealing' landscape, prioritising on trees and native plant species. The Masterplan includes a lighting strategy. The applicant has indicated its commitment to further detailed plans and the Town applying a condition accordingly. A condition has been recommended that detailed landscaping plans be lodged for approval.

Fencing detail for the Kennedy Street and Stanley Street frontages have been indicated in architectural renders and elevation plans. Some clarity and detail drawings are required for the Stanley Street dwellings to understand permeability. A condition has been recommended for details plans to be lodged as part of the landscaping plans.

Traffic Impact Assessment
The application includes a Traffic Impact Assessment (TIA). The Town's Engineering Services team requested further information on traffic counts and modelling. This was provided on 4 July 2025 and has since found to be sufficient. Contrary, to the some concerns raised in the submissions, there are no concerns about the surrounding road network accommodating the traffic generated by the development or the need for modifications to the road infrastructure. A condition has been recommended requiring a modified TIA as the last information provided by the applicant has not been inserted in the report.

Operational Management Plan (OMP)
An operational management plan will be required to minimise impact of the workforce accommodation activity on the location and residents, and to ensure the facility is safe for the occupants and visitors. The following is to be addressed in the OMP (but not limited to):

a. Details of the proposed operational activities on site, including the number of staff, management activities to minimise impacts on adjoining properties and residents.
b. Safety and Security measures.
c. Lighting management plan and demonstrate compliance with AS/NZS 4282.2023 - Control of the Obtrusive Effects of Outdoor Lighting.
d. Waste management plan.
e. Landscaping and reticulation management.
f. Complaints management plan, including annual reporting.

Conclusion:

This report provides an assessment of the proposed development for Lot 51 Kennedy Street, South Hedland. The development is compatible with surrounding residential landscape, consisting of single and two storey buildings. The applicant has demonstrated through an indicative development/subdivision plan, the proposed housing and resident population density of the development would be less than what can be permitted if developed for R20 and R40 housing lots (Refer Attachment 2). The indicative development/subdivision plan is considered compatible with the surrounding residential area and the broader urban landscape of South Hedland.
The proposed development is consistent with the planning framework. *The Planning and Development (Local Planning Schemes) Regulations 2015 – Schedule 2 Deemed Provisions - cl 27 (2)* permits a development or subdivision to be considered without an approved structure plan in place. The indicative future development/subdivision design is considered compatible with the surrounding residential uses and would not conflict with the principles of orderly and proper planning; and due to the temporary nature of the workforce accommodation component should not prejudice the overall development of the area.

Th development is a significant proposal that has potential to provide employment opportunities and improved neighbourhood amenity. The timing of the development and proposed mix of permanent and temporary uses can be advantageous to the Town, considering improvements to the locality and future development pattern over the land through subdivision or a structure planning process. The development is recommended for approval subject to conditions to maintain a high standard of amenity for the occupiers of surrounding properties.

SHRA ACCOMMODATION VILLAGE

LOT 51 KENNEDY STREET, PORT HEDLAND

SITE DEVELOPER GROUNDED CONSTRUCTION AND CADDS GROUP ACKNOWLEDGE THE KARIYARRA, NGARLA, AND NYAMAL PEOPLE AS THE TRADITIONAL CUSTODIANS OF THE TOWN OF PORT HEDLAND LANDS. WE RECOGNISE THEIR STRENGTH AND RESILIENCE AND PAY OUR RESPECTS TO THEIR ELDERS PAST AND PRESENT.

WE EXTEND THAT RESPECT TO ALL ABORIGINAL & TORRES STRAIT ISLANDER PEOPLE OF THE LOCAL COMMUNITY, AND RECOGNISE THEIR RICH CULTURES AND THEIR CONTINUING CONNECTION TO LAND AND WATERS.

DESIGN INTENT & CONTEXT

SOUTH HEDLAND REGIONAL ACCOMMODATION VILLAGE

PROJECT OVERVIEW

CADDS GROUP HAS BEEN ENGAGED BY GROUNDED TO DESIGN AND DEVELOP A MASTERPLAN FOR LOT 51 KENNEDY STREET IN SOUTH HEDLAND. THIS BROWNFIELD SITE, FORMERLY THE BHP PUNDULMURRA CAMP, IS BEING TRANSFORMED INTO A CONTEMPORARY ACCOMMODATION VILLAGE THAT AIMS TO ELEVATE THE STANDARD FOR REGIONAL WORKER HOUSING.

THE SOUTH HEDLAND REGIONAL ACCOMMODATION (SHRA) VILLAGE WILL PROVIDE 252 SINGLE-BEDROOM ACCOMMODATION UNITS AND 15 THREE-BEDROOM TOWNHOUSES (A TOTAL OF 297 ROOMS), SUPPORTED BY COMMUNAL FACILITIES INCLUDING A DINING HALL WITH INTEGRATED CAFÉ/BAR, OUTDOOR ALFRESCO SPACES, RECREATION BUILDING, FULLY EQUIPPED GYMNASIUM WITH INDOOR AND OUTDOOR FITNESS AREAS, MULTI-USE SPORTS COURT AND SEA CONTAINER-STYLE POOL. THESE AMENITIES ARE COMPLEMENTED BY THOUGHTFULLY DESIGNED LANDSCAPE ZONES FEATURING BBQ AREAS, SHELTERS, AND COMMUNAL GATHERING SPACES.

THE PROJECT REPRESENTS A MEANINGFUL INVESTMENT IN SOUTH HEDLAND'S BUILT ENVIRONMENT AND SUGGESTS HOW REMOTE WORKER ACCOMMODATION MIGHT BE DELIVERED WITH SENSITIVITY TO ITS RESIDENTIAL CONTEXT. THROUGH THIS LENS, THE PROJECT ENDEAVOURS TO SHOW THAT COMMERCIALLY VIABLE DEVELOPMENT CAN ASPIRE TO EMBODY CORE DESIGN PRINCIPLES OF PLACE, PURPOSE, AND HUMAN EXPERIENCE

GUIDING PRINCIPLES

THE SHRA VILLAGE DESIGN PHILOSOPHY CENTRES ON CREATING A DIGNIFIED, COHESIVE, AND CONTEXTUALLY APPROPRIATE DEVELOPMENT WITHIN ESTABLISHED COMMERCIAL PARAMETERS. THESE FINANCIAL CONSIDERATIONS NECESSITATED TRANSPORTABLE BUILDING FORMS FOR BOTH ACCOMMODATION UNITS AND CENTRAL FACILITIES, WHICH HAS IN PART SHAPED THE COMPOSITIONAL APPROACH FROM THE OUTSET. RATHER THAN DISGUISING THESE ECONOMIC DRIVERS, THEY HAVE BEEN INTEGRATED TRANSPARENTLY INTO THE DESIGN NARRATIVE WHILE IMPLEMENTING STRATEGIC INTERVENTIONS TO ELEVATE THE OVERALL OUTCOME.

THE RESULTING DESIGN POSITS THAT ECONOMIC PRAGMATISM AND BUILT ENVIRONMENT QUALITY NEED NOT BE MUTUALLY EXCLUSIVE. BY FOCUSING ON SITE PLANNING, SPATIAL RELATIONSHIPS AND THOUGHTFUL INTEGRATION WITH SURROUNDING NEIGHBOURHOODS, THE DESIGN AIMS TO MOVE BEYOND A PURELY UTILITARIAN SOLUTION TOWARD CREATING A RESPONSIVE COMMUNITY ASSET.

THIS PROJECT MAKES A COMPELLING CASE THAT ACTIVATING VACANT LAND WITH A WELL-CONSIDERED DESIGN - EVEN ONE BUILT WITHIN BUDGET CONSTRAINTS - DELIVERS GREATER COMMUNITY VALUE THAN ALLOWING THE SITE TO REMAIN DORMANT. WHILE SIMPLE, THE DESIGN CREATES FUNCTIONAL SPACES THAT RESPECT THEIR CONTEXT, SUPPORT RESIDENT WELLBEING, AND CONTRIBUTE POSITIVELY TO SOUTH HEDLAND'S URBAN FABRIC.

DESIGN INTENT AND CONTEXT

BUILDING ON THESE COMMERCIAL PRACTICALITIES, THE DESIGN APPROACH FOR THE SHRA VILLAGE IS FOUNDED ON PRINCIPLES OF CONTEXTUAL INTEGRATION, INFRASTRUCTURE EFFICIENCY, COMMUNITY AND RESIDENT WELLBEING. THE DESIGN ETHOS PRIORITISES SUSTAINABLE REUSE OF PRE-EXISTING ASSETS AND INFRASTRUCTURE WHILE CREATING A RESIDENTIAL ENVIRONMENT THAT MAINTAINS HARMONY WITH THE SURROUNDING SUBURBAN FABRIC. RATHER THAN IMPOSING A WHOLLY NEW BUILT STATEMENT, A RESPONSIVE DESIGN HAS BEEN DEVELOPED WHICH RESPECTS BOTH SITE HISTORY AND NEIGHBOURHOOD CHARACTER.

SITE CONTEXT AND HERITAGE

THE SITE, FORMERLY HOME TO THE BHP PUNDULMURRA CAMP, HAS REMAINED VACANT FOR APPROXIMATELY A DECADE WHILE RETAINING VALUABLE INFRASTRUCTURE CONNECTIONS. THIS BROWNFIELD LOCATION OFFERS STRATEGIC ADVANTAGES WITH ITS PROXIMITY TO SOUTH HEDLAND TOWN CENTRE, EDUCATIONAL FACILITIES, AND RESIDENTIAL NEIGHBOURHOODS. THE DESIGN RESPONSE ACKNOWLEDGES AND LEVERAGES OFF THIS PAST USE WHILE REIMAGINING THE SPACE AS A CONTEMPORARY ACCOMMODATION VILLAGE THAT BETTER ADDRESSES ITS SURROUNDINGS

INFRASTRUCTURE-LED DESIGN

A FUNDAMENTAL DRIVER OF THE STRATEGY HAS BEEN THE INTELLIGENT REUSE OF EXISTING SITE INFRASTRUCTURE. BY LEVERAGING THE SITE'S ESTABLISHED CONNECTIONS TO ESSENTIAL SERVICES, EXISTING CROSSOVERS, AND PREVIOUSLY DEVELOPED INTERNAL CAR PARKS AND ROADWAYS, UNNECESSARY ENVIRONMENTAL DISRUPTION HAS BEEN MINIMISED WHILE OPTIMISING PROJECT RESOURCES. THE EXISTING KENNEDY STREET ENTRY POINT AND CAR PARK LOCATION CREATE NATURAL ANCHORS AROUND WHICH THE SITE PLAN ORGANICALLY DEVELOPED, WITH ADMINISTRATIVE AND COMMUNAL CENTRAL FACILITIES POSITIONED FOR LOGICAL ADJACENCY TO THESE ACCESS POINTS.

NEIGHBOURHOOD INTEGRATION

THE COMPOSITIONAL APPROACH DELIBERATELY MITIGATES VISUAL IMPACT ON SURROUNDING RESIDENTIAL STREETS. SINGLE-STORY ADMINISTRATIVE AND RECREATIONAL BUILDINGS (APPROX. 3M HIGH) ARE STRATEGICALLY POSITIONED ALONG KENNEDY STREET TO CREATE A VISUAL BUFFER THAT SCREENS ACCOMMODATION UNITS FROM STREET VIEW. THE TOWNHOUSES ARE ORIENTED TO ADDRESS STANLEY STREET WITH FORMAL FRONTAGES, WHILE BACK-OF-HOUSE FUNCTIONS (KITCHEN LOADING AREAS, BIN STORES, WATER TANKS, MAINTENANCE / LINEN SHED) ARE POSITIONED AWAY FROM RESIDENTIAL INTERFACES TO WHERE THERE ARE NO NEIGHBOURING HOUSES. THIS CONSIDERED ARRANGEMENT DEMONSTRATES RESPECT FOR NEIGHBOURHOOD CHARACTER WHILE MAINTAINING OPERATIONAL FUNCTIONALITY.

SPATIAL ORGANISATION

THE SITE LAYOUT AIMS TO SOFTEN THE UTILITARIAN APPROACH OFTEN ASSOCIATED WITH ACCOMMODATION VILLAGES. ACCOMMODATION BUILDINGS ARE SPACED 4-5M APART, EXCEEDING THE MINIMUM 3M NCC REQUIREMENT. THIS INCREASED SPACING NOT ONLY REDUCES VISUAL DENSITY AND CREATES BREATHING SPACE THROUGHOUT THE DEVELOPMENT BUT ALSO PROVIDES ROOMS WITH GREATER ACOUSTIC PRIVACY AND COMFORT, SUPPORTING IMPROVED SLEEP QUALITY AND ULTIMATELY BETTER RESIDENT HEALTH AND WELLBEING.

THE RADIAL ARRANGEMENT OF BUILDINGS ADDRESSES MORE THAN SITE DRAINAGE - THE SPATIAL LAYOUT INTRODUCES A MORE ORGANIC COMPOSITION THAN TRADITIONAL LINEAR CONFIGURATIONS, WITH CLEAR SIGHT LINES MAINTAINED TO COMMUNITY LANDMARKS LIKE THE ICONIC WATER TOWER. THIS ARRANGEMENT IS COMPLEMENTED BY THOUGHTFULLY DESIGNED LANDSCAPING AND INTEGRATED PATHWAYS TO ENSURE EASY NAVIGATION THROUGHOUT THE DEVELOPMENT. DISTRIBUTED BREAKOUT AREAS WITHIN THE LANDSCAPE FEATURE BBQS AND GARDENS, CREATING DEDICATED SPACES FOR SOCIAL GATHERINGS AND FOSTERING A SENSE OF COMMUNITY AMONG RESIDENTS

LEGIBILITY AND WAYFINDING

ARCHITECTURAL ELEMENTS ARE DEPLOYED STRATEGICALLY TO ENHANCE SITE LEGIBILITY AND WAYFINDING. THE BREEZEWAYS BETWEEN ADMINISTRATIVE, RECREATIONAL, AND GYMNASIUM BUILDINGS SERVE AS PRONOUNCED VISUAL ENTRIES FROM KENNEDY STREET, CREATING RECOGNISABLE GATEWAYS INTO THE DEVELOPMENT. THIS BUILT FORM GESTURE ADDRESSES THE CHALLENGE OF ORIENTATION WITHIN LARGER ACCOMMODATION FACILITIES, PROVIDING RESIDENTS WITH CLEAR VISUAL CUES FOR NAVIGATION AFTER LONG WORK DAYS.

THE DINING HALL'S PROMINENT POSITION ADJACENT TO THE BUS DROP-OFF POINT FURTHER REINFORCES INTUITIVE SITE NAVIGATION. ITS VISIBILITY CREATES AN IMMEDIATE REFERENCE POINT UPON ARRIVAL, WHILE THE INTEGRATED CAFÉ ALONG THE SOUTHERN FAÇADE OFFERS CONVENIENT TAKEAWAY COFFEE AND ON-THE-GO BREAKFAST OPTIONS FOR RESIDENTS DURING THEIR MORNING COMMUTE.

CLIMATE RESPONSE

THE DESIGN RESPONDS PRAGMATICALLY TO PORT HEDLAND'S DEMANDING CLIMATE. BUILDING ORIENTATIONS MINIMISE WESTERN SUN EXPOSURE WHILE MAXIMISING SHADED OUTDOOR AREAS DURING AFTERNOON PERIODS. COVERED WALKWAYS AND VERANDAHS CREATE PROTECTED CIRCULATION ROUTES, WHILE BUILDING FORMS FACILITATE NATURAL VENTILATION. MATERIAL SELECTIONS PRIORITISE DURABILITY IN CYCLONIC CONDITIONS AND HEAT RESISTANCE, WITH LIGHT-COLOURED ROOFING AND EXTERNAL FINISHES REDUCING HEAT ABSORPTION.

COMMUNITY FOCUS

A KEY CONSIDERATION IS THE CREATION OF A RESIDENTIAL ENVIRONMENT THAT SUPPORTS COMMUNITY WELLBEING. THE RECREATION PRECINCT, INCLUDING AN ELEVATED SEA-CONTAINER POOL, MULTI-COURT, SHADED OUTDOOR FIXED EQUIPMENT AND GYM IS POSITIONED AT THE DEVELOPMENT'S HEART, ENCOURAGING SOCIAL INTERACTION AND HEALTHY LIFESTYLES. IMPORTANTLY, THESE RECREATIONAL FACILITIES WILL BE WELL-LIT AND FULLY UNIVERSALLY ACCESSIBLE, ACTIVELY AVOIDING A BINARY APPROACH TO BUILDING AMENITIES THAT CAN UNDERMINE THE DIGNITY OF A DIVERSE RESIDENT COMMUNITY.

THE DINING HALL EXTENDS BEYOND FUNCTIONAL REQUIREMENTS, OFFERING ALFRESCO SPACES AND VARIED SEATING OPTIONS THAT FEEL LESS LIKE A DRY MESS AND MORE LIKE A LOCAL EATERY. THE INTEGRATED CAFÉ/BAR FUNCTION ENSURES FOOD IS SERVED WHERE ALCOHOL IS PROVIDED, SUPPORTING THE RESPONSIBLE CONSUMPTION OF ALCOHOL AND ALIGNMENT WITH SOCIAL CONNECTION. TOGETHER WITH OPERATIONAL POLICIES, THE DINING HALL AND CAFÉ/BAR AREA PROVIDE A RANGE OF DINING, BISTRO AND TAVERN SPACES THAT PROMOTE COMMUNAL GATHERING AND SOCIAL CONNECTION - ESSENTIAL ELEMENTS FOR RESIDENTS WORKING AWAY FROM HOME.

1. Executive Summary

This report has been prepared on behalf of Grounded Construction Group in support of a development application seeking approval for the South Hedland Regional Accommodation (SHRA) development on Lot 51 Kennedy Street in South Hedland.

The proposed development provides a unique accommodation offer on an under-developed and long time vacant site. Informed by early stakeholder engagement, this development is well positioned to contribute both temporary and longer term accommodation opportunities. With 297 rooms spread across 64 modular units and 15 townhouses, the development will be accessible to a range of professional, contractor and key service workers.

The low density, predominantly single storey and landscape-led development provides a high quality 'home away from home' designed to integrate appropriately into its urban setting. Well portioned rooms supported by a wide range of dining and recreational communal facilities will ensure the safety and well-being of future visitors promoting healthy lifestyles and a sense of community.

This application seeks land use and development approval for:

- 'Workforce accommodation' for a time-limited 10 year period across the development site, and additionally,
- 'Grouped dwellings' at a density of R40 for the 15 townhouses.

The development will help to address the ongoing demand for workforce accommodation in Port Hedland in the short to medium term and help to generate the funding required to eventually transition the site to permanent residential over the longer term.

This report presents the relevant planning aspects of the proposal, demonstrating alignment with local planning policies, local and state strategies and Town of Port Hedland Local Planning Scheme No 7 (LPS7). It is supported by the following technical reports:

- Architectural Design Intent Statement and Architectural plans prepared by CADDS;
- Landscape Masterplan prepared by Tim Davies Landscaping (TDL);
- Market Context Statement prepared by Syme Marmion & Co;
- Traffic Impact Statement prepared by Flyt;
- Social Impact Assessment prepared by Circle Advisory;
- Engineering Design Report prepared by Forth Consulting Group and Civil Stormwater Plan prepared by RSA Civil and Structural Consulting Engineering
- Preliminary Urban Water Management Plan prepared by Pentium;
- Sustainability Design Assessment Report prepared by Emergen; and
- Flora, Vegetation and Fauna Survey prepared by PGV Environmental.

It is respectfully requested that the Regional Development Assessment Panel approve the proposed development.

2. Introduction

This report has been prepared on behalf of Grounded Construction Group, the applicant and developer, and SHRA Pty Ltd, the landowner, in support of the South Hedland Regional Accommodation (SHRA) development on Lot 51 Kennedy Street in South Hedland. This site is located in the Town of Port Hedland (the Town) and is zoned Urban Development under the Town's Local Planning Scheme No. 7 (LPS7).

2.1 Proposal Summary

The SHRA development provides a unique accommodation offer on an under-developed and long-time vacant site. It responds to ongoing demand for worker accommodation in WA's Pilbara region and provides a strategy towards achieving more permanent residential development in the Town of Port Hedland.

The development proposes a total of 297 rooms are spread across 64 x modular units (including two accessible units) and 15 x townhouses and set within a landscaped setting. The units and townhouses which will be accessible to a range of professional, contractor and key service workers are supported by centralised communal facilities.

The following report presents the relevant planning aspects of the proposal, demonstrating alignment with the relevant local planning policies, local and regional strategies and objectives and requirements of LPS7.

Table 1 Development Proposal Snapshot

Application Details	Summary
Property Address	Lot 51 on Plan 425988 (Lot 51 Kennedy Street, South Hedland)
Combined Land Area	4.89 hectares
Landowner	SHRA Pty Ltd
Applicant / Developer	Grounded Construction Group
Responsible Authority	Town of Port Hedland
Land Use Zone	Town of Port Hedland Local Planning Scheme No.7 Urban Development Zone
Existing Land Uses	Vacant since the former BHP Pundulmurra Accommodation Village was demobilised 2015
Proposed Land Uses	Workforce Accommodation, Grouped Dwelling (Residential R40) 79 accommodation units/townhouses equivalent to 297 rooms plus centralised communal facilities
Estimated Cost of Development	$60 million

2.2 Development Approval Pathway

The cost of this development application exceeds $2 million and therefore qualifies under Regulation 6 of the *Planning and Development (Development Assessment Panels) Amendment Regulations 2024* for determination by the Regional Development Assessment Panel (Regional DAP).

Completed DAP Form 1 application form and Town of Port Hedland application form are enclosed with this application at Appendix A.

Refer Appendix A – Development Application Forms

2.3 Pre-Lodgement Engagement

To inform the preparation of the development concept, which is planned in an established residential neighbourhood, Grounded Construction Group undertook early engagement with a range of community stakeholders. The object of early engagement was to better understand the site and how the development can support the collective aspirations for South Hedland, and the Town of Port Hedland more broadly.

Early engagement has occurred with identified and interested local operators and Local and State Government stakeholders including DevelopmentWA, Department of Communities, Water Corporation, commercial operators and contractors based in Port Hedland, the Pilbara Development Commission, Port Hedland Chamber of Commerce and Industry, Port Hedland International Airport, Hedland High School, North Regional TAFE Pundulmurra Campus, Country Health WA, and the Town's officers and Elected Members.

A number of letters in support of the development have been obtained by Grounded Construction Group from small local business operators interested in securing additional worker accommodation, such as that proposed by this development.

Two (2) informal community information sessions were hosted on 4 March 2025 in South Hedland for the surrounding neighbourhood. Whilst the event was not well attended by local residents, the proponent is committed to establishing an ongoing dialogue with the local community over the course of the project.

2.4 Project Team

The proposed development has been informed by a range of specialist technical reports, plans and studies prepared by the multidisciplinary project team.

3. The Proposal

The SHRA development will provide bespoke short and longer term accommodation opportunities for a range of professional, construction, contractor and key service workers on Lot 51 Parker Street in South Hedland. The development will be built by Grounded Construction Group and owned and operated by the landowner SHRA Pty Ltd.

Development is intended to commence construction in 2025 and operations by the end of 2026. The proposed site plan and landscape master plan are provided at Figure 1 and Figure 2 below and attached as Appendix B.

Refer to Appendix B – Development Plans and Landscape Masterplan

Figure 1 Proposed Site Plan

Figure 2 Landscape Masterplan

3.1 Project Intent

The development will deliver a distinctive accommodation experience for a range of workers that prioritises the safety and well-being of future occupants and integrates sensitively into the existing community.

The development offers a variety of recreational and central communal facilities promoting healthy lifestyles and a strong sense of community. Some of these facilities can be made available to the local community such as the Dining Hall, convenience Retail Store in the Administration building and Gymnasium building, as well as the bus collection point for food truck and family friendly community events.

Significantly this development distinguishes itself from typical temporary worker camps by:

- Combining temporary high quality modular worker accommodation with long-term residential dwellings, increasing supply to meet ongoing workforce accommodation demand and diversifying the available rental accommodation options and price points.

  The modular unit design is informed by Grounded Construction Group's learnings from the WA Mining Club 'Design a Donga' initiative. The initiative provided high quality, purpose-built insulated and acoustically treated accommodation that improves the living conditions and experience of workforces living and working away from home. The knowledge shared as part of the Design a Donga initiative ensures workers have uninterrupted rest and reduced fatigue. Providing high quality accommodation maintains workforce motivation and productivity and attracts and sustains skilled workers.

  The accommodation unit design also borrows the design principles from Project Blue, a holistic design service company known for its thoughtful application of considered 'intelligent' design principles.

Project Blue's design approach is informed by research and consultation with experts from Curtin University and the University of Western Australia specialising in Organisational Behaviour and Productivity.

Through intelligent workspace design solutions, Project Blue is able to reduce potential mental health issues, promote productivity, and workforce satisfaction by focusing on environmental influences such as a sense of nature, resident comfort and social interaction. Its designs feature:

- Fixtures and furnishings that have minimal institutional connotations; and
- Naturally warm materials, natural colours, greenery and selected finishes that are tactile, visual appealing and communicate a 'home-like' environment.

- SHRA Pty Ltd in conjunction with Grounded Construction Group (under the same company ownership structure) will build, own and operate the development. Grounded Construction Group is a WA owned and operated company and has a well-established reputation in the Pilbara, designing and building worker accommodation for large mining and resource companies. SHRA Pty Ltd will contract Grounded Construction Group to develop its first owned and operated worker accommodation solution in Port Hedland. This structure and business model ensures SHRA Pty Ltd ability to transition towards permanent long term residential. Grounded Construction Group's Capability Statement is attached as Appendix C.

  Refer to Appendix C – Capability Statement

- Providing high-quality accommodation and communal facilities in an urban and existing neighbourhood of South Hedland where existing service networks are available and accessible. The development is supported by the adjoining landowner of Lot 50 Parker Street.

  Refer to Appendix D – Letter of neighbouring landowner support.

- Working in partnership with local neighbours such as Hedland High School and North Regional TAFE Pundulmurra Campus to exploit opportunities for youth employment and student training in administration, hospitality, commercial cookery, construction, landscaping and maintenance areas.

- Working with the Kariyarra Corporation to explore opportunities for the integration of Aboriginal art and wayfinding initiatives.

- Supporting local service procurement, including local indigenous businesses for transgenerational wealth creation, through the supply of materials and specialist services.

  Local procurement opportunities include geotechnical site investigation and land survey, supply of concrete, gravel and fill, fuel, building and landscape materials, local vehicle, plant and equipment hire, construction workers accommodation, meals preparation and food supply, and freight handling and logistics.

  We estimate the direct local spend during construction is estimated at $4.5M to $6.0M over a 12 to 18 month period whilst the operational direct local spend is estimated to be $2M to $3M per annum or $20M to $30M over a 10 year period.

  A report commissioned by the Port Hedland Industries Council indicates that every dollar of expenditure made in the area generates a flow on expenditure of $1.97.[1]

[1] Acil Allen (2004) 'The Economic Significance of Port of Port Hedland' Report to Port Hedland Industries Council, viii.

3.2 Design Intent

The proposed development's design philosophy centres on creating a dignified, cohesive, and contextually appropriate development within established, and inescapable, challenging commercial parameters.

Rather than a purely utilitarian solution, the design combines economic pragmatism with built environment quality to deliver community value. It focuses on site planning, spatial relationships and thoughtful integration with surrounding neighbourhoods and is founded on principles of contextual integration, infrastructure efficiency, community and resident wellbeing.

The design ethos prioritises sustainable reuse of pre-existing assets and infrastructure while creating a residential environment that maintains harmony with the surrounding suburban fabric. Rather than imposing a wholly new built statement, a responsive design has been developed which respects both site history and neighbourhood character.

Key aspects of the design include:

Site Context and Heritage	This brownfield location offers strategic advantages with its proximity to South Hedland Town Centre, educational facilities, and residential neighbourhoods. The design response leverages from its past BHP Pundulmurra Accommodation Village use, but reimagines the space as a contemporary accommodation village that better addresses its surroundings.
Infrastructure-Led Design	The design makes intelligent reuse of existing site infrastructure: the site's established connections to essential services, existing crossovers, and previously developed internal car parks and roadways, which avoids unnecessary environmental disruption and resource expenditure. The existing Kennedy Street entry point and car park location create natural anchors around which the site plan organically developed.
Spatial Organisation	The layout significantly softens the typical utilitarian approach to work camps. Accommodation units are sited 4-5m apart, exceeding the NCC minimum (3m) requirement which reduces visual density, allows natural ventilation and sunlight access and provides acoustic privacy and comfort that improves resident health and wellbeing. The organic radial arrangement, compared to traditional linear configurations, maintains clear sight lines to iconic landmarks like the water tower. Easy navigation is ensured through the complementary landscaping, integrated pathway. Evenly distributed breakout BBQs and garden areas are dedicated spaces for social gatherings and foster a sense of resident community.
Legibility and Wayfinding	The breezeways between Administrative, Recreational, and Gymnasium buildings provide pronounced visual cues to the Kennedy Street entrance, creating recognisable gateways into the development. The prominent positions of

	the Dining Hall and bus drop-off point further reinforces intuitive site navigation.
Climate Response	The design responds pragmatically to Port Hedland's demanding climate. The built form orientation minimises western sun exposure while maximising shaded outdoor areas during afternoon periods. Covered walkways and verandas create protected circulation routes, while building forms facilitate natural ventilation. Material selections prioritise durability in cyclonic conditions and heat resistance, with light-coloured roofing and external finishes reducing heat absorption.
Community Focus	The development contributes to the internal and external existing community. The recreation precinct, including an elevated sea-container pool, multi-court, shaded outdoor fixed equipment and gymnasium is positioned at the development's heart, encouraging social interaction and healthy lifestyles for those staying in the development. The recreational facilities will be well-lit, universally accessible and actively avoiding a binary approach to building amenities. The Dining Hall extends beyond functional requirements, offering alfresco spaces and varied seating options, translating as a local eatery experience. Together with operational policies, the Dining Hall and Café/Bar area provide a range of dining, bistro and tavern spaces that promote communal gathering and social connection - essential elements for residents working away from home.

3.3 Key Development Components

Key components of the proposed development are summarised below.

Table 3 Project Consultant Team

Component	Summary
Accommodation units (total 79 units/townhouses, 279 rooms)	• 62 x modular units, each containing 4 rooms (total 252 rooms). • 2 x accessible units (total 4 rooms). All units contain generous bedrooms, bathrooms and desk, with veranda and privacy screening and diverse colour palette. Two (2) units are accessible (universal) and could be utilised by executives or couples. Units will be directed to construction, contractor and service FIFO and DIDO workers who are unable to access existing worker accommodation. Units are connected via landscaped and partially sheltered pathways to communal facilities.
	• 15 x townhouses, along Stanley Street (45 rooms).

Component	Summary
	Each dwelling includes three (3) bedrooms with individual ensuites, east and west facing balconies and alfresco and outdoor living areas at ground level. The townhouses are designed for lease (greater than 3 months and as a primary place of residence) and future survey strata subdivision.
Communal Facilities	• A 320m^2 Administration building with reception and check in area including a convenience retail shop. • A 280m^2 Recreation building containing lounges, table tennis, pool tables. • A 480m^2 Gymnasium building including male and females changerooms, lockers, an outdoor gym area, a basketball court and pool • A 1000m^2 Dining Hall (total capacity 290 patrons) and commercial kitchen. A portion of the Dining Hall is intended to be licensed, subject to a separate application. • 'Back of House' service, delivery and storage areas for deliveries and communal facilities waste collection by heavy vehicles. The service area also contains a 230m^2 maintenance shed and linen store. • Four (4) x shared laundry modular units interspersed with the units. • Shared BBQ facilities integrated into landscaped breakout areas.
Parking	146 car parking bays are arranged around the site including: • 98 secured and lit (solar and sensor lighting) light vehicle car bays along Kennedy Street, including two (2) accessible bays and EV charging bays • 18 x staff and maintenance, service car parking bays to the rear of the Dining hall • 30 x light vehicle car parking bays at the rear of the proposed townhouses.
Ingress and egress, site access	Vehicle egress and access concentrated at the south-west of the site. The existing crossover and slip lanes will be utilised for public access to the site on Kennedy Street. A new separate crossover will be provided further west of the existing crossover providing direct access for maintenance vehicles. An internal one-way loop road provides access to the townhouses and minimises increased traffic volumes on Stanley Street. The loop road also facilities access for emergency vehicles and security patrols and surveillance to the extremities of the site. A dedicated bus collection point, which allows for development occupants to be transported to and from their workplaces and airport is sited adjacent to the Dining Hall. The drop off/pick up facility accommodates two (2) large vehicle parking bays. This parking area could be available for food truck parking area and accessible to the public for family-friendly dining.

Component	Summary
Landscaping	A network of landscaped 2.5m wide north-south pedestrian spines and partially covered pathways that run along drainage swales will connect accommodation units to key central facilities and active and passive outdoor spaces. Units will be within 300m walking distance of the central facilities and a 600m looped running track has been integrated into this pathway network. The landscape response features carefully selected plant species that support the site's ecological function and biodiversity values and are climate and context responsive. This includes plants with wind-resistant root systems and tolerance to heavy rainfall.
Servicing	The development will retain rainfall runoff onsite via drainage swales and a central basin for 20% AEP 6 minute duration events. This will assist with maintaining predevelopment hydrological conditions whereby widespread infiltration occurs to the pervious ground, as well as reduce the movement of sediments. Power, communication, portablewater and wastewater will connect into existing networks with upgrades as required. There is adequate servicing capacity to support the development proposed as confirmed with Horizon Power and Water Corporation

3.4 Site Context

The development site is a long time under-utilised and vacant site, with the former BHP Pundulmurra Workers Village having been demobilised in 2015. The site contains existing infrastructure in the form of slip lanes, Kennedy Street crossover and hardstand in the Kennedy Street setback. Remnant potable water and wastewater connection are also present.

The balance of the site contains some scattered trees but mainly vegetated scrub, regrown after the BHP Pundulmurra Workers Village was demobilised. A 2024 flora, vegetation and fauna survey confirmed that the environmental condition of the vegetation and fauna habitat is degraded. Refer to the Flora, Vegetation and Fauna Survey provided at Appendix E. There is also an approximate 4m fall across the site east to west.

Refer to *Appendix E - Flora, Vegetation and Fauna Survey.*

The site has a mix of infrastructure, non-residential and residential interfaces and is land-locked with limited street frontages to Kennedy Street and Stanley Street. Shallow water pipes are located on Lot 2945, with the water tower on Lot 89 and a pump station on Lot 5278. The need to upgrade the shallow pipes on Lot 2945 means an integrated development across Lot 2945 and Lot 51, and interfacing with the 'Elements Estate' to the north, is not possible.

The site's immediate western interface is to vacant lots, Lot 50 Parker Street is planned to be developed for a future church (place of worship) and community hall. The North Regional TAFE is located immediately west of the Parker Street and Kennedy Street intersection. Lot 2940 abutting Coppin Place is vacant with no known development plans.

3.5 Built Form Design Response

Noting its local context and physical setting, the design seeks to:

- provide residential scaled **short term and longer term accommodation** for construction, contractor, professional and key service workers in a comfortable, aesthetically diverse, low density and high quality landscaped setting.
- orient townhouses to Stanley Street and will **activate and integrate the site into the existing residential neighbourhood** to the east. Similarly, generous communal facilities are sited towards Kennedy Street, the site's public entrance, and adjacent to existing hardstand and egress and access points.
- facilitate **potential opportunity for community access** to the site including the communal facilities; Dining Hall and surrounding landscaped areas, the bus collection point which could host evening food trucks, convenience store in the Administration building, Gymnasium building.
- **balance community access and occupant safety and security** through careful landscape treatments, permeable fencing, security initiatives (CCTV, patrols, boom gates) covered in a future Operational Management Plan.
- **protect internal and external amenity** by programming land use into active and passive zones, ensuring a mix of active and passive landscaped areas, promoting separated pedestrian access, providing partially sheltered and shaded walkways and units, and screening and separating existing residential and proposed residential areas from 'back of house' and high traffic areas including car parking.
- **activate existing street frontages** with active uses, major openings, permeable and quality residential fencing and streetscape, boundary and verge planting.
- respond to the **iconic water tower**, which is often lit up in a colour display at night. The modular units are arranged in a radial pattern that provides sightlines to the water tower and helps to establish sense of place.
- address **local climate challenges**. The low density arrangement of units are interspersed with drainage swales that connect into a large centralised drainage basin. The units are connected to the communal facilities via a network of partially shaded and landscaped pathways. The modular units are generally north facing to optimise solar access and natural ventilation and screened to provide eastern and western shade. The townhouses have access to east and west facing balconies, providing opportunity to seek outdoor relief at different times of the day.
- integrate **sustainability initiatives**. The ultimate transition to permanent residential land use represents provides for an adaptive reuse land use strategy. Existing infrastructure is retained in the site programming including the existing slip lanes, crossover and location of hardstand on the Kennedy Street interface. Recycled materials, solar panels and lighting, optimised access to sunlight and natural ventilation and use of waterwise fittings, fixtures, irrigation and planting will help to reduce power and potable water use. The stormwater swales and basin, as part of an urban water management strategy, will manage wet season rainfall in accordance with the Town's requirements. The retention, where possible, and planting of new trees, shrubs and ground covers supports local biodiversity, provides comfort, visual relief and connection to nature and place.
- Overall, **146 car bays** are provided on site, with 30 bays directly accessible to the townhouses, private vehicle and visitor parking in the existing Kennedy Street setback, and service and maintenance parking to the rear of the Dining hall.

- A combination of private vehicles and buses will transport occupants to and from the development outside of local peak hour traffic periods. Access and egress is via two crossovers at the south-west of the site in historical locations and utilising the existing slip lanes and crossover. An internal one-way loop road, with traffic calming is proposed for townhouse parking as well as emergency vehicle access and security surveillance.

3.6 Land Use Approach

Development approval is sought for dual land use purposes; Workforce accommodation and Grouped dwelling. Approval for these land uses is sought in order to accommodate both short and longer term stays in the development.

The Workforce accommodation use is proposed over the entire development site for a limited 10 year period. The residential Grouped dwelling land use additionally applies to townhouse development.

The proposed land use arrangement will enable both the modular units and townhouses, together with the associated community facilities (Dining Hall, Administration, Recreation and Gymnasium Buildings and Laundries) to be used by occupants on a short term basis responding to the existing and ongoing demand for worker accommodation in Port Hedland.

The proposed Group dwelling land use is additionally proposed as a permanent land use over the townhouse component of the site.

In response to early stakeholder and community feedback, we understand there is an unmet need for affordable and accessible key service worker accommodation. The proposed Grouped dwelling land use will:

- Provide flexibility to accommodate workers as a more permanent place of residence (greater than three months) during the initial 10 year period when the site predominantly operates as a workers accommodation facility. The project is committed to ensuring a portion of the townhouses (indicatively equivalent to 6 rooms) are prioritised for key service workers, including for example education, childcare or health workers, at subsidised rates.
- Survive beyond the time-limited Workforce accommodation and therefore demonstrates the landowner's commitment to achieving permanent residential use on the site in line with the aspirations of the local planning framework. It is noted that the townhouses will be constructed as permanent built form designed to operate as a future survey strata subdivision scheme.
- Enable the site to respond and integrate with its residential neighbourhood surrounds, located to the north, east and south of the site.

At the conclusion of the temporary workforce accommodation period, it is intended that the subject site will transition to permanent residential development.

Other than the Gymnasium building, which is also constructed as permanent built form, the prefabricated modular units and communal facilities can be removed when the site transitions.

Further consideration of the proposed land use is provided at Section 7 of this report.

3.7 Future Transition

The proposed design has been carefully arranged to ensure the site can ultimately transition to permanent residential use at the conclusion of the Workforce accommodation use.

Some development elements including the Townhouses and the Gymnasium building are being designed and constructed with future permanent use in mind. The Townhouses have also been designed to comply with the Residential Design Codes (R-Codes) Volume 1 Part C R40 density requirements and are capable of future survey-strata subdivision with associated car parking and common property lots. Refer to Section 7 of this report for future discussion. The similar conversion of workforce accommodation into permanent residential via survey strata subdivision has been achieved at The Ranges in Karratha.

An indicative representation of the ultimate development of the site is provided in Figure 3 below, which includes the indicative future community hall and church development on Lot 50 Parker Street (to the west) and the continued green title subdivision scheme over Lot 2940.

Whilst the achievement of permanent residential development on the street block will be subject to future development and subdivision applications, Figure 3 demonstrates the proposed development, subject to this application, can be accommodated in the ultimate street block development scenario.

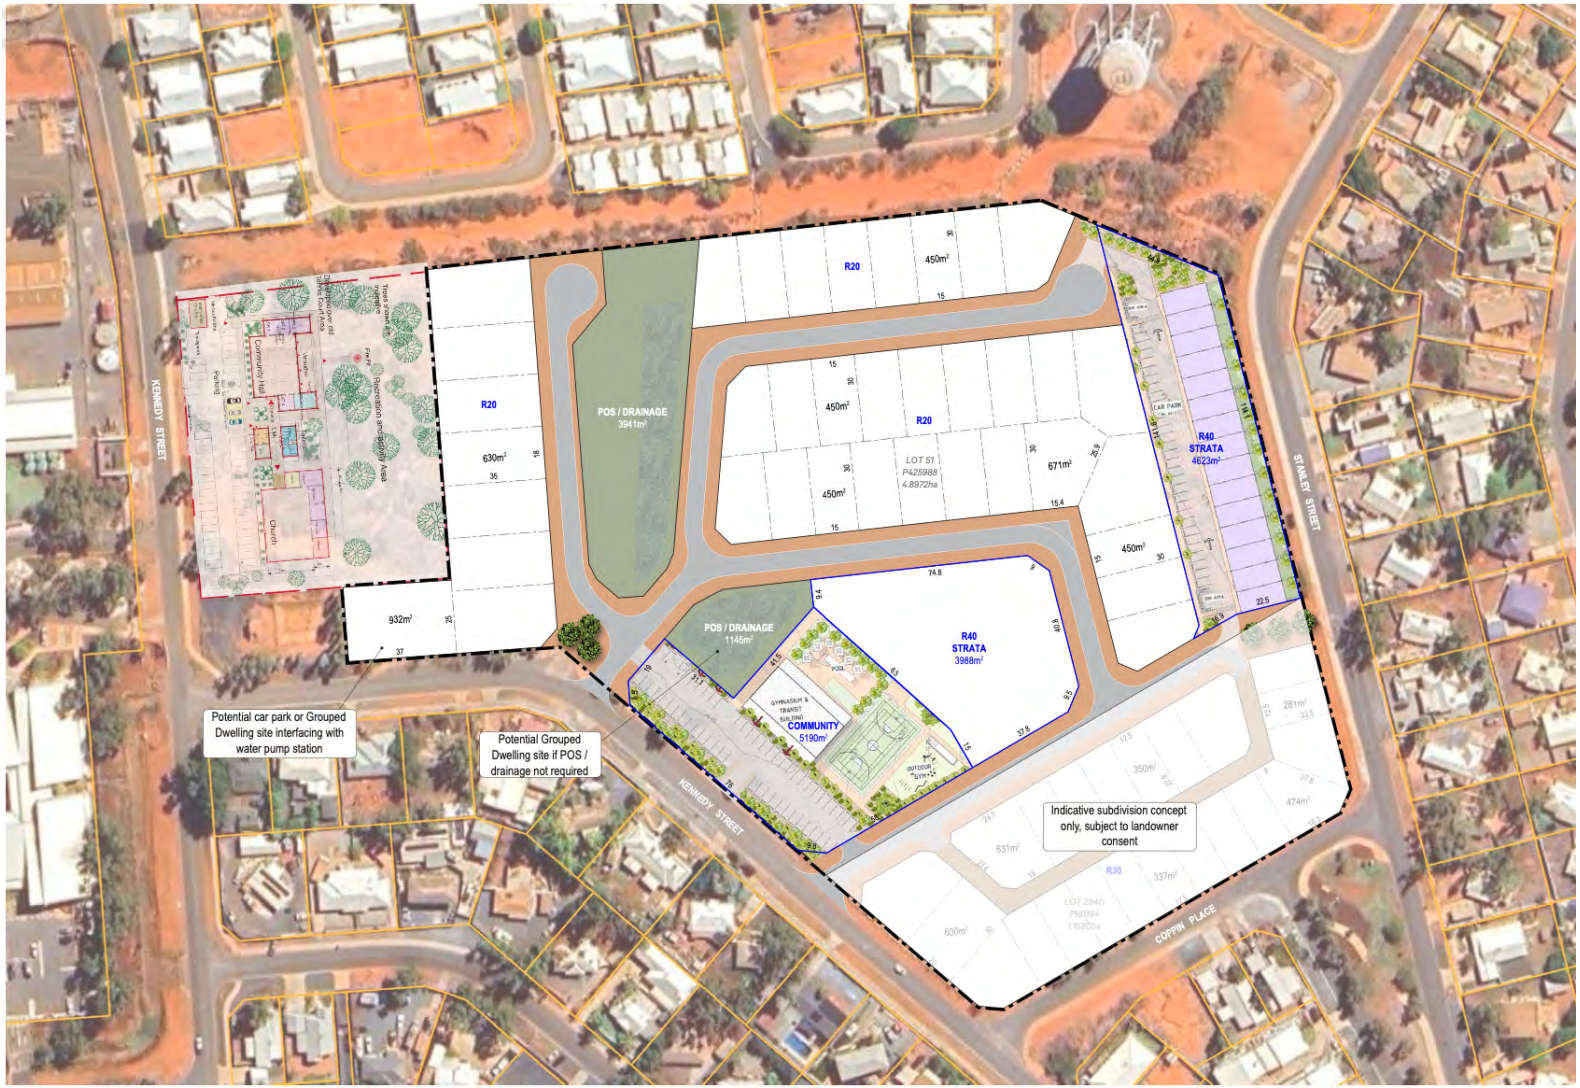

Figure 3 Future indicative development

4. Supporting Technical Considerations

The proposed development has been informed by a range of specialist technical reports, plans and studies. The specialist inputs are attached to this report and the key outcomes summarised below.

4.1 Market and Land Economics Analysis

A Market Context Statement has been prepared by Syme Marmion & Co and is attached as Appendix F. The evidence-based statement considers current residential property rental and sales trends in South Hedland as well as the overall demand for worker accommodation facilities in Port Hedland and the impact of unmet demand on the local housing stock.

The statement found:

- There is a relatively soft housing market in South Hedland and Port Hedland with low numbers of potential buyers, highlighted by the length of time rental and sale properties remain on the market and higher vacancy rates. Anecdotally, the Town granted five (5) building permits or new dwellings in 2024.
- Construction costs are high in Port Hedland, with a cost premium of between 60% and 100% on general construction costs in the south of WA. Construction of a basic dwelling in Port Hedland costs between $600,000 to $800,000 more, in addition to the land cost. Residential development costs in Port Hedland are well in excess of general market levels. Private sector residential projects for market sale are generally not viable.
- Port Hedland has a high proportion of FIFO workers in the workforce at 29%. This is a long term phenomenon and skews accommodation demand in favour of short term accommodation.
- FIFO workers are either directly employed by major resource companies like BHP or FMG or smaller business, government or NGOs. The large employers account for around 62% of the FIFO workforce and provide accommodation for workers in company owned housing or accommodation villages. The smaller business employers, government or NGOs account for around 38% of FIFO workers (1,200 workers) and do not provide their workers with accommodation. These workers must find accommodation in the open market.
- Worker accommodation fluctuates from a baseline of 3,000 FIFO beds. Only a minority measured in the low 100s is available for workers of the smaller business employers, government or NGOs.
- There is a sustained demand for short stay accommodation for business workers which include FIFO workers. Some 56% of business visitors stay for 4 to 7 days.
- Workers occupy a mix of privately rented residential dwellings (at least 4.5% of all private dwellings) or between 1/3 to 1/2 of the available hotel tourist accommodation for longer stay visitors.

- The accommodation offer in the SHRA development is targeted to these construction, service and contractor workers – workers employed by smaller business employers, government or NGOs. The project will help therefore to:
    - Reduce pressure on private sector houses routinely occupied by FIFO workers which will return to the long-term residential market.
    - Reduce barriers preventing the expansion of the tourism industry by providing alternative accommodation to FIFO workers currently in tourist-related accommodation.
    - Expand accommodation for the displaced workforce not covered by arrangements with major resource companies.
    - Contribute to a more diverse permanent long-term residential offering through the provision of 15 townhouses.

A number of letters of support for the proposed development have been provided by smaller businesses in Port Hedland highlighting the need for more worker accommodation and benefits to business in reducing their operational costs.

Refer Appendix F – Market Context Statement and Letters of support

4.2 Transport Impact Statement

A Transport Impact Statement (TIS) has been prepared by Flyt and is attached as Appendix G.

The development will generate a maximum of 78 peak hour vehicle trips in the development peak hour. In accordance with the *Transport Impact Assessment Guidelines* (WAPC, 2016), the development will have a moderate impact on the surrounding transport network, equal to 10-100 vehicle trips in the development's peak hour. Therefore, a TIS is required to support the application.

The TIS does not identify any transport related concerns arising from the proposed development. Of note, the TIS makes the following conclusions:

Parking demand and assumptions

- A total of 297 workers will be based on-site at any one time. It is anticipated that the 252 accommodation units (including 4 universal access rooms) will be occupied by fly in fly out (FIFO) or drive in drive out (DIDO) shift workers. DIDO workers are assumed to drive private vehicles to their work places whilst only some FIFO workers will have access to private vehicle access.
- It is assumed that half of the accommodation units will be occupied by DIDO and FIFO workers with private vehicle access (126 workers) and that 60% of workers with private light vehicle access will share two people to a vehicle (76 workers/38 vehicles) and 40% will travel alone (50 vehicles/50 workers). On these assumptions, 88 light vehicle car bays are required and 98 bays are provided onsite in the Kennedy Street setback.
- The occupants of the townhouses are expected to have access to a light vehicle and that 50% will share 2 people to a vehicle and 50% will travel alone. On this assumption, the townhouses generate a demand for 34 light vehicles. Overall, 40 car bays are provided for the townhouses; 30 car bays adjacent to the townhouses

and a further 10 in the Kennedy Street setback located together with the FIFO and DIDO parking bays.

- A total of 25 staff will be required to operate the development, of which approx. 52% (13 staff) are assumed to live locally and travel to the development by light vehicle. The remaining 48% (12 staff) will travel by the development's bus (12 seater). Some 18 car bays are provided at the rear of the Dining Hall as staff and service vehicle parking.

Trip Generation and Traffic Network Impact

- Main Roads WA Traffic Map includes 2022/23 traffic count data for a data collection site along Parker Street to the south of North Circular Road approximately 550m to the northwest of the subject site.

  This is the most direct route to the strategic road network in Port Hedland and carries an average two-way daily traffic of 2,200 vehicles with even northbound (1,100) and southbound (1,100). Average two-way daily traffic includes 8.6% truck movements.

  During the development's peak traffic periods the development will conservatively add approx. 300 vehicles to this intersection each day. This represents 12% of vehicle movements through the intersection.

  Together with the 78 additional trips generated by the development, the scale of impact associated with the proposed development is negligible and would have no material impact on the existing road network.

- Vehicle movements into and out of the site will occur between 0500-0800 (primarily outbound vehicle movements) and 1600-1900 (primarily inbound vehicle movements). Movements will occur outside of the busy school/TAFE operating hours periods which typically occur between 0800-1500.

- If required, the operators of the proposed development would be pleased to work with the Town of Port Hedland to agree to an operational traffic management plan for even traffic disbursement onto local surrounding roads.

Intersection Safety

- In the five-year period ending December 2024 there were 15 reported crashes on the road network surrounding the subject site. Two of these required hospitalisation but both incidents occurred along North Circular Road.

- There have been no reported crashes at the intersection of Parker Street/Kennedy Street over the five-year period ending December 2024 which suggests this intersection is generally operating safely.

Site Egress and Access Arrangements

- Vehicle access and egress is proposed at two crossovers on Kennedy Street. One site crossover is retained and a new crossover is proposed approximately 90m to the east of the Parker Street/Kennedy Street intersection. No vehicle access is proposed along the Stanley Street frontage of the site, to mitigate any impact of site traffic on surrounding local residential streets. New pedestrian footpaths will provide connection from the development to the existing Stanley St footpath.

- Occupants of the accommodation units will access and egress the site via the two Kennedy Street crossovers. Vehicles will reverse park in the Kennedy Street setback car parking area to ensure the vehicles exit in forward gear and do not

create noise disturbance during early morning peak. Townhouse occupants will enter from Kennedy Street and access Townhouse parking via the one-way ring road and automated access gate via access control cars /fob keys. Townhouse occupants will exit the site via the ring road and second automated access gate adjacent to the Dining Hall which will automatically open for exiting vehicles.

Figure 4 Accommodation units access and egress

- Townhouse occupants will enter from Kennedy Street and access townhouse parking via the one-way ring road and automated access gate via access control cars /fob keys. Townhouse occupants will exit the site via the ring road and second automated access gate adjacent to the Dining Hall which will automatically open for exiting vehicles.

Figure 5 Townhouses access and egress

- Site operators and staff will access the site and staff parking bays via a two-way roadway along the western boundary of the development adjacent to the Dining Hall Building and the new Kennedy Street crossover. The automated access gate will be accessible by an access control card/fob and will automatically open on exit.

Figure 6 Service operator and staff access and egress

- Buses will enter the site via the new Kennedy Street crossover, pick up or drop off occupants and then exit the site via the retained existing crossover. All movements will be in forward gear.

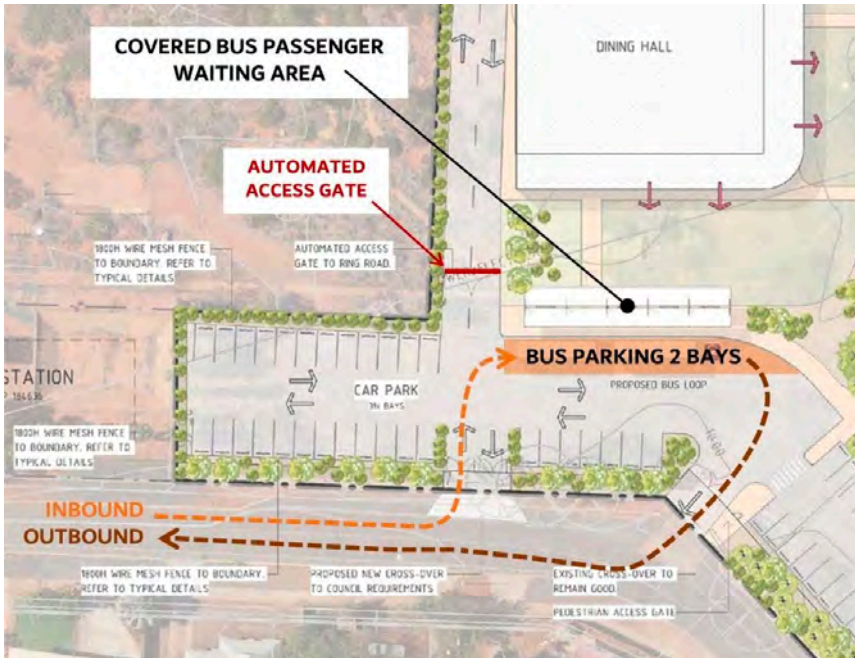

Figure 7 Bus access and egress

- Delivery, maintenance and service vehicles will access the site and service yard via the new crossover on Kennedy Street and the two-way roadway via an Automated Access Gate. The service yard provides delivery, maintenance and service vehicle

access to the loading dock for the back of house area for the Dining Hall building and the Maintenance and Linen Shed. Regular service and maintenance vehicles will be provided with an access control card/fob to open the Automated access gate, with the gate automatically opening for exiting vehicles. Other providers servicing the site will use an intercom adjacent to the Automated Access Gate to call through to the security office in the Administration Building to open the Automated Access Gate. Service vehicles will enter the site several times during the day to access the loading dock for the Dining Hall and the Maintenance and Linen Shed.

Figure 8 Delivery and service vehicle access and egress

- Two (2) types of waste collection vehicles will service the development:
    - Residential - waste collection vehicles will service the two wheely bin areas adjacent to the townhouses.
    - Commercial - waste collection vehicles will service the large waste bins adjacent to the Dining Hall.
- Private waste collection services will collect waste generated from the kitchen and maintenance activities via the service yard and townhouse waste from the townhouses bin store. Service vehicles will also access the rear of the Dining Hall to service (pump out) the grease trap.

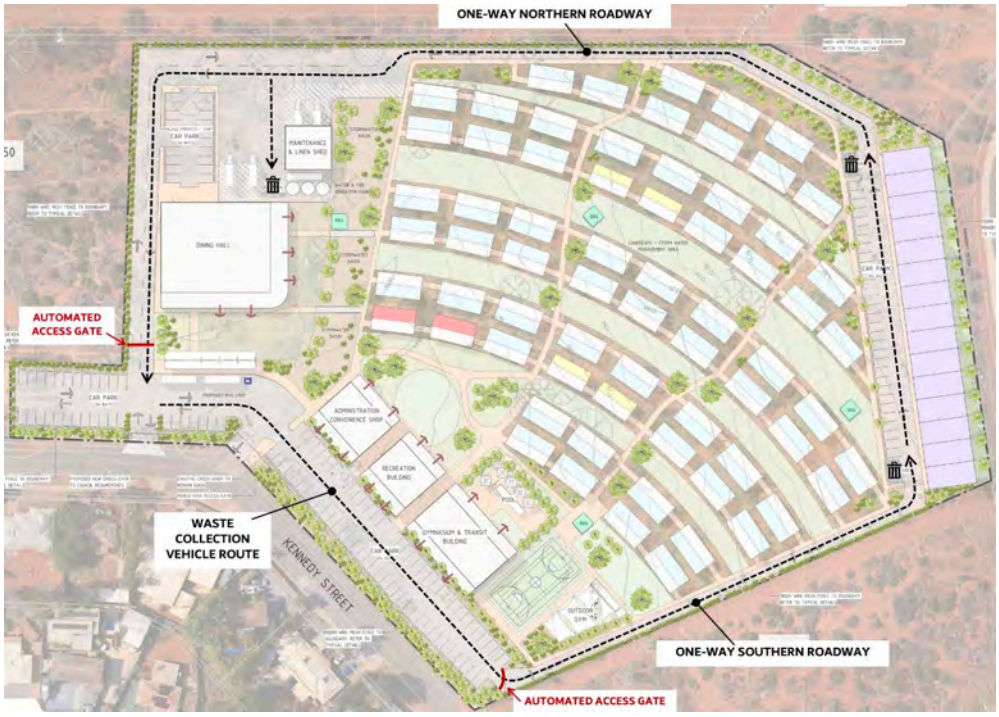

Figure 9 Waste access and egress

- The TIS includes a swept path analysis for service vehicles: a 19m semi-trailer accessing the site and the loading dock for the Dining Hall, a 8.8m medium rigid vehicle accessing the Maintenance and Linen Shed Building and a 10.3m waste collection vehicle.

Public Transport

- The subject site is conveniently located for bus services between the site and South Hedland Shopping Centre. Bus stops located on Parker Street adjacent to the North Regional TAFE Pundulmurra South Hedland Campus, are a 180m walk from the subject site. The Parker Street bus stops are served by Bus Route 870 whilst bus routes 871 and 872 operate around South Hedland and along Stanley Street.

Pedestrian and Cycle Access

- Within a 20 minute walk, the development occupants can access South Hedland Shopping Centre, Wanangkura Stadium and the adjacent Kevin Scott Oval.
- Within a 10 minute ride, the development occupants can access all destinations across South Hedland to the north of Murdoch Drive – including Hedland Health Campus, South Hedland Shopping Centre, Wanangkura Stadium and adjacent Kevin Scott Oval.
- The development supports alternative transport modes through the provision of:
    - 10 x U-rail bike racks which will be installed adjacent to the Dining Hall (including provision of battery charging for e-bikes and e-scooters)
    - EOT facilities accessible to the operation staff in the Gymnasium building.
    - Townhouse storerooms which can accommodate bicycles
    - Potential use of small fleet of bicycles available for use by workers staying in accommodation units or townhouses to access locations around South

Hedland in their leisure time. Fleet bikes would be stored in the storage unit/sea container adjacent to the outdoor gym.

Refer Appendix G – Transport Impact Statement

4.3 Social Impact Assessment

A Social Impact Assessment (SIA) and associated Management Plan has been prepared by Circle Advisory Pty Ltd in order to support the proposed development and is attached as Appendix H. The SIA responds to the Town's local planning policy framework including *Local Planning Policy 06 – Social Impact Assessment* (LPP/06). The SIA analyses the social impacts that might arise from the development and presents a management plan which outlines the measures to be adopted by the development to mitigate risks and optimise opportunities.

An extract of the SIA Management Plan is provided below:

Table 4 Social Impact Management Plan

	Social Impact Management Plan	Management Strategy
1	Executive Management Leadership and Oversight	Grounded to have the requisite policy, leadership, accountability, responsibility, systems, expertise and resources in place to manage the social and economic impacts associated with the SHRA development.
2	Policy and procedural review.	Review of existing Grounded procedures: • Aboriginal Engagement Policy and Strategy • Integrated Management System Development of new or revision of existing policies and procedures sufficient for the effective implementation of the SIMP.
3	Local Communications Strategy	Within the Construction Management Plan and Operational Management Plan, consider the preparation of a communication strategy to guide ongoing engagement with local stakeholders. The communication strategy may make provision for regular updates about the development and include: • the use of Grounded's existing social media; • the establishment of a 1800 enquiry line and webpage based email enquiry line; and • the use of local print and social media where required.
4	The provision of dedicated non-resource sector short- and long-term accommodation.	Contemplation of prioritising a proportion of the accommodation units and townhouses at discounted rates for essential Service Workers (non-resource sector) workers including the NFP sector, as part of Grounded's social investment program.

5	A medium to long term transition to permanent, open market, residential accommodation.	Preparation of a staging plan or transitional strategy to guide the transition from TWA/STA to permanent residential development including timeframes.
6	Kariyarra Relationship.	Engagement with KAC in recognition of Kariyarra people as the Traditional Aboriginal Owners of the land on which South Hedland is located and to create opportunities for Kariyarra's socio-economic and cultural participation in the development.
7	Village Security Strategy	Within the Construction Management Plan and Operational Management Plan consider the preparation of a Village Security Strategy to optimise social integration with the community of South Hedland while effectively defending against opportunistic crimes against property.

8	Community Engagement Strategy	Within the Operational Management Plan, consider the preparation and implementation of a Community Engagement strategy that considers opportunities for:
		• Allows for potential community access to:
		  • the Dining Hall and landscaped area;
		  • Convenience Store;
		  • other spaces as agreed from time to time.
		• Integrates with and contributing to local community events;
		• Allows for appropriate use of local social and health infrastructure by development occupants; and,
		• Considerationof an annual social investment component, at Grounded's discretion, that focusses on the social footprint of the development and the effective implementation of the SIMP.

9	Local Economic Participation Strategy	Within the Construction Management Plan and Operational Management Plan, consider the preparation of a Local Economic Participation Strategy that incorporates the following elements: • a Local Training to Employment Plan (LETP) • a Local Industry Participation Plan (LIPP)
10	Traffic Management Plan (TMP)	The development of a TMP, in accordance with an expected development condition if approved, that: • minimises construction and operations traffic on Kennedy and

		Parker Streets between the hours of 0730 – 0830hrs and 1430 – 1530hrs; and • minimises construction and operations traffic on Coppin Place and Stanley Street at all times.
11	Monitoring and Evaluation	Within the Operational Management Plan, consider the establishment of a monitoring and evaluation plan for the SIMP that provides metrics that are useful to both Grounded and the Town and that allows for adaptive management of impact strategies as the development progresses.

Refer Appendix H – Social Impact Assessment and Management Plan

4.4 Engineering Design Report

An Engineering Design Report has been prepared by Forth Consulting and is attached as Appendix I.

The report provides a high level engineering assessment and concept infrastructure assessment for the proposed development. The report confirms the following key points:

- There is minimal existing electrical infrastructure on the site and no existing electrical or communications infrastructure that can reused.
- HV underground cabling is located along Kennedy Street, Cobbin Place and Stanley Street. There are 2-off kiosk type substations located on the corners of Lot 2940.
- Assuming a typical load allocation per person of 4kVA, the After Diversified Max Demand (ADMD) for the accommodation units is 1008kVA and 110kVA for the townhouse; 1118kVA overall.
- A new Horizon Power sole use substation will be provided on the subject site along Kennedy Street, near the existing pump station lot. The substation will be an external kiosk type district substation. The site main switchboard will be mounted adjacent to the substation and will contain one authority meter. The entire site will be metered at this point via the authority.
- A main communications hub/room will be established within the Administration building, along Kennedy Street. The hub will contain the site carrier transition infrastructure, customer owned racks and ICT head-end.
- External lighting shall be provided by a combination of the following:
    - Building mounted LED bulkhead type luminaires.
    - Bollard type solar powered luminaires for selected paths.
    - Pole mounted luminaires with LED lamp sources based on solar powered poles for paths, vehicular access and car parks.
- The bulkhead building mounted luminaires shall be wired from the nearest logical DB and be provided with automatic lighting control via a time clock and PE cell. The use of solar powered pole lights will eliminate the need for any cabling and

conduits. The final arrangement and combination of solar bollards and pole lights shall depend on the final design and aesthetic intentions throughout the village.

- Fire detection and alarm systems shall be provided throughout the development in accordance with the applicable NCC and Australian Standard requirements.
- All the other buildings such as the Dining Hall, Maintenance Shed, Recreation building, Gymnasium building, etc, will contain AS1670 fire detection and alarm systems, complete with detectors and a sub-fire indicator panel (SIP) connecting to the respective communications racks in each of these buildings and a central main fire indicator panel (FIP) in the Administration building.
- The domestic cold-water supply to the site is currently connected to the Kennedy Street asbestos cement Water Corporation Main. The supply main in Kennedy Street is positioned on the southern side of the street. The South Hedland water supply is fed from the 2273kL elevated water tank located directly to the north of the project site. The tank water level is 46.2, which is approximately 36m above the site FGL. As such, it's anticipated that the water supply main will have in the vicinity of 300kPa.
- The gravity sewer connection to the site is 225dia PVC and has a capacity of 3250 Fixture units.
- The incoming water supply will feed into a domestic water storage tank. A domestic water storage tank capable of holding 24 hours of water demand is recommended. The anticipated daily demand is 89kL. This tank will act as a buffer and cater for peak demand, given the supply agreement with the supply Authority has a limit of 100kL per day.
- A separate storage tank is to be provided which can be filled during low water consumption periods (overnight and midday), as this will ensure an increased Authority connection can be avoided. Allowance for a 50kL irrigation water tank is recommended to provide storage to suit the 1kL daily draw-off allowance for irrigation purposes.
- Water supply to the townhouses can be provided from the Stanley St water main (Refer to Appendix C). Each lot can be supplied with a 20mm domestic water supply connection.The domestic hot water system shall consist of electric storage water heaters (one per 4x module) to the accommodation buildings, a combination of electric instantaneous water heaters and heavy-duty electric storage water heaters to the central facilities. The function of a hot water supply system is to provide at each hot water tap an adequate supply of water, at the required temperature, without undue delays, at all times and at satisfactory pressures, while minimising the possibility of waste of heat and water.The stormwater drainage system shall discharge freely from roofs to the surface water drainage system provided as part of the civil design. No allowance to be made for gutters and downpipes to buildings.
- The sewer infrastructure servicing the site is located to the south-west corner of the property on Kennedy Street, adjacent to the Water Corporation sewer pump station site which previously serviced the BHP Pundulmurra Accommodation Village.
- The site has a 4m east to west fall, which enables the entire site to achieve connection to the Authority sewer connection via gravity. The property sewer drainage system must be sized such that it has sufficient capacity to safely dispose of all building fixture waste discharging into the property sewer drainage system.

The sewer connection serving the site is appropriately sized to cater for the proposed site.

- There is limited sanitary drainage in the vicinity of the Stanley St facing townhouses. As such a sewer main extension would be required to service the townhouse sites. The anticipated sewer extension length is approximately 240m.
- Connection to the existing 100Ø Authority water supply located in Kennedy Street complete with inline above ground testable double check valve assembly for the fire water system is proposed. Alternatively, full water storage can be provided for 288kL of water storage across 2x 144kL tanks which isn't reliant on inflow during a fire event, and a dedicated diesel electric fire pump set located within a weatherproof enclosure.

Refer Appendix I – Engineering Design Report

4.5 Civil Design Concept

A preliminary civil design concept has been prepared by RSA Civil and Structural Consulting Engineers and is also attached as Appendix I. The civil stormwater plan confirms the extent of cut and fill required across the site and the proposed finished floor levels, which range from 10.5m in the west to 14.75m in the east and respond the existing slight slope.

Having regard to the surveyed levels, the amount of cut and fill varies across the site; fill concentrated in the south-west and centre of the site and cut concentrated in the north-east. The amount of fill proposed varies up to 1.5m in the centre whilst up to approximately 1.3m is proposed to be cut in the north-east of the site.

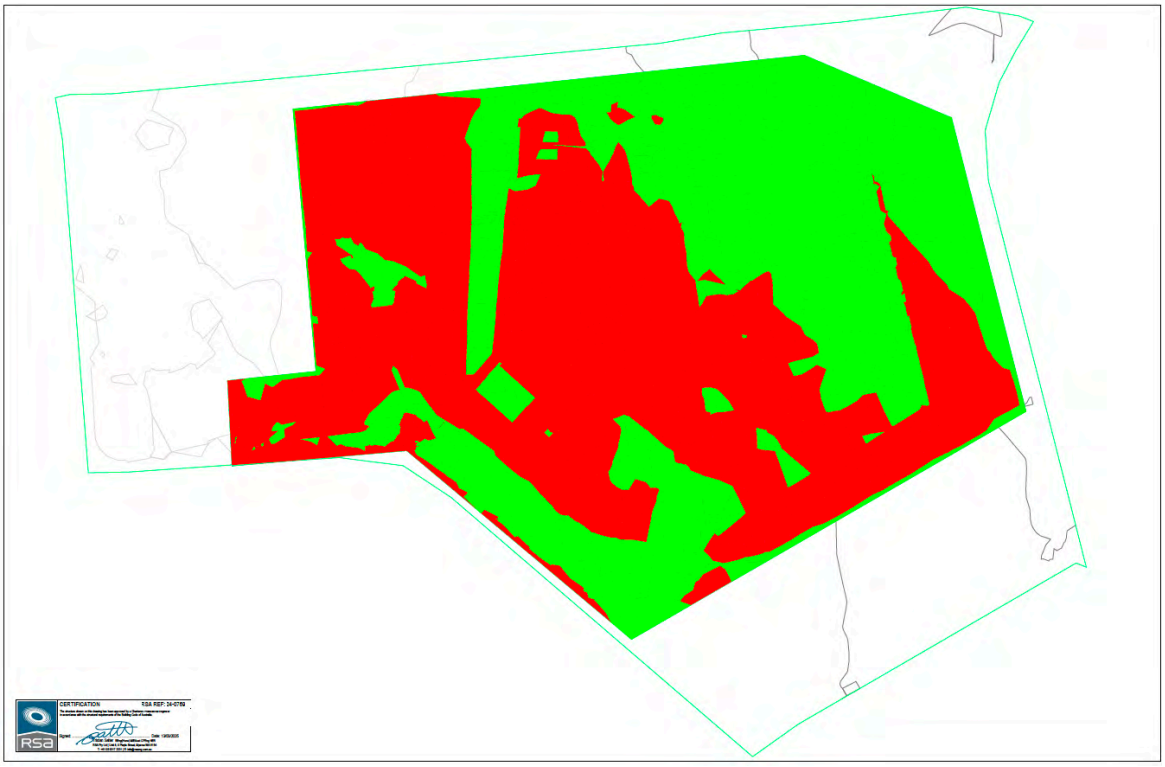

Figure 10 Indicative Cut and fill plan

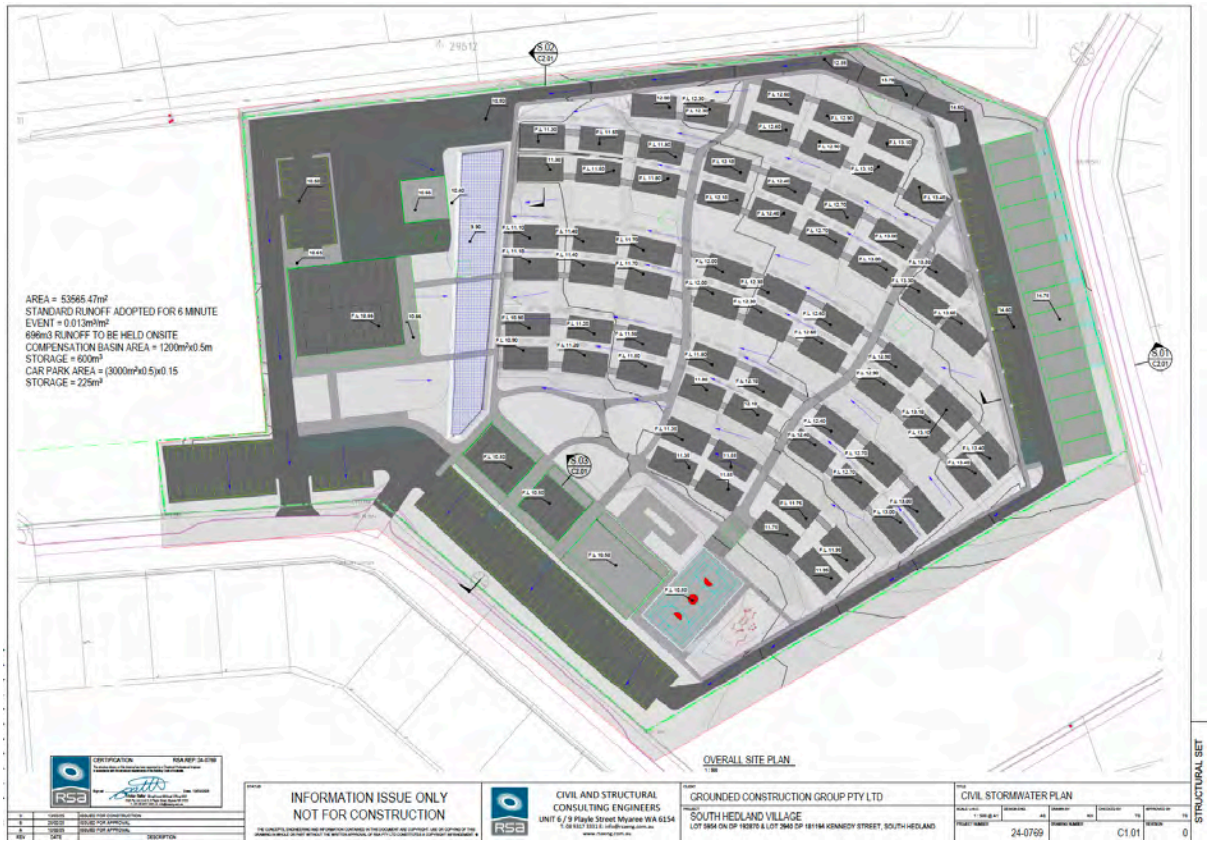

Figure 11 Indicative Civil Stormwater Plan with finished floor levels

Refer Appendix I – Civil Design Concept

4.6 Urban Water Management Plan

A preliminary Urban Water Management Plan (UWMP) has been prepared by Pentium Water Pty Ltd to provide the overall stormwater management strategy for the development. A final UWMP will be prepared at the detailed design phase to document the civil and engineering design for stormwater management infrastructure across the site.

The UWMP has been prepared in accordance with the Better Urban Water Management principles and water sensitive urban design (WSUD). The following design criteria are adopted in the preliminary drainage design and drainage strategy:

- Retain/detain on-site stormwater runoff for 1 in 5 year (20% AEP) - 6 minute rainfall event (up to 15 mm rainfall) from impervious areas.
- Construct sufficient infrastructure to manage runoff and discharge stormwater to designated drainage areas or 'compounds'. Scour protection at culvert, pipe system and outlets shall be constructed in accordance with Town of Port Hedland Stormwater Disposal Specifications.
- Provide a detail design showing flow levels, peak flow rates and flood storage volumes for 1 in 100 year (1%AEP) event.
- Mitigate breeding of disease vector and nuisance insects by designing and maintaining stormwater management systems to contain no standing water for more than 72 hours.
- Provide habitable floor levels above 100-year (1% AEP) flood level.

It is anticipated that the above will be achieved through a combination of conveyance swales, drainage basin and a boundary swale along Kennedy Street. The site grading will result in two stormwater catchments with runoff managed in the two drainage areas: the central basin, and the Kennedy Street boundary swale.

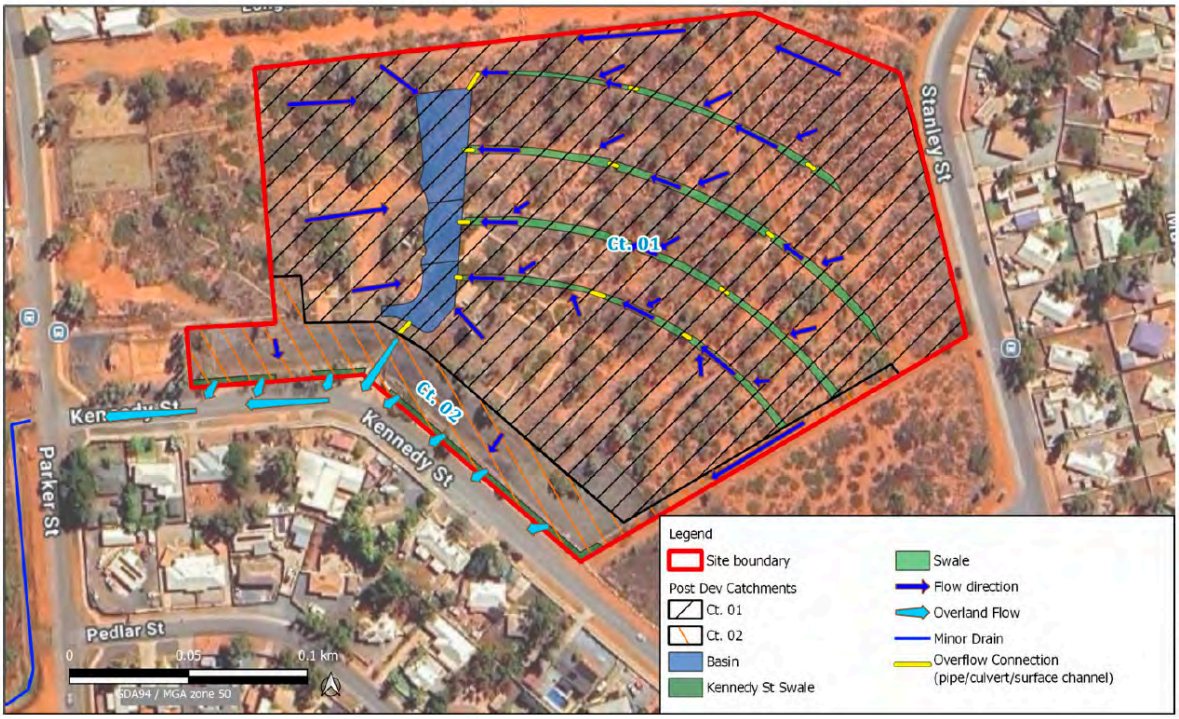

Figure 12 Stormwater Management Plan

Construction work undertaken during development will be controlled and monitored by the proponent/development manager to ensure that the specified engineering drawings are followed, and the drainage system is not compromised and continues to function as intended. In addition, management and control measures to be implemented during construction works include:

- Waste management measures will be put in place to prevent litter and construction wastes from collecting in the drainage system and polluting downstream receiving environments.
- Temporary fencing will be used during the earthworks/construction phase to prevent unauthorised access to the site.

Erosion and sediment control will be undertaken during construction to maintain the integrity of the drainage network, including:

- The civil contractor will use groundwater and/or polymer dust suppression material for dust suppression and stabilisation of site area during construction work.
- Placement of silt fencing where required adjacent to drains, waterways, etc.
- Further details will be provided by the civil contractor via a Construction and Environmental Management Plan, if relevant.

Refer Appendix J – Preliminary Urban Water Management Plan

4.7 Sustainability Design Report

A Sustainable Design Report has been prepared by Emergen to identify the key principles sustainable objectives and targets for the site. The report highlights the Project's commitment to sustainability initiatives around the critical areas of energy conservation, water conservation, waste reduction.

The proposed development aims to adopt the following sustainable design outcomes – refer to Figure 13.

In relation to *daylight,* a preliminary daylight modelling using IES software was prepared at finished floor level, based on the CIE standard overcast sky. The analysis focuses on primary spaces (areas that are regularly occupied).

To meet high daylighting standards, industry best practice typically requires that at least 60% of the combined living and bedroom area in each unit meets the daylight requirements. Additionally, daylight levels must be present in at least 20% of the area of each bedroom and living area. These thresholds align with commonly accepted standards for daylighting compliance

In relation to *sunlight and shading*, shading elements have been strategically designed to minimise extended solar exposure during summer months yet maximise solar gains in winter months. During the Summer months each window, receives approximately 1 to 5 hours of daylight over the course of the day, striking a balance between harnessing natural light and mitigating excessive sunlight exposure. Occupants will generally not occupy the development between 6:00 am and 6:00 pm. During these hours, only operational staff—such as kitchen, administration, maintenance, and groundskeeping personnel—will be present on-site. However, the assessment is based on the NCC 2022 occupancy profiles, which express occupancy as a percentage of the maximum number of people that can be accommodated in the building. This approach ensures compliance with the NCC's energy efficiency requirements.

Refer Appendix K – Sustainability Design Report

DESCRIPTION	GOAL	SUSTAINABILITY COMMITMENTS
CLEAR AIR	Improve indoor environment quality and health and wellbeing of occupants.	Outdoor air provided to primary areas at a rate at least **50%** greater than minimum in AS 1668.2:2012. *(TBC based on mechanical consultant).*
LIGHT QUALITY		Above **40%** of the regularly occupied areas have high level of daylight (above 160 Lux).
EXPOSURE TO TOXINS		The building's paints adhesives and sealants are low in TVOC or non-toxic. The building's engineered wood products are low in TVOC or non-toxic. Occupants are not exposed to banned or highly toxic materials in the building.
NATURAL VENTILATION	Increase Fresh Air	Natural ventilation will be provided to all buildings through openable windows, with mechanical systems added where required. *(mechanical consultant to advice).*
HEAT RESILIENCE	Reduce impacts of long-term performance.	Light Roof Colour (3-year SRI ≥ 0.64)
ENERGY USE	Reduce emissions and water use.	JV3 Pathway - A minimum of **10%** offset in operational energy usage pathway NatHERS Pathway - All dwellings exceed the minimum NatHERS energy efficiency requirement by 0.5 stars, based on the NCC 2022
		Future provision for solar PV array to supply renewable energy on the roof of Dry & Wet Mess and Administration, recreation and gymnasium building to offset AC consumption
WATER USE		High WELS Ratings (these equal to above **30%** reduction in potable water). Water Sensitive Urban Design, drip irrigation.
LIGHTING USE		**20%** reduction in lighting power when compared to NCC DTS.
MOVEMENT AND PLACE	Low carbon options.	Future provision for 2 EV Charging Bays. Provision for Bike Storage racks. Provision for Public Transport Loop and available public transport within 100m of the site.

Figure 13 Sustainability Commitments

5. Subject Site and Surrounds

5.1 Subject Site Details

The subject site occupies a total land area of 4.89 hectares on Lot 51 on Plan 425988 in South Hedland. SHRA Pty Ltd purchased the site in 2024. The property details are listed in Table 4 and a copy of the current Certificate of Title is provided at Appendix A.

Refer to Appendix A – Certificate of Title

The vacant site contains some residual hardstand and scattered trees and scrub which is in a degraded condition and grew back after the BHP Pundulmurra Accommodation Village was demobilised (refer to Figure 14). The site falls 4m east to west.

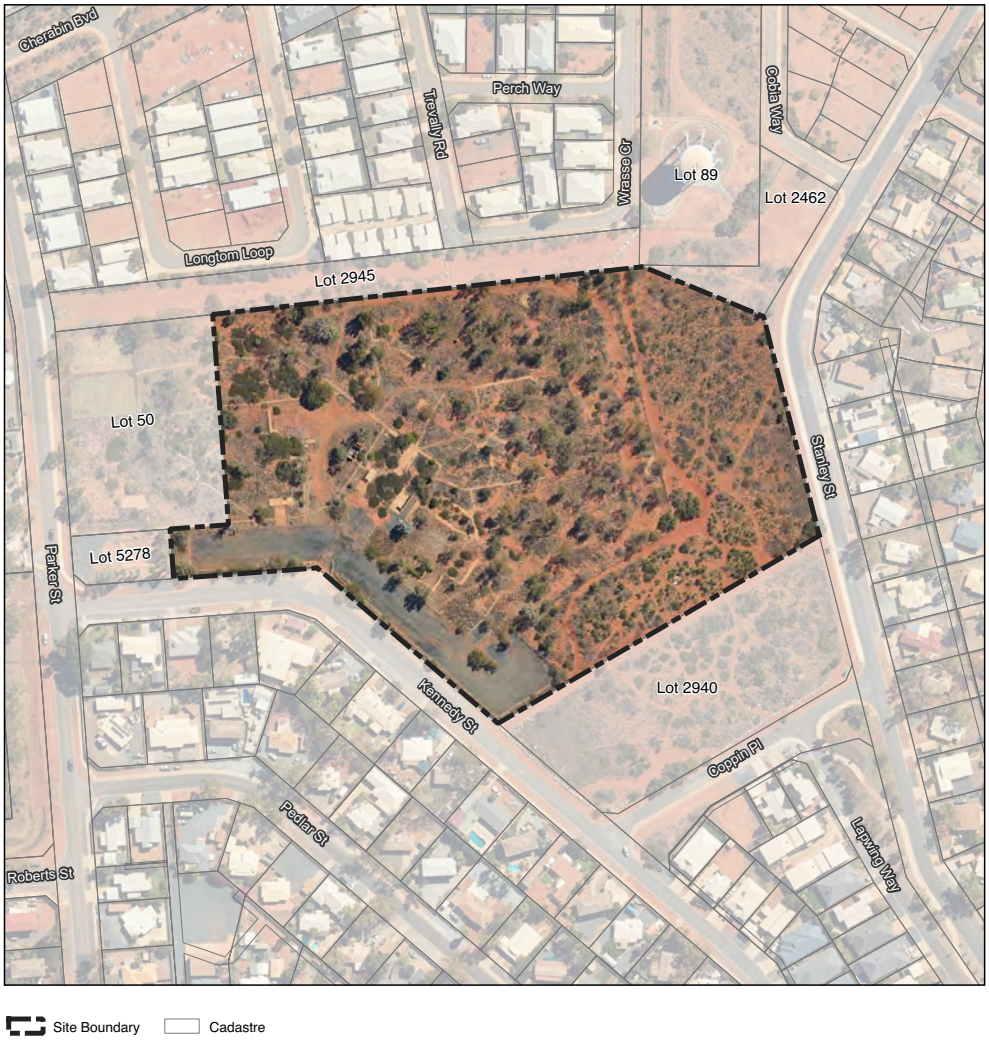

Figure 14 Subject Site Aerial Imagery

Table 5 Property Details

Lot No.	Volume/Folio	Plan	Area	Registered Proprietor
51	4055/771	425988	48,972m2	SHRA PTY LTD

5.2 Site Location and Surrounds

The subject site is located in South Hedland, north of the South Hedland town centre and proximate to a range of community services include the South Hedland Primary School, Hedland High School, North Regional TAFE Pundulmurra Campus, Wanangkura Stadium and nearby open spaces Shay Gap Memorial Park. There are several existing short stay and tourist accommodation facilities nearby including Club Hamilton Motel, ESS Gateway, Blackrock Tourist Park and Osprey Village.

The 3500m^2 Hedland Village Shopping Centre development was recently approved by the Regional DAP on Hamilton Road opposite Wanangkura Stadium in March 2025. The development will include a Good Grocer IGA supermarket, a fuel/convenience store, and other retail and service tenants. More broadly, South Hedland has well serviced by community infrastructure, which includes the Hedland Health Campus, Aquatic Centre, JD Hardie Youth & Community Hub and Matt Dann Theatre and Cinema.

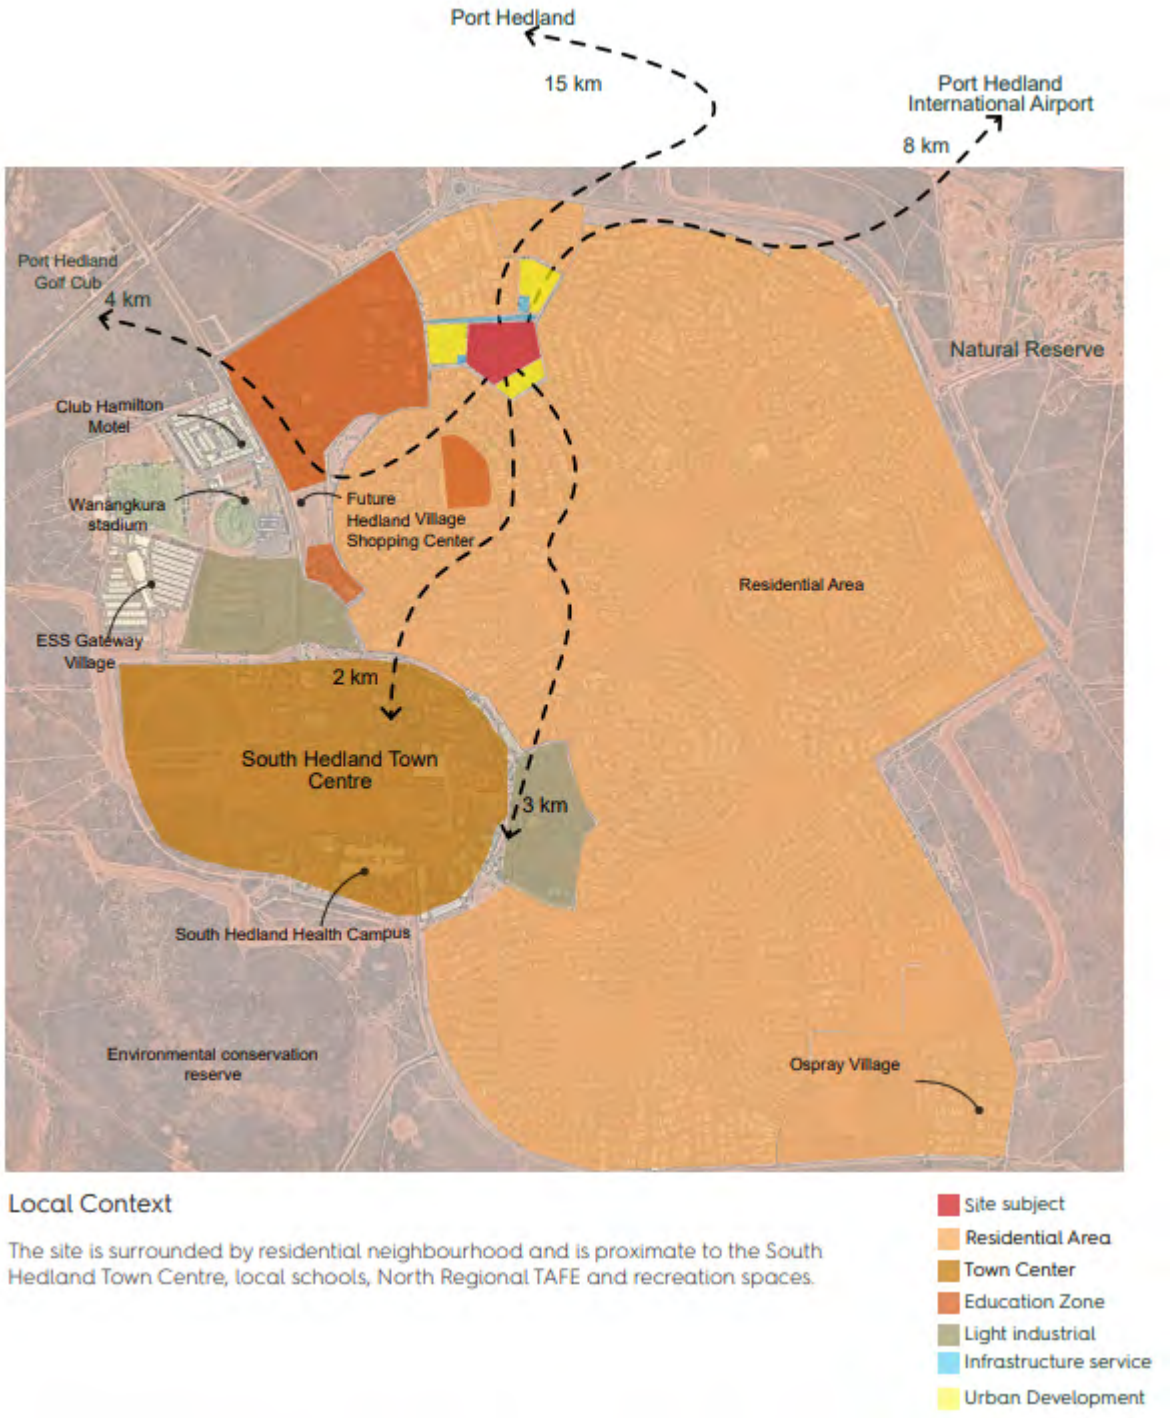

Figure 15 South Hedland Local Context

Residential development with varying densities (R20-R50) surrounds the subject site to the north, east and south. The North Regional TAFE Pundulmurra (South Hedland) Campus is located to the west of the Parker Street interfacing with Lot 50 which screens the subject site from the western public realm.

The immediate interfaces to the subject site include:

- North: Lots 2945, 89 and 2462 containing State owned land managed by the Water Corporation. This land contains shallow water infrastructure which is

intended to be upgraded, as well as the South Hedland Water Tower, a key landmark and icon within the local area.

This Water Corporation managed land separates the site from the former Cedar Woods residential development 'Elements Estate' further north of the subject site.

- **West:** Lot 50 owned by Seventh Day Adventist Church. This land has been recently earmarked for the development of a church (place of worship) and community hall.
- **South:** Lot 2940 owned by Horizon Power. It is understood there are no immediate development plans for this parcel of land.
- **South-West:** Lot 5278 containing State owned land managed the Water Corporation. This land includes a pump station.

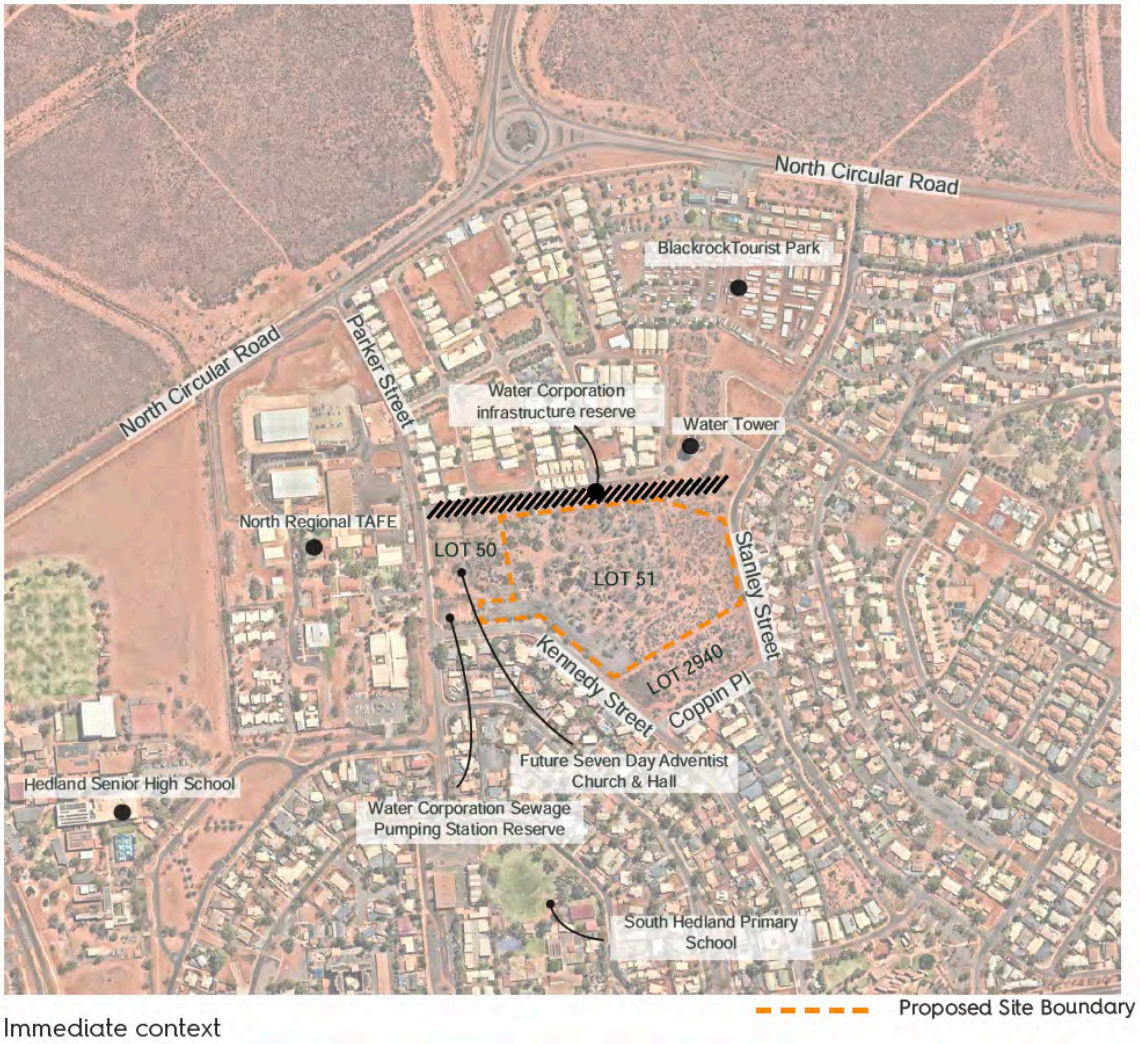

Figure 16 South Hedland Local Context

The surrounding street network includes Parker Street, Kennedy Street, Coppin Place and Stanley Street with relatively direct access to Port Hedland along North Circular Road via Parker Street. The subject site is largely 'land locked' with direct street access limited to a 193m frontage to Kennedy Street and a 114m frontage to Stanley Street.

5.3 Previous Land Use

Lot 51 was previously occupied by the 'BHP Pundulmurra Accommodation Village' between the 1990s and 2015. The village contained 184 accommodation units, central facilities, administration buildings, sport facilities and supporting infrastructure. The BHP Pundulmurra Accommodation Village was sited over the western portion of the site, noting that a large portion to the east was cleared. Refer to Figure 17.

The village was demobilised by 2015. Some features of the village still remain on site, including the hardstand, an existing crossover and a slip lanes on the western portion of the site adjacent to Kennedy Street. Refer to Figures 18 to 21.

Figure 17 Former BHP Pundulmurra Accommodation Village (circa 2004)

Figure 18 Former BHP Pundulmurra Accommodation Village (Kennedy Street western end, circa 2008)

Figure 19 Former BHP Pundulmurra Accommodation Camp (Kennedy Street / Stanley Street intersection, circa 2008)

Figure 20 Kennedy Street retained crossover

Figure 21 Kennedy Street retained hardstand

Following the demolition of the village and the ceasing of operations by the Department of Training and Workforce, the State Government determined that the subject site should be disposed on the market for an appropriate sequential redevelopment.

5.4 Heritage and Environmental Considerations

5.4.1 Aboriginal and European Heritage

A review of the Department of Planning, Lands and Heritage's (DPLH) Aboriginal Heritage Inquiry System indicates that there are no places of Aboriginal heritage on or within close proximity of the subject site. Further, searches of the Heritage Council WA's records indicate that this development will not impact any European heritage sites.

The subject site is situated within the 'South Hedland Town Concept' local heritage place which appears on the Town of Port Hedland's municipal inventory. The historical significance of this area can be linked back to South Hedland's role in the 1960's iron ore boom, with the town developed as a joint venture between the Department of Land Administration and Homeswest in response to the area's influx of population. The proposed development seeks to unlock land within the South Hedland locality for redevelopment in order to help respond to the ongoing demand for workforce accommodation and eventual permanent residential.

5.4.2 Contamination

A review of the Department of Water and Environmental Regulation's Contaminated Sites Database indicates that the site is not identified as being contaminated.

5.4.3 Bushfire

A review of The Department of Fire and Emergency Services' Map of Bushfire Prone Areas indicates that the site is not identified as being within a bushfire prone area.

5.4.4 Acid Sulphate Soils

Based on a review of the Department of Water and Environmental Regulation's online mapping database, the subject site is not at risk of encountering acid sulphate soils (ASS).

5.4.5 Flora and Vegetation and Fauna

Due to the subject site's previous use as the BHP Pundulmurra Accommodation Village, much of the existing vegetation has been impacted by past site clearing (refer to 17). For this reason, the subject site's vegetation is classed as degraded to completely degraded and does not contain any conservation significance.

The opportunity to retain existing vegetation is limited given the requirement to establish drainage swales and a drainage basin across the site. Where possible, existing boundary planting will be retained and supported by new native, endemic and exotic planting suitable to the Pilbara climate.

6. Design Review Response

State Planning Policy 7.0 Design of the Built Environment (SPP 7.0) sets out 10 principles of good design that promote the importance of design quality throughout the built environment in Western Australia. The policy applies to all forms of development.

The Town's *Local Planning Policy 14 – Design Review Panel (LPP14)* applies to all workforce accommodation applications within the local government area.

Prior to the finalisation of the development concept and lodgement of the application, the project team presented to the Town of Port Hedland's Design Review Panel on 19 March 2025.

The Panel made the following summary comments:

> *The Panel thanks the Applicant for presenting to the DRP early in the process. The Panel is broadly supportive of the overall intent and commends the Applicant for the intent to integrate this form of housing within the local community where it is accessible to a wide range of facilities, rather than being in a more remote location.*
>
> *Being in an existing place, however, comes with a range of obligations to respond appropriately to the site interfaces, connects into the local movement network, and to develop an architecture that sits comfortably in its context where there is a stronger sense of permanence.*
>
> *The Panel has offered extensive commentary in respect to the 10 design principles of SPP7 to help the project be the best version of itself that it can be. The Applicant is encouraged to take the comments on board and the Panel looks forward to reviewing the next iteration of the design.*

The development concept has been finalised for lodgement in response to the Panel's detailed responses. The finalised concept has been updated to address the majority of the comments, set out in Table 6.

An response to the 10 principles of good design is provided in *Appendix L.*

Table 6 Design Review Panel Assessment

Principle		Recommendation	Response	Complies
Context and Character		1. Extend the context analysis further afield to pick up other significant local destinations. 2. Undertake further analysis of the local built form for character cues. 3. Review the use of the land to the north and whether it should be considered as a landscape/ pedestrian corridor. 4. Include a pedestrian network diagram in and around the site. 5. Provide more detail on fencing to the public realm. 6. Provide a detailed cross-section through the Kennedy Street interface to demonstrate screening of the car park. 7. Explore how the architecture of the accommodation units can help them feel more permanent and place specific.	• Context analysis plan was reviewed to reference other significant local destinations. • Street sections have been included to demonstrate the proposed development integrates into the subject site's residential neighbourhood interface. • Refer to Section 3.4 of this report– it was not possible to incorporate the Water Corporation northern land. • Fencing details have been updated to provide for garrison style fencing along the site's public street interfaces. • Varied materials and finishes have been updated for the accommodation units and architectural elements including a refined colour, materials and finishes schedule and additional (screening) added	✓
Landscape Quality		1. Extend the landscape concept to include the verges. 2. Clarify the site interfaces with detailed cross-sections and fencing details. 3. Investigate the retention of existing trees where possible. 4. Provide more explanation of stormwater management routes in and around the site. 5. Maximise the provision of shade. 6. Prioritise the provision of trees over lower-level vegetation. 7. Match landscape types to the funds available to maintain them.	• The landscape master plan has been amended to include the Kennedy Street verge. • Street cross sections with fencing detail have been provided to demonstrate the proposed development integrates into the subject site's residential neighbourhood interface. • Refer to section 5.5 for the preliminary urban water management plan and stormwater management routes. • The design has been amended to increase shading elements to key connecting E-W pathways.	✓

Principle		Recommendation	Response	Complies
		8. Clarify the irrigation strategy. 9. Review the locations of the landscape breakout areas to minimise nuisance and contribute to better legibility.	• Over 39,000 plants are proposed as well as established tree planting (50 x 500L trees, 250 x 100L trees and 100 x 45L trees). • The landscape strategy provides an irrigation strategy and is supported by an indicative maintenance budget. • Breakout spaces are provided adjacent to laundries and key pathways. Active spaces are separated from quiet zones and adjacent units have been provided with enhanced screening for privacy.	
Built Form and Scale		1. Explore how the architecture of the accommodation units can help them feel more permanent and place specific. 2. Provide a detailed cross-section through the grouped housing and its front and rear interfaces.	• Varied materials colours and finishes have been updated for the accommodation units and architectural elements (screening) added • Detailed section for the grouped dwellings are provided.	✓
Functionality and Build Quality		1. Review the need for the one-way loop and consider exclusive access to the grouped housing from Stanley Street instead. 2. Clarify the waste management strategy. 3. Confirm the intended user group for the grouped housing.	• The proposed loop road provides multiple benefits: emergency access to the land locked accommodation units to the north, improved security and surveillance for grouped dwelling occupants and the dedicated car park, rear servicing which promotes pedestrian access on Stanley Street with reduced traffic volumes and movements. Stanley St which carries a bus service has a curved alignment adjacent to the site. • Waste will be collected privately from within the site. If approved, it is expected the development will be conditioned to require the preparation of a waste management plan.	✓

Principle		Recommendation	Response	Complies
			• Refer to section 3.6 for the land use approach.	
Sustainability		Develop a sustainability strategy noting a) Develop the sustainability strategy, including commitments, utilising an ESD consultant if needs be. b) Ensure that sustainability initiatives are baked in during the next and more detailed stage of design. c) PV should be provided from 'day 1' rather than seen as a future possibility, and the target capacity should be identified as part of the sustainability strategy. d) Given the urban location, provide for micro-mobility and pedestrian movement. e) Ensure that any north, east and west glazing is protected from the sun as far as possible. f) Provide for electrical reticulation to provide for growing EV charging demand, including e-bikes/scooters. g) Look to using sensor-based LED lighting to reduce energy use.	• The development is informed by a Environmental Sustainability Design Assessment. Refer to Section 4.7 of this report for the proposed sustainability strategy. • PV solar panels are provided within two years of commencement in response to the Pilbara's high cost of construction • Additional shade structures are provided along key pedestrian access paths. • The ESD report addresses solar protection and glazing and lighting. • Electrical reticulation for EV bike and scooter charging is provided adjacent to the Dining hall • An LED and sensor lighting strategy will be provided. If approved, the preparation of a lighting strategy is expected to be conditioned.	✓
Amenity		1. Optimise the provision of shade and shelter to pedestrian routes, UA accessible facilities, and building entries. 2. Review the configuration of the car parking to the rear of the grouped housing. 3. Maximise the provision of shading to glazing and demonstrate through cross-sections.	• Additional shade structures are provided along key pedestrian access paths. The units have generous verandas. • The path to the rear of the townhouses has been widened with provision for planting. • Additional screening to the townhouse balconies has been incorporated • A section though the townhouses is provided.	✓

Principle		Recommendation	Response	Complies
Legibility		1. Review the need for the one-way loop and consider exclusive access to the grouped housing from Stanley Street instead. 2. Explore how to better use landscape to enhance pedestrian legibility. 3. Provide more detail on the main entry experience – signage, landscape, etc. 4. Include a pedestrian network diagram in and around the site. 5. Clarify the provision of individual entries to the grouped housing from the street. 6. Ensure clear, safe, and shaded pedestrian access from the staff car park.	• The proposed loop road provides multiple benefits: emergency access to the land locked accommodation units to the north, improved security and surveillance for grouped dwelling occupants and the dedicated car park, rear servicing which promotes pedestrian access on Stanley Street with reduced traffic volumes and movements. • An entry signage zone has been provided on Kennedy St. Multiple gated pedestrian access points have been added on Stanley St. • The pedestrian access diagram has been updated. • Direct entry from Stanley Street is available for the grouped dwellings via the front courtyards and additional pedestrian gate access from the development to Stanley St. • Separated pedestrian access is available from the staff car park. Staff can access the Dining Hall from the rear car park for weather protection	✓
Safety		1. Review the workers accommodation to raise the quality of life for the residents to mitigate against the mental stress of the FIFO lifestyle. 2. Raise pedestrian crossings and distinguish through materials. 3. Demonstrate safe functionality for large vehicles with swept path diagrams. 4. Review the need for long straight roads or use devices to reduce ambient traffic speeds. 5. Provide a high-level lighting strategy. 6. Clarify the extent of the secure area.	• The worker accommodation employs the design benefits learnt through the Mining Club 'Design a Donga initiative. The initiative provides high quality, purpose-built insulated and acoustically treated accommodation that improves the living conditions and experience of workforces living and working away from home. The accommodation units also borrows from Project Blue's approach to reduce potential mental health issues, promoting productivity, and workforce satisfaction. The fixtures and furnishings that have minimal institutional connotations and feature naturally warm materials, natural colours, greenery and selected finishes that are tactile, visual	✓

Principle		Recommendation	Response	Complies
		7. Review pedestrian crossing location sightlines.	appealing and communicate a 'home-like' environment. • Pedestrian crossings have been raised and line marked. Traffic calming (line-marked speed humps) have been added to the internal road to manage traffic speeds in the development. Expectations around traffic speed and site security are also intended to be set out in the development's Operational Management Plan. • A lighting strategy is intended to be required as a future condition of development where an approval is granted. • The southern most pedestrian access has been relocated to improve sightlines. • Large vehicles can ingress and egress the site as depicted in the Transport Impact Statement – refer to section 4.2.	
Community		1. Provide more detail on the public art strategy. 2. Clarify whether the convenience store will be available to the broader community.	• Public art, especially indigenous art, is intended to be provided as a feature of the site in clear designated areas and through interpretative signage and naming references. A public art strategy is anticipated to be a condition of development where approval is granted. This will allow for ongoing engagement with the Kariyarra traditional owners. • The convenience store is primarily intended to supply basic necessities to occupants of the development. It is an incidental and consequent common facilities component of the development. The landowner is open to exploring opportunities for the common facilities to be made accessible to the general public.	✓

Principle		Recommendation	Response	Complies
Aesthetics		1. Provide more details on materials on colours and materials and how they can respond to and enhance the local sense of place. 2. Review the architectural treatment of the accommodation units so the aesthetic quality is raised to that of the communal buildings. 3. Review the lack of articulation on the end walls of the grouped housing. 4. Explore how, through the landscape and architecture, the develop can feel less transient. 5. Provide more information on the signage strategy.	• Varied materials, colours and finishes have been updated for the accommodation units and architectural elements (screening) added • Articulation has been added to the townhouse end walls, and pedestrian entries from Stanley Street. • An entry signage zone has been added to the development plans and a signage strategy is intended to be required as a future condition of development where an approval is granted. • The accommodation units have been designed from the lessons of Design a donga and with input from Blue Project. The landscape design provides a mix of active and passive spaces, opportunities for occupants to exercise or recreate on site. The verandas and pathways overlook the landscape design which provide connection to nature and place.	✓

7. Planning Assessment

7.1 Planning Framework

The relevant planning framework applicable to the development comprises:

- *Planning and Development Act 2005*
- *Planning and Development (Local Planning Scheme) Regulations 2015;*
- Town of Port Hedland Local Planning Scheme No. 7 (LPS7);
- State and local planning policy framework;
- State Planning Strategy 2050; and
- Town of Port Hedland Planning Strategy.

7.1.1 Planning and Development Act 2005

Pursuant to section 162 (1) a person must not commence or carry out development on land where a planning scheme or interim development first requires development approval unless a) approval has been obtained and is in force under the planning scheme or interim development order and b) the development is carried out in accordance with the conditions subject to which the approval was granted.

7.1.2 Planning and Development (Local Planning Schemes) Regulations 2015

Pursuant to clause 60 of the *Planning and Development (Local Planning Schemes) 2015* (the Regulations), a person must not commence or carry out works on, or use, land in the Scheme area unless a) the person has obtained development approval of the local government under Part 8 or b) development approval is not required pursuant to clause 61.

Pursuant to clause 1 of Schedule 2, this application is a complex application given that it is an application for approval of development that is a use of land not specifically referred to in the zoning table for this Scheme. Clause 88 sets out the advertising and notice requirements for a complex application, including notification to properties within 200m and a notice period of 28 days.

Clause 67(2) of Schedule 2 specifies matters which are to be given due regard when determining applications for approval.

An assessment of the proposal against the relevant matters outlined in Clause 67(2) of the Deemed Provisions has been undertaken in Table 6.

Table 7: Clause 67(2) Applicant Responses

Provision	Applicant response
(a) the aims and provisions of this Scheme and any other local planning scheme operating within the Scheme area	The proposal satisfies the aims of LPS7 – Refer Section 7.2.1
(b) the requirements of orderly and proper planning including any proposed local planning scheme or amendment to this Scheme that has been advertised under the Planning and Development (Local Planning Schemes) Regulations 2015 or any other proposed planning instrument that the local government is seriously considering adopting or approving	The proposal meets the objectives of the 'Urban Development' zone under LPS7, whilst satisfying the objectives of the state and local planning framework.
(c) any approved State planning policy	The proposal has been assessed against the provisions listed under State Planning Policy 7.0 – Design of the Built Environment. Refer to Section 5, Table 5 and Appendix L of this report.
(d) any environmental protection policy approved under the Environmental Protection Act 1986 section 31(d)	The proposal does not conflict with any environmental protection policy approved under the *Environmental Protection Act 1986* Section 31(d).
(e) any policy of the Commission	The proposal does not conflict with any policy of the Commission.
(f) any policy of the State	The proposal does not conflict with any policy of the State.
(g) (fa) any local planning strategy for this Scheme endorsed by the Commission	The proposal demonstrates compliance with the Town of Port Hedland's Local Planning Strategy endorsed by the Commission. The proposed development is located on urban development zoned land in the South Hedland neighbourhood close to the town centre and a range of recreation, and local centre uses. It is a time-limited worker accommodation facility that will provide a means to generate the revenue required to overcome prohibitive residential construction costs and ultimately expand upon the permanent grouped dwelling townhouses initially provided as part of the development.
(h) any local planning policy for the Scheme area	The proposal satisfies the local planning policy framework. Refer to Section 7.2.2
(i) any structure plan or local development plan that relates to the development	No structure plan has been approved for the site. Pursuant to clause 27(2) of Schedule 2, a decision-maker may approve a development application in an area for which a structure plan may be prepared, but where no structure plan has been approved, if the decision-maker is satisfied that — (a) the proposed

	development or subdivision does not conflict with the principles of orderly and proper planning; and (b) the proposed development or subdivision would not prejudice the overall development potential of the area. Refer to clause 67(2) (b) above.
(j) any report of the review of the local planning scheme that has been published under the *Planning and Development (Local Planning Schemes) Regulations 2015*	Not applicable. Review of LPS7 has been published.
(k) in the case of land reserved under this Scheme, the objectives of the reserve and the additional and permitted uses identified in this Scheme for the reserve	Not applicable. The subject site is not reserved under LPS7.
(l) the built heritage conservation of any place that is of cultural significance	The proposal responds to the 'South Hedland Town Concept' local heritage place which appears on the Town of Port Hedland's municipal inventory. The proposal seeks to develop the vacant South Hedland site to provide both permanent residential and temporary workforce accommodation meeting the housing needs of the Town's large workforce population once again.
(m) the effect of the proposal on the cultural heritage significance of the area in which the development is located	The proposal will not impact any reported heritage sites or known cultural heritage significance.
(n) the compatibility of the development with its setting, including – i. the compatibility of the development with the desired future character of its setting; and ii. the relationship of the development to development on adjoining land or on other land in the locality, but not limited to, the likely effect of the height, bulk, scale orientation and appearance of the development.	The proposal responds to the surrounding residential context through the provision of low-scaled residential programmed accommodation. Fifteen (15) permanent townhouses in a landscape streetscape setting are proposed on Stanley Street with the remainder of the site to transition to a long-term residential use following the proposed ten-year workforce accommodation period. Kennedy Street provides the public entry point with communal facilities visible through permeable fencing and landscaping treatments. Other design initiatives include the use of landscaping, stormwater swales, siting, screening and separation of access and egress points, 'back of house' facilities and quiet and active zones to manage potential internal and external amenity impacts.
(o) the amenity of the locality including the following – i. environmental impacts of the development ii. the character of the locality	The proposal seeks to transform an underutilised parcel of land which has remained vacant for approximately 10 years. The development will therefore promote improved built form outcomes by activating

iii. social impacts of the development	the area, whilst increasing accommodation options in the South Hedland locality. The proposal will create local employment and training opportunities, and providing worker accommodation to support local economic growth. The development is supported by a SIA Management Plan to mitigate and avoid adverse social impacts.
(p) the likely effect of the development on the natural environment or water resources and any means that are proposed to protect or mitigate impacts on the natural environment or the water resource	Given the subject site was formerly used as the BHP Pundulmurra camp, the area has largely been cleared and does not contain existing vegetation, flora or fauna with any significant value. Where possible, existing trees will be retained, especially along the Kennedy Street verge and site boundaries. The design is informed by an Engineering Services Report and stormwater will be managed under an Urban Water Management Plan that will retain rainfall runoff in accordance with the Town's requirements via network of swales and drainage basin.
(q) whether adequate provision has been made for the landscaping of the land to which the application relates and whether any trees or other vegetation on the land should be preserved	The proposal's landscape led design ensures the internal built form is serviced along a network of landscaped spines and pedestrian pathways providing shade, visual relief and microclimate cooling. The pathways run along a series of planted swales designed to manage wet season rainfall. The swales are integrated landscape features that enhances the site's ecological biodiversity. They support best practice urban water management and civil design and habitat creation.
(r) the suitability of the land for the development taking into account the possible risk of flooding, tidal inundation, subsidence, landslip, bush fire, soil erosion, land degradation or any other risk	The development will contain all stormwater runoff, as required by the Town of Port Hedland, with an engineered solution including a dedicated drainage basin. A detailed preliminary Urban Water Management Plan is attached as Appendix J, is anticipated as a condition of development approval.
(s) the suitability of the land for the development taking into account the possible risk to human health or safety	The proposal has been designed in consideration of passive surveillance. Communal facilities are located at the street edge to activate the site's primary public interface. The proposed townhouses are designed with several major openings facing Stanley Street front courtyards and rear balconies and permeable fencing to increase opportunities for 'eyes on the street'. Breakout landscaping spaces and landscaped pathways have been designed with CPTED principles in mind.
(t) the adequacy of –	The proposal is supported by a TIS and seeks to minimise potential congestion within the

(i) the proposed means of access and egress from the site; and (j) arrangements for the loading, unloading, manoeuvring and parking of vehicles	existing residential area. Crossovers are contained to the south-west of the subject site along Kennedy Street. An internal ring road will be used to access the proposed townhouses to avoid increased traffic movements along Stanley Street. Dedicated vehicle access to the 'Back of House' service zone will also separate service and maintenance traffic from public and primary trafficable areas.
(u) the amount of traffic likely to be generated by the development, particularly in relation to the capacity of the road system in the locality and the probable effect on traffic flow and safety	The findings of the TIS have not identified any transport issues resulting from the proposed development across the subject site, nor the proposed access arrangements for the site. The development will generate a negligible amount of additional traffic movements during the daily peak hour periods on the local road network.
(v) the availability and adequacy for the development of the following – a. *public transport services* b. *public utility services* c. *storage, management and collection of waste* d. *access for pedestrians and cyclists (including end of trip storage, toilet and shower facilities)* e. *access by older people and people with disability*	The proposed storage and waste areas are located within the Back of House zone which is well separated from Parker Street by Lot 50 and the future church and community hall development. Separate bin stores are provided for the townhouses. Access in and around the site will be provided through a hierarchy of wide and landscaped pedestrian accessways that service the recreation spaces, accommodation units and communal facilities optimise legibility and wayfinding. The proposal also considers persons with disabilities through the provision of universally accessible car parking bays and modular units. Public transport bus routes exist along Parker and Stanley Streets and the proposal makes provision for bus transport for workers staying in the development.
(w) the potential loss of any community service or benefit resulting from the development other than potential loss that may result from economic competition between new and existing businesses	The proposal will supporting local economic opportunities in the broader Port Hedland area. This is demonstrated through: • The direct local spend during construction estimated to be $4.5M to $6.0M over a 12 to 18 month period. • The direct local spend during operation estimated to be $2M to $3M per annum or $20M to $30M over a 10 year period. • Every dollar of expenditure made in the area generated flow on expenditure of $1.97 (report commissioned by Port Hedland Industries Council).

	• Short-term construction employment and long-term employment and training opportunities during operations.
(x) the history of the site where the development is to be located	The subject site was previously used as the BHP Pundulmurra Accommodation Village. The development acknowledges its recent past, retaining the programming, and some existing infrastructure e.g. crossover and slip lanes along Kennedy Street enabling ease of access into the subject site. The site programming with hardstand parking in the Kennedy Street setback is also retained.
(y) the impact of the development on the community as a whole notwithstanding the impact of the development on particular individuals	The proposal provides a number of central communal facilities which could be potentially shared with the local community. For example, there is opportunity to share the Dining hall, surrounding landscaped areas and bus pick up zones for local events including food truck nights and other community events.

7.1.3 Residential Design Codes Volume 1

The townhouse development has been designed as a Grouped dwelling R40 development, consistent with examples of medium density forms in the local South Hedland neighbourhood. This permanent residential component has been assessed the Residential Design Codes (R-Codes) Volume 1 and found to satisfy the objectives and principles of the design elements.

In addition to the Worker Accommodation component, the self-contained Grouped dwelling townhouses will support longer term stays (beyond 3 months at a time), meeting the needs of service workers, professionals and contractors.

Refer Appendix M – R-codes Volume 1 Assessment.

7.2 Local Planning Framework

7.2.1 Town of Port Hedland Local Planning Scheme No.7

7.2.1.1 Urban Development Zone

The Town of Port Hedland Local Planning Scheme No.7 (LPS 7) is the primary statutory document governing land use and development across the local government area. The subject site is zoned 'Urban Development' under LPS 7, refer to Figure 20.

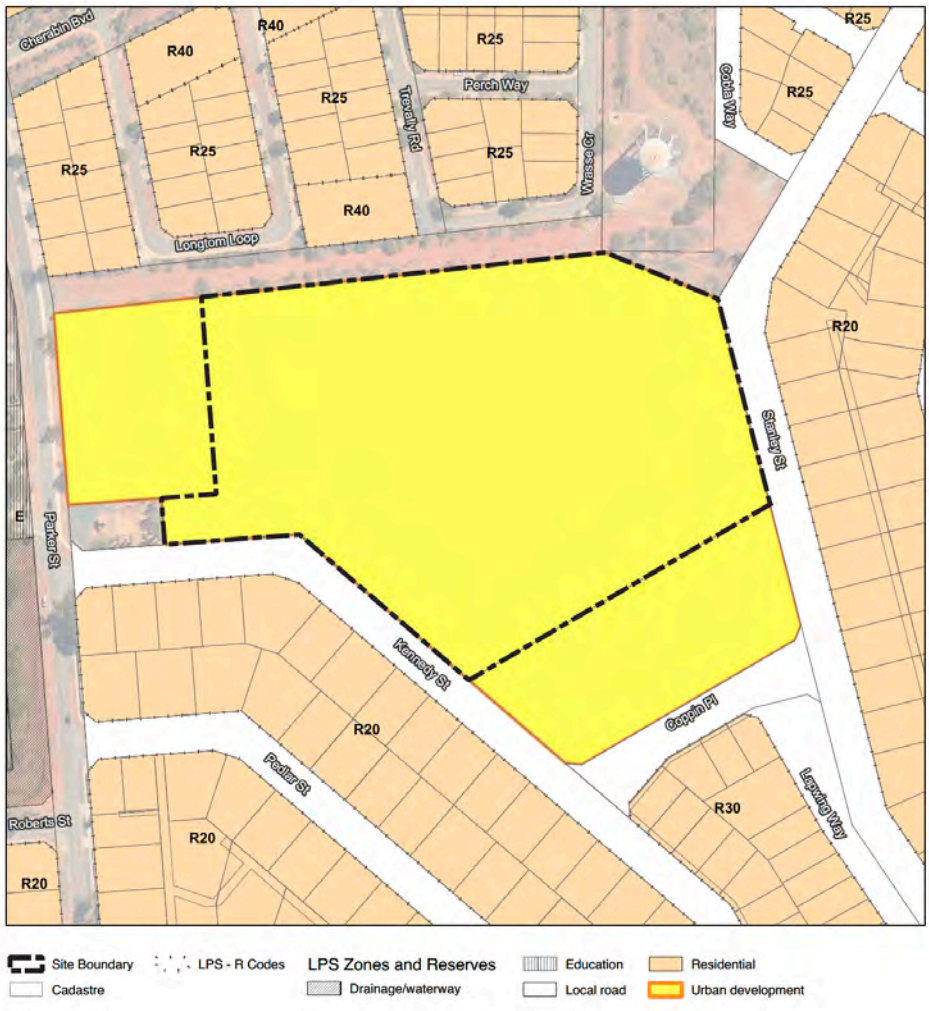

Figure 22 Town of Port Hedland Local Planning Scheme No.7 Subject Site Zoning

The objectives associated with the 'Urban Development' zone are:

- *To provide an intention of future land use and a basis for more detailed structure planning in accordance with the provisions of this scheme.*
- *To provide for a range of residential densities to encourage a variety of residential accommodation.*
- *To provide for the progressive and planned development of future urban areas for residential purposes and for commercial and other uses normally associated with residential development.*

The subject site forms part of the 'Pundulmurra Structure Plan Area' (the Structure Plan Area). The requirements associated with the Structure Plan Area are as follows:

- *Subdivision and development shall have due regard to the requirements of a Structure Plan(s) approved by the Western Australian Planning Commission.*
- *Structure Plan(s) prepared over the structure plan area shall be consistent with and incorporate the findings and recommendations of the following technical reports:*

- *Local Water Management Strategy to and the satisfaction of the Department of Water and Environmental Regulation.*

- *Structure Plan(s) prepared over the structure plan area shall be consistent with the following requirements:*
  - *Land use shall be consistent with surrounding development;*
  - *Lot sizes shall be capable of supporting a diverse range of housing typologies; and*
  - *Movement networks shall address connectivity and avoid the creation of cul-de-sacs streets.*

Development Response:

While a structure plan has not been approved for Structure Plan Area, development may be approved without a structure plan pursuant to Clause 27 of the Regulations which states:

> *A decision-maker for an application for development approval or subdivision approval in an area referred to in clause 15 as being an area for which a structure plan may be prepared, but for which no structure plan has been approved by the Commission, may approve the application if the decision-maker is satisfied that —*
>
> *(a) the proposed development or subdivision does not conflict with the principles of orderly and proper planning; and*
>
> *(b) the proposed development or subdivision would not prejudice the overall development potential of the area.*

The proposed development covers a large central area of the Structure Plan Area. The current proposal for Workforce accommodation and Grouped dwellings reflects both temporary (for a 10 year period) and permanent development components; both the Townhouses on Stanley Street and the Administration building will be of permanent built form, whilst the Worker accommodation units covering the majority of the site are transportable modules. The stormwater basin will also be maintained in long term redevelopment of the site.

Figure 3 demonstrates how the balance of the subject site may transition from worker accommodation to permanent residential development. Figure 3 also provides an indication of how the immediately adjoining land may also develop in coordination with the subject site. Notwithstanding future development remains subject to the landowner's desire and consent for future development in respect of Lots 50 Parker Street and Lot 2940 Coppin Place, in addition to the requisite planning (development and subdivision) approvals, Figure 3 demonstrates the proposed Workforce accommodation and Group dwelling development will not prejudice the development of the Structure Plan Area for future residential purposes.

Furthermore, the proposal is supported by detailed development and landscaping plans, and a suite of comprehensive technical reports.

These reports consider traffic and waste impacts, the potential for social impact and recommended mitigations, site servicing requirements, sustainability initiatives and urban water management. The market context report and letters of support from local contractors and an adjoining landowner underline the existing barriers to residential construction in Port Hedland and the extent of ongoing demand for worker accommodation.

The proposal's alignment with the above-listed zoning objectives is evident through the following:

- The development proposes 64 x modular units and 15 x R40 townhouses with a residential scale and low density as a means to navigating prohibitive construction costs and achieving the future permanent residential development.
- The Workforce accommodation land use is a temporary land use proposed for a period of 10 years. For the lifecycle of the development, it will address the ongoing worker accommodation need in Port Hedland.
- The carefully designed townhouse interface to Stanley Street promotes land use compatibility. Future occupants will be able reside permanently in the Townhouses as a primary place of residence, thus facilitating an appropriate land use interface and integration with surrounding residential properties.
- Kennedy Street is designed with communal facilities and a landscaped frame which provides a range of amenity (acoustic, climate cooling, enhanced streetscape character, visual screening) benefits.
- The development has been programmed to keep noise generating activity away from sensitive land use interfaces e.g. 'Back of House' facilities are centralised and screened, traffic circulates around a one-way internal ring road, buses and private vehicles will transport workers to and from the development, vehicle access points are concentrated to the south-west of the site in the original location.

The proposed development has been designed to ensure appropriate internal and external amenity is achieved. The proposed development appropriately responds to the requirements of Clause 2 (2)(b) of the Regulations and should therefore be assessed as a comprehensive development, warranting approval without an approved structure plan.

7.2.1.2 Land Use Considerations

The proposed development seeks approval for the following land uses as defined under LPS7:

- Workforce accommodation – 64 x modular units and communal facilities

  means premises, which may include modular or relocatable buildings, used –

  (a) primarily for the accommodation of workers engaged in construction, resource, agricultural or other industries on a temporary basis; and

  (b) for any associated catering, sporting and recreation facilities for the occupants and authorised visitors;

- Grouped Dwelling – 15 x R40 townhouses for long-term leasing as a primary place of residence.

  A dwelling that is one of a group of two or more dwellings on the same lot such that no dwelling is placed wholly or partly vertically above or below another, except where special conditions of landscape or topography dictate otherwise, and includes a dwelling in a strata titles scheme with common property. (As defined by the R-codes)

LPS7 does not set out land use permissibility for the Urban Development zone under Table 4 and therefore the land uses proposed are 'Uses not listed.' Pursuant to Clause 1 of Schedule 2 (Deemed Provisions) of the Regulations, the proposed development is a Complex Application, defined as:

> *(a) an application for approval of development that is a use of land if the use is not specifically referred to in the zoning table for this Scheme in respect of the zone in which the development is located; or*

(b) an application of a kind identified elsewhere in this Scheme, or in a local planning policy, as a complex application for development approval;

Pursuant to clause 18(7) of LPS7, in considering an application for development approval within the Urban Development zone, the local government must have due regard to any of the following plans that apply to the land –

- A structure plan;
- An activity centre plan; and
- A local development plan

As noted above, a structure plan has not been approved for the site.

That notwithstanding, the Responsible Authority can still consider the proposed land uses in accordance with clause 18(4)(b) of LPS7, such that:

> The local government may, in respect of a use that is not specifically referred to in the zoning table and that cannot reasonably be determined as falling within a use class referred to in the zoning table
>
> (a) determine that the use is consistent with the objectives of a particular zone and is therefore a use that may be permitted in the zone subject to conditions imposed by the local government; or
>
> (b) determine that the use may be consistent with the objectives of a particular zone and give notice under clause 64 of the deemed provisions before considering an application for development approval for the use of the land; or
>
> (c) determine that the use is not consistent with the objectives of a particular zone and is therefore not permitted in the zone.

The proposed development and land uses are consistent with the intent of the Urban Development zone.

The proposal provides for the urban (residential and accommodation based) development of the subject site, in a manner that is capable of supporting the achievement of residential built form at a range of densities in the longer term (Refer to Figure 3). Some permanent residential built form (townhouses), streetscape and boundary landscaping treatments and long term infrastructure investment (drainage basin) will be provided at the commencement of the development and land use.

This early investment in the site's future will help activate a vacant and underdeveloped site, enhancing local neighbourhood character and community life whilst addressing housing demand for workers in Port Hedland. The 10 year time limited development approval is proposed for the Workforce accommodation use as a means to overcome prohibitive residential construction costs.

The proposed land uses are therefore consistent with the objectives and expectations of the Urban Development zone.

7.2.1.3 General Development Requirements

Table 7 of LPS 7 outlines a range of development requirements that apply to all land within the Scheme area. The following requirements are considered relevant to the proposed development based on the above-listed land uses. The proposal's responses to each requirement are as follows:

Table 8: LPS7 General Development Requirement Responses

Description	Requirement	Response
Car parking	(1) Except for development to which the R-Codes apply, every development shall provide on-site car parking spaces in accordance with Schedule 1. All parking requirements are to be calculated by rounding up to the nearest whole number. Under Schedule 1, the amount of bays required for workforce accommodation is **to be determined by the local government.** Design and maintenance of car parking: (7) All car parking bays and circulation areas shall be designed to a 'User class 3A' with the B99 vehicle in accordance with the Australian Standards 2890.1:2004 (or as amended) and the Building Codes. (8) All vehicle parking bays shall be accommodated within the lot boundaries unless otherwise approved by the local government. Parking within the verge shall not be permitted in areas with open drainage swales or that adjoin roads on the Restricted Access Vehicle network. (9) When considering any application for development approval the local government shall have regard to and may impose conditions concerning: (a) the proportion of car parking bays to be roofed or covered and the design criteria for this covering; (b) the means of access to each car parking bay and the adequacy of any vehicular manoeuvring area; (c) the provision and location of disabled car parking bays as required by the Building Code of Australia;	The proposed development includes a range of car parking areas across the site, often adjacent to different activity zones. The car parking provision includes: • 96 x standard light vehicle passenger car parking bays; • 2 x accessible bays for persons with disabilities; • 18 x service and staff car parking bays; and • 30 car parking bays at the rear of the proposed townhouses. This provision of car parking appropriately addresses the demand associated with the Workforce accommodation and Grouped dwelling land uses as detailed in the TIS (Appendix G) and Section 3.9 of this report. All car parking required to support the development is contained to the subject site. Together with the use of buses to transport occupants to and from work, the car parking strategy will limit traffic movements on the surrounding road network. Easily accessible centralised car parking is proposed in the Kennedy Street setback is recessed from the street edge by a 4m landscaping verge, some of which includes retained vegetation and permeable fencing. The Kennedy Street car park is adjacent to the central communal facilities and is accessible via a shaded and covered pathway network. Townhouse car parking has been sited at the rear of each dwelling to be accessed by an internal ring road and able to be surveyed via the rear townhouse balconies, entry points and habitable room windows.

	(d) the location of the parking bays and the impact upon the aesthetic character of adjoining development; (e) the extent to which parking bays are located within required building setbacks; (f) the location of proposed public footpaths, vehicular crossings, private footpaths within the lot, and the effect of both pedestrian and vehicular traffic movement and safety; and (g) materials for the sealing, paving and kerbing of surfaces, associated islands and pedestrian spaces and the landscaping of these areas.	Dedicated vehicle access to the 'Back of House' service zone also separates service and maintenance car parking from public and primary trafficable areas. The proposed service vehicle crossover will be constructed according to the Town's design specifications. The TIS demonstrates appropriate and safe egress and access to the site for a range of vehicles planned to access the site. Pedestrian access is facilitated on the site via the network of landscaped pathways and the internal one-way loop road which has been designed with speed humps to manage pedestrian safety. Pedestrian access is available from Stanley Street at the northern and southern edges of the townhouses. The existing Stanley Street footpath will be connected to the development to the north and south of the townhouse built form in accordance with the Town's design specifications. Pedestrian crossings have been line marked and located to ensure clear sightlines and pedestrian safety. An assessment against the R-Codes parking requirements for the Grouped dwellings is additionally included at Appendix M.
Sealed Areas and Stormwater management	(1) Stormwater is to be managed so as to not discharge onto neighbouring private property and in accordance with the applicable the Local Planning Policy or local government Design Guidelines. (2) All areas to be used for vehicle parking, accessways, loading bays and for turning or manoeuvring of vehicles shall be sealed, drained, curbed, marked and signposted to the specification and satisfaction of the local government. (4) All sealed areas shall be permanently maintained to the satisfaction of the local government	The development will contain all stormwater runoff, in accordance the Town's requirement. An engineered solution is proposed as an interconnected system of swales draining to a dedicated drainage basin. The proposal is supported by a Preliminary Urban Water Management Plan included as a part of this application (refer Appendix J). A final Urban Water Management Plan is anticipated as a condition of development.

	and the local government may order an owner to effect repairs where it considers that the sealed area has deteriorated. (5) Outdoor displays, industrial hire services, storage facilities, depots, laydown areas and any other open area shall be sealed to the satisfaction of the local government and maintained in good condition. (6) Stormwater management infrastructure and treatments, including where private infrastructure intersects with the public system, shall be maintained by the applicant and/or landowner to the specification and satisfaction of the local government.	
Landscaping	*(1) All applications for development approval shall indicate the landscaping elements of the proposal and in particular a plan showing:* *(a) external lighting;* *(b) the areas subject to landscaping works;* *(c) the location and species of plants;* *(d) other materials imported, arranged and/or constructed on the site;* *(e) areas to be irrigated and the systems to be used; and* *(f) the proposed staging, if any, of works.*	The proposal is supported by a Landscape Masterplan and detailed landscape planting and irrigation strategy. The planting strategy will establish a well-vegetated and visually appealing hierarchical landscape. Selected species will support the site's ecological functions by prioritising trees and native plant species. A detailed lighting strategy will be prepared as a condition of development approval however it is noted that LED and sensor lighting will be provided as a commitment made under the Sustainability Design Report – refer to Section 3.13 and Appendix I.
Workforce accommodation	In exercising discretion in relation to a development application for workforce accommodation, the local government shall have regard to the following: • The applicable local planning policies; and • Appropriateness of the scale design and standard of accommodation in the context of the location and its integration with the surrounding development.	Compliance with the Town's local planning policy framework is discussed below in Section 7.2.2. The development features low-scaled and low density residential and accommodation development including R40 townhouses. Residential development in this manner seeks to respond to residential R20 to R50 densities in the surrounding neighbourhood.

	The local government may require, by signed agreement, a commitment to the date and details of rehabilitation and development of a subsequent use.	

7.2.2 State and Local Planning Policy Framework

7.2.2.1 Local Planning Policy (LPP) 3 (Transportable buildings including shipping/sea containers)

The Town of Port Hedland's Local Planning Policy 03 (LPP3) defines acceptable design standards for transportable buildings developed within the local government area. LPP3 will therefore apply to the proposed development's modular units which by definition are considered transportable buildings under the policy:

A building or structure whether new or previously used, which has been constructed at another location and transported, either whole or in parts, to the intended location. This includes, but is not limited to a shipping container, donga, ancillary dwelling, outbuilding or dwelling.

Development Response:

LPP3 prescribes guidelines relevant to the location of the transportable buildings. Clause 4.2, scenario I (visible from a public and private place) is applicable. An assessment against the criteria is provided below.

Table 9: LPP3 Scenario I Responses

Strategies	Actions
Sub-floor void to be screened (where visible)	The modules will not contain sub-floors.
Removal of metal bars on windows (where applicable)	Not Applicable.
Minimum of two windows and one door facing a primary street or public open space.	Due to the landlocked site, accommodation units are predominantly located internal to the site along landscaped and sheltered pathways and within 300m of the centralised communal amenities. Each accommodation unit contains windows and verandas accessible to the internal pathway network. The central communal facilities are oriented to Kennedy Street. Landscaped breakout spaces are sited adjacent to sheltered BBQ areas and are accessible from the accommodation units.
New wall cladding affixed to the outside of the existing external walls and freshly painted.	The accommodation units will be new facilities. Therefore, all materials and textures will be to a high standard.
Where air conditioning units are existing or proposed, they shall be screened from view.	All air conditioning units will be appropriately screened to reduce potential visual and acoustic amenity impacts.
Tie down chains/straps are not permitted.	Not applicable.
Must have one window visible from the public place.	Communal facilities present activated facades to the public realm on Kennedy Street. Multiple

Strategies	Actions
	windows and access points, together with the car park, will introduce activity and address the Kennedy Streetscape appropriately.

7.2.2.2 Local Planning Policy 4 (Percent for Public Art)

LPP4 requires development to provide public art or pay a cash-in-lieu contribution as a part of their development approval. The policy applies to all new development on zoned and reserved land over the threshold of $2 million and requires a minimum of 1% of the total project cost to be set aside for public art contributions.

Development Response:

LPP4 is acknowledged and has been considered as part of the development proposal. The public art contribution is intended to be integrated into the landscape design as interpretative signage and artwork in open spaces and infrastructure, and used to activate blank facades that interface with the public realm on Kennedy and Stanley Streets. A public art strategy will be prepared as a condition of development approval in accordance with the requirements of LPP4.

7.2.2.3 Local Planning Policy 5 – Workforce Accommodation

LPP5 seeks to manage the location, design, and integration of workforce accommodation within the local government area. LPP05 applies to all referrals or development applications for 'Workforce Accommodation' and therefore must be considered within the proposed development.

Development Response:

As stated under Section 5.1 of LPP5, proposals that do not serve a particular worksite or project will be assessed as 'Long-term Workforce Accommodation' under the policy which is defined as follows:

> *'Typically accommodates operational workforces which are smaller in number and where employment is generally for the longer term and more stable. Job roles can include office staff, drivers, non-shutdown maintenance crews, emergency services, plant operators, and the like, which respond to ongoing project operations with a lifecycle of three or more years.'*

Location Suitability

In accordance with sub-clause 6.3 of LPP5, the Town promotes the importance of restricting travel distance from the workforce accommodation villages to worksites to a maximum 30-minute travel time to provide a sufficient rest period for workers.

The proposed development responds to this policy objective being appropriately located within an established residential area in South Hedland, approximately 13.5km from Port Hedland and therefore supports community integration.

Design Standards

LPP5 establishes design standards which apply to workforce accommodation dependent on the zone in which they are located, their location suitability and whether the workforce accommodation is servicing a particular worksite or project.

In accordance with clause 6.4.3 of LPP5, the ‘high design standards’ will apply to the proposed development being located within the Town’s ‘Urban Development’ zone.

The application of the policy’s ‘high design standards’ is further reinforced through Clause 6.4.4 which states hybrid accommodation models will be assessed by these standards.

An assessment against the LPP5 high design standards is provided below.

Table 10: LPP5 High Design Standard Responses

Element	High Design Standard	Responses	Complies
Siting the development	Setbacks to lot boundaries to be in accordance with the R-codes and any applicable design guidelines.	The R-codes will apply to the proposed townhouses along Stanley Street only. Refer Appendix M – R-Codes Volume 1.	✓
	Setbacks between accommodation buildings shall ensure adequate access to light, ventilation and visual privacy.	The accommodation units are arranged in low density (single storey) hubs separated by landscaped swales and connected pathways. The use of landscape features helps to reduce internal and external acoustic impacts, provides future occupants with privacy from overlooking, visual relief, microclimate cooling and access to natural ventilation, sunlight and daylight.	✓
	Development of non-residential uses, activity areas, and vehicle manoeuvring and car parking areas shall be located and screened to mitigate any off-site emissions or nuisances including lighting, noise, or air quality impacts on adjoining sensitive land uses.	The proposed development retains the existing Kennedy St crossover and traffic slip lanes. An internal one-way loop road provides access to the townhouses and dedicated townhouse car parking. The loop road limits the vehicle traffic movements on the local road network. The TIS includes a swept path analysis for service vehicles: a 19m semi-trailer accessing the site and the loading dock for the Dining Hall Building, a 8.8m medium rigid vehicle demonstrating safe egress and access. Vehicles will reverse park in the Kennedy Street setback car parking area to ensure the vehicles exit in forward gear and do not create noise disturbance during early morning peak. The Kennedy Street car parking is screened through permeable fencing and a 4m wide landscaped	✓

Element	High Design Standard	Responses	Complies
		verge. Townhouse parking is screened to Stanley Street by the townhouses. All delivery, service and maintenance vehicles including buses will enter and exit the site in forward gear. The 'Back of House' service zone is well separated from Parker Street by the Seventh Day Adventist Church development as well as the northern vacant State owned land (Lot 2945) managed by Water Corporation. This screening and siting of the development therefore appropriately responds to the surrounding residential context.	
	Land uses which generate employment such as an office, administrative building, café, or restaurant should be sited and oriented towards street frontages to provide natural surveillance and allow for development to be adapted or repurposed.	The central communal facilities which will generate employment and training opportunities are sited along Kennedy Street which is the primary public entry point for the development. The site programming therefore activates the primary street frontage and providing passive surveillance.	✓
	Development with a primary setback of one metre or less to the street, shall include awnings that: • Define and provide weather protection to entries; • Are integrated into the façade design; and • Are consistent with the desired streetscape character.	Communal facilities are proposed behind the site's primary car parking area and a 4m landscaping verge to Kennedy Street. The Grouped dwellings have been designed with 5m wide courtyards fronting Stanley Street.	N/A
	The proposal shall investigate the creation of spaces for start up businesses to co-locate on site, such as 'incubator' commercial tenancies to foster new business such as food and beverage services, shops or other service industries.	Communal facilities are diverse with the capacity to be shared with the public and to support local businesses. For example, there is opportunity to share the Dining hall, surrounding landscaped areas and bus pick up zones for local events including food truck nights and other community	✓

Element	High Design Standard	Responses	Complies
		events. The convenience store could also potentially be accessible to the general public. Thu	
Designing the building	The development shall address all street frontages through orientation of buildings, careful placement of entry points and landmarks. Façade, building materials and colours that are viewable from the public realm shall have good quality design components, articulation and vary in material. The design shall include: • Articulation and detailing that reflects the scale, character and function of the public realm. • Visual interest is achieved by a combination of building articulation, the composition of different elements and changes in texture, material and colour.	The development appropriately addresses its dual street frontages providing activation and opportunity for passive surveillance. This is achieved through front courtyards and habitable room windows and balconies that overlook Stanley Street or public access, parking and large openings to the central facilities adjacent to Kennedy Street. The design maintains a balanced combination of landscaping, diverse built forms, and functional materiality that adds visual appeal, and appropriately contributes externally to the streetscape and the residential surrounds.	✓
	Building materials and finishes shall be designed to complement those in the surrounding area or landscape and enhance the amenity of the locality.	The proposed materiality composition connects the development to the Pilbara region and its local context. The design makes provision for the opportunity for reuse and recycling of rock and feature steel and accentuates water tower sight lines. The townhouse materials palette reflects a typical residential detailing, aiding integration into the local neighbourhood.	✓
	Where a site immediately adjoins a residential property, building height shall take into consideration the adjoining property's correlating R-code and building height restrictions in accordance with the R-codes.	The subject site does not immediately adjoin residential properties.	N/A
	The development shall incorporate many entry/exit points for permeability into the site and shall be oriented towards the public realm.	Crossovers are concentrated at the south-west corner of the site on Kennedy Street, close to Parker Street. This enables traffic to access and	✓

Element	High Design Standard	Responses	Complies
		egress the site without unnecessarily traversing the surrounding residential neighbourhood along the southern extent of Kennedy Street, Coppin Place and Stanley Street. Two pedestrian access points are proposed north and south of the townhouses on Stanley Street.	
	Metal bars and other visually obtrusive security screening shall not be used on windows and doors.	No metal bars or visually intrusive security screening is proposed on doors or windows.	N/A
	In buildings with a greater height than two storeys, facades include a defined base, middle and top of the building.	The proposed development will contain a maximum of two-storey buildings.	N/A
	Where basement parking protrudes above ground level it shall be designed or screened to prevent negative visual impact on the streetscape.	No basements are proposed.	N/A
	The finished floor level of any ground floor development at the streetscape shall not be higher than half a metre above natural ground level.	The proposed finished floor level varies across the site from 10.5 to 14.75m is informed by the Preliminary Urban Water Management Plan and Civil Stormwater Plan.	✓
	Each unit shall have a minimum of one external window to street frontages.	Due to the orientation of the camp, the communal amenities have been orientated to the streetscape as the predominant interface to the street. There are multiple buildings which will contain windows and doors fronting Kennedy Street.	✓
	A shaded outdoor living area shall be directly accessible to each unit with a minimum area of eight square metres and a minimum dimension of two metres.	The proposed accommodation units have been provided with generous verandas (3.75m wide) and breakout outdoor spaces have been evenly distributed through the development with sheltered BBQ areas. Outdoor open space is also provided around the Dining Hall for passive occupant recreation. High quality recreation facilities are proposed in the Recreation Building and outdoor and indoor Gymnasium and pool. A 600m running	✓

Element	High Design Standard	Responses	Complies
		track has been incorporated adjacent the internal one way loop road.	
	A range of dwelling types, sizes and configurations shall be provided that caters for diverse household types. Development of greater than ten accommodation units shall include at least 20 per cent of units of differing bedroom numbers.	The proposed development provides a total of 79 units (15 townhouses and 64 modular accommodation units including 2 accessible units). The townhouses and accessible units the account for 21% of the total accommodation offer. The self-contained townhouses have 3 bedrooms per townhouse whilst the accessible units contain 2 rooms. The standard modular accommodation units contain four queen size, self-contained rooms.	✓
	Each accommodation shall have a minimum floor area of 37 square metres.	The townhouses have a total area of 115.88m^2. Each standard accommodation module has a floor area of 63m^2. The accessible units containing 2 rooms have a floor area of 115.2m^2.	✓
	Habitable rooms shall have a minimum floor level to ceiling level height of 2.7m.	The proposed units contain a floor level to ceiling level height of at least 2.4m (refer Section **Error! Reference source not found.**).	Minor variation required
	With the Centre zone, ground floor units that are directly fronting a public street shall have a minimum floor to ceiling heigh of three metres.	The development is not located in the Centre zone.	N/A
	Units shall have a minimum floor area and internal dimension in accordance with: Master bedrooms: • Min floor area: 10sqm • Min internal dimension: 3m Other bedrooms: • Min floor area: 9sqm	Bedrooms in the accommodation units contain a 9.65m^2 bedroom floor area with a minimum dimensions of 2.7m, whilst accessible units contain a 17m^2 bedroom floor area, minimum dimension 4.2m (refer Section **Error! Reference source not found.**). Townhouse bedrooms have a minimum dimension of 2.1m and a 9.9m^2 floor area on the ground floor. The upper level bedrooms have a minimum dimension of 2.1m and a minimum area of 14.7m^2.	Minor variation required for min dimension to bedrooms

Element	High Design Standard	Responses	Complies
	• Min internal dimension: 3m Living rooms: • Min floor area: 10sqm • Min internal dimension: 3m	Living rooms have a minimum dimension of 4.3m and an area of 18.55m^2.	
Fencing	Front fencing includes visually permeable materials above 1.2m and the height of solid walls or fences to the street does not exceed 1.2m.	A mix of permeable mesh chain link and garrison style fencing is proposed, with the latter provided at the public realm interfaces. The townhouses have a mix of solid (to 1.2m) and permeable garrison fencing (to 1.8m) to promote visual permeability and align with existing neighbourhood character on Stanley Street	✓
	Fencing, landscaping and other elements on the frontage are designed to eliminate opportunities for concealment.	Landscaping has been designed to enable opportunities for passive surveillance whilst providing appropriate separation from surrounding areas for land use compatibility. Pedestrian access to Stanley Street is proposed north and south of the townhouses. The townhouses provide for habitable room windows, courtyards and balconies on eastern and western elevations to promote passive surveillance and activation. A range of colours, materials and finishes are used to generate interest at street level.	✓
Landscaping	Landscaping shall be designed so that upon maturity, it will be suitable shade or soften the appearance of vehicle parking, external storage areas, bin compounds, other structures and provide a suitable tree canopy within the site.	The development's proposed planting strategy will establish a well-vegetated, visually appealing and character rich hierarchical landscape. Carefully selected plant species will support the site's ecological functions by prioritising endemic and native plant species that are climate and context responsive including plants with wind-resistant root systems and tolerance to heavy rainfall, align with the local flora and fauna, and reduce maintenance	✓

Element	High Design Standard	Responses	Complies
		needs. The landscape design will provide visual relief and micrositing cooling.	
	Landscaping zones shall be established and maintained along all boundaries to provide a suitable tree canopy within the site.	Two 2.5m wide central north-south green pedestrian corridors provide comfortable, legible, and shaded access as well as connection to nature. These corridors are supported by the network of structured and informal pathways, which run along a series of planted swales designed to manage wet season rainfall. Partially covered pathways connect the central facilities to the accommodation units.	✓
Movement network	Proposals shall be accompanied by a TIS or traffic impact assessment (TIA) in accordance with *the Transport Impact Assessment Guideliens.*	This development application is accompanied by a TIS. Refer Appendix G - TIS	✓
	All road infrastructure shall be informed by the recommendations of the TIS or TIA to the satisfaction of the Town.	All development has been planned in accordance with the attached TIS. Refer Appendix G - TIS	✓
	Car parking areas and other hardstand areas are not located within the street setback and are not visually prominent from the street. Such areas shall either be located behind buildings or behind a well landscaped area.	Townhouse car parking and vehicle access is internalised (sited behind the Stanley Street townhouses) and accessible via the internal one-way loop road. In addition, the site's primary car parking area is appropriately screened with a 4m landscaping verge in the Kennedy Street setback, consistent with the site's historical programming which includes retained parking hardstand in this area.	✓
	The road and pedestrian layout of a site shall be designed in accordance with a structure plan or local development plan to allow development to be repurposed for residential, community or commercial purposes.	The proposed development is supported by comprehensive technical studies including a TIS and Preliminary Urban Water Management Plan and a future development concept plan Figure 3. Figure 3 demonstrates the development can	✓

Element	High Design Standard	Responses	Complies
		transition in the long term transition to future residential land use with some development features such as the townhouses and Admin building, drainage basin, streetscape and boundary planting representing long term insitu development elements. The Regulations allow for development applications to be considered without a Local Structure Plan where the development does not impact orderly proper planning or prejudice the ultimate development for the site. Refer to Section 7.2.1.1 of this report	
	Secure bicycle parking shall be provided at a rate to the satisfaction of the Town and accessed via a continuous path of travel from the vehicle or cycle entry point. Footpaths shall connect to a footpath network if there is one in the area.	The development includes bicycle storage in the townhouse storerooms as well as in adjacent to the Townhouses and Dining Hall. Charging stations are provided adjacent to the Dining hall bike parking. A network of landscaped spines and pedestrian pathways that link accommodation units to key communal facilities including the recreational building and Dining Hall, as well as a range of outdoor gardens and spaces.	✓
Storage, waste and collection	Storage, waste, and collection zones shall be fully screened from view from all public areas and setback to mitigate any observation or odour.	The proposed storage and waste areas are located within the Back of House zone which is well separated from Parker Street by Lot 50, and boundary landscaping treatments and the vacant State-owned land (Lot 2945) managed by Water Corporation to the north. Bin stores are provided for the townhouses adjacent to the car parking area (to mitigate impact to Stanley St by waste collection vehicles).	✓
	Air conditions units and other utilities shall be screened from view.	Air conditioning units will not be visible from the site's dual street frontages and will not detract from the visual amenity of the development.	✓

Element	High Design Standard	Responses	Complies
Signage	As per Local Planning Policy 02 – Advertising Signs (LPP/02)	The development site plan makes provision for entry signage. Signage will be subject to a separate application.	✓
Drainage	Proposals shall be accompanied by a detailed stormwater management plan in accordance with the Town's Stormwater Drainage Design Guidelines and should ensure: • A minimum of 1:5 ARI event is contained on-site; • No standing water in excess of 72 hours to prevent mosquito breeding; • Sediment traps are included to prevent sediment entering the Town's reserves and infrastructure; and • Erosion control measures are incorporated to prevent the erosion of embankments, swales and other areas that are unsealed.	The development will contain all stormwater runoff, as required by the Town of Port Hedland, with an engineered solution including a dedicated drainage basin. A Preliminary Urban Water Management Plan is included as a part of this application (refer Appendix J). A final Urban Water Management Plan is anticipated as a condition of development to guide surface water management.	✓
	All habitable floor areas to have a minimum vertical freeboard of 300mm above the 1% AEP.	This clause will be appropriately considered within the above-mentioned Urban Water Management Plan.	✓
Cyclone safety	Provide a building or buildings that are designed for emergency cyclone sheltering for all occupants of the site. Buildings shall be designed to the Building Code of Australia importance level four.	The buildings have designed in accordance with a preliminary BCA assessment. The development has been designed in accordance with applicable cyclone requirements. In the event of a cyclone, workers will shelter in the Dining Hall which will be designed as a Cyclone Shelter/IPL4.	✓

7.2.2.4 Local Planning Policy 6 - Social Impact Assessment

LPP6 requires the preparation of a Social Impact Assessment (SIA) for 'Workforce accommodation' development. In accordance with this requirement, a SIA has been prepared by Circle Advisory to assess the potential social impacts and mitigation strategies for the proposed development.

Refer to Appendix H - Social Impact Assessment.

7.2.2.5 Local Planning Policy 11 – Stormwater Management

LPP11 seeks to ensure effective stormwater management is integrated within development proposals across the local government area. The policy applies to all development, including works or land uses, where the stormwater cycle may be altered or affected. LPP11 requires the preparation of a stormwater management plan which address the applicable 'Acceptable Development Provisions' outlined within the policy.

In accordance with these provisions, a Preliminary Urban Water Management Plan has been prepared by Pentium Water Pty Ltd which address stormwater management for the development.

Refer to Appendix J – Preliminary Urban Water Management Plan.

7.2.3 State and local Planning Strategy Framework

7.2.3.1 Planning Strategy 2050

The State Planning Strategy outlines six interconnected principles intended to guide and coordinate development and land use planning at all levels of government and across all agencies. These include:

- Community: Enable diverse, affordable, accessible and safe communities
- Economy: Facilitate trade, investment, innovation, employment and community betterment
- Environment: Conserve the State's natural assets through sustainable development
- Infrastructure: Ensure infrastructure supports development
- Regional Development: Build the competitive and collaborative advantages of the regions
- Governance: Build community confidence in development processes and practices

Development Response:

The Proposal addresses the Strategy's planning principles in the following ways:

- Community: The proposal facilitates low-scaled staged residential development, offering a range of accommodation options suitable for professional, construction and contractors and key service workers. A portion of the accommodation units will be offered to service workers on accessible rental terms.
- Economy: The proposed development has the capacity to create local training and employment opportunities during both the development's construction and operation. This includes work experience, training and employment opportunities associated with the North Regional TAFE and Hedland High School. The direct local spend during operation estimated to be $2M to $3M per annum or $20M to

$30M over a 10 year period. Every dollar of expenditure made in the area by the development is expected to generate a multiplier effect on expenditure of $1.97. The additional provision of worker accommodation, needed to meet ongoing demand, will be important to the economic success of existing contractors in Port Hedland. The development will support local economic development in the Pilbara Region.

- Environment: The proposal is supported by a Sustainable Design Assessment which highlights the Project's commitment to sustainability initiatives around the critical areas of energy conservation, water conservation, and waste reduction.
- Infrastructure: The project has been designed with a light footprint, comprising largely demountable units to support the demobilisation of the site for long-term residential purposes. The site has been designed to adapt, recycle and reuse existing retained infrastructure on and adjacent to the site, as well as vegetation where possible. The proposed landscaping treatments will prioritize opportunities to recycle feature steel and rock materials.
- Regional Development: The proposal's accommodation will respond to current challenges in the Pilbara region diversifying permanent and temporary housing options and reducing the use of permanent housing and tourism facilities for workforce accommodation.
- Governance: The Project has been developed taking account of stakeholder feedback. The project has made genuine attempts to engage the community early and aims to continue to invest in a dialogue with the local community through the project life.

7.2.3.2 Local Planning Strategy

The Town's 2021 Local Planning Strategy (the Strategy) seeks to guide development within the local government area towards its vision to become Australia's leading port town within the next fifteen years. In alignment with the overarching goal, the Strategy establishes a range of objectives for the local government's built and natural environment. These include:

- Facilitate consolidated urban form that maximises efficient use of existing and planned infrastructure.
- Plan for development areas that can effectively respond to fluctuations in the economy and population change while being resilient to climate change and natural systems.
- Enhance and conserve our natural environment for the social, cultural, spiritual and economic wellbeing of the community.
- Plan for a diverse range of housing typologies.
- Provide services and infrastructure that meet urban growth requirements.

It should be noted that the Strategy seeks to adopt a rational approach to the provision of land for housing. As a result, several land parcels have been identified to accommodate the projected population growth over the next 15 years, prioritising the release of land according to the short-, medium- and long-term future.

The Pundulmurra Structure Plan Area (the subject site) is recognised as a short-term (within 0-5 years) priority for the provision of additional housing stock (120 dwellings).

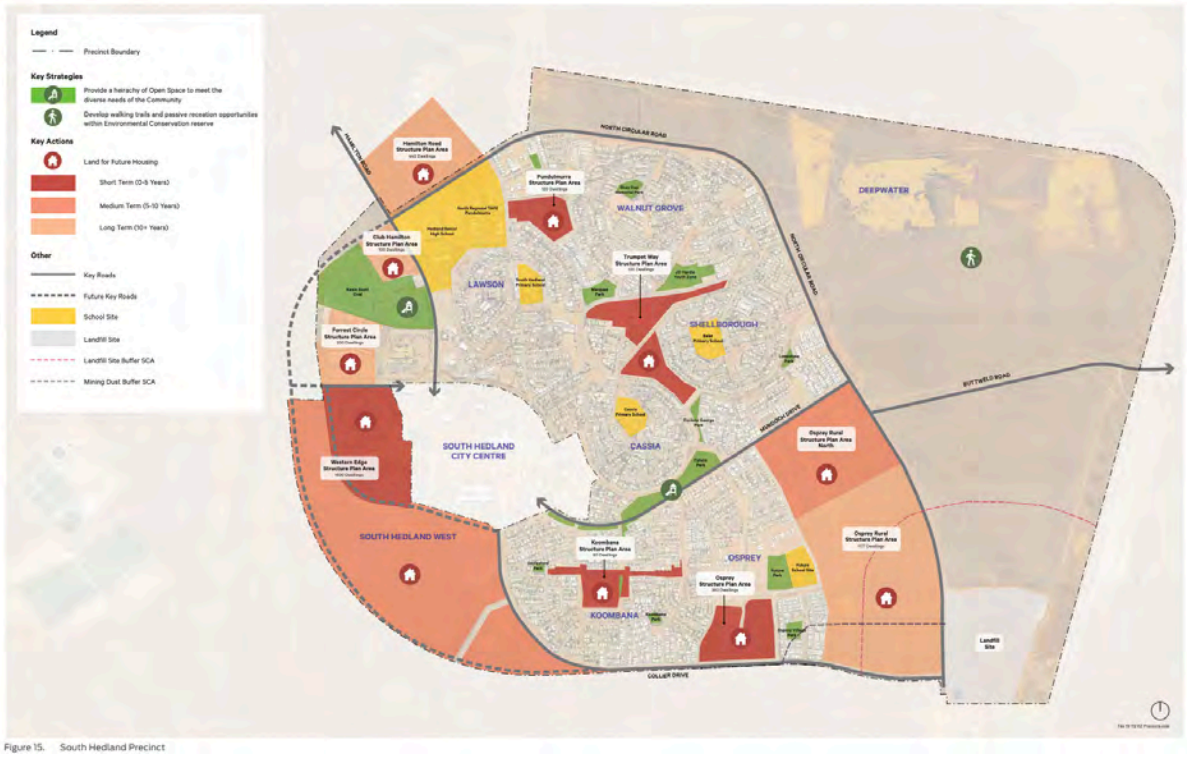

Figure 23 Town of Port Hedland Local Planning Strategy – South Hedland Precinct

Development Response:

The proposed development contributes to the Town's strategic targets in the interim through the proposed development of 15 x Townhouses and the worker accommodation facility which is proposed for a 10 year period. In the long term, the worker accommodation development help generate the revenue required to overcome prohibitive residential development costs and transition the site to permanent residential development. In this respect, the proposed Townhouses reflect the developer's commitment to decommissioning the site as workforce accommodation, ultimately supporting residential development in the Structure Plan Area in line with the Town's Local Planning Strategy

As indicated in the Market Context Report and support letters (refer to Appendix F), there is an established market demand for ongoing worker accommodation, which is currently utilising a mix of short stay, tourism and residential dwellings. The proposed development can help meet the needs of a range of professional, construction, contractor and service workers who do not have access to employer provided dedicated accommodation facilities in Port Hedland and release other housing stock for its intended residential or accommodation purpose.

Refer to section 3.6 and 7.2.1.1 for further land use discussion.

8. Justification for Minor Variations

The above planning assessment demonstrates that the SHRA development remains largely consistent with the applicable planning framework and aligns with the strategic aspirations established for the Pundulmurra Structure Plan Area. The proposed land uses and development can be supported under the Regulation, LPS7, the State and Local Planning Strategy and the State and Local Planning Policy Framework.

Only relatively minor amendments to a handful of LPP5 and the R-codes Volume 1 Deemed to comply provisions. This section provides detailed justification for each of these amendments to promote appropriate built form outcomes in the South Hedland locality.

8.1 LPP 5 – Workforce Accommodation

8.1.1 Minimum floor areas and floor to ceiling height

Minor variations are sort for:

- Floor level to ceiling level height (0.3m for Accommodation units and accessible units)
- Minimum internal dimension (0.3m for Accommodation units)
- Minimum internal dimension (0.9m for townhouses)

An extract of the LPP5 assessment is provided below.

Habitable rooms shall have a minimum floor level to ceiling level height of 2.7m.	The proposed accommodation units and accessible units contain a floor level to ceiling level height of 2.4m	Minor variation required
Units shall have a minimum floor area and internal dimension in accordance with: Master bedrooms: • Min floor area: 10sqm • Min internal dimension: 3m Other bedrooms: • Min floor area: 9sqm • Min internal dimension: 3m Living rooms: • Min floor area: 10sqm • Min internal dimension: 3m	Bedrooms in the accommodation units contain a 9.65m^2 bedroom floor area with a minimum dimensions of 2.7m, whilst accessible units contain a 17m^2 bedroom floor area, minimum dimension 4.2m (refer Section 7). Townhouse bedrooms have a minimum dimension of 2.1m and a 9.9m^2 floor area on the ground floor. The upper level bedrooms have a minimum dimension of 2.1m and a minimum area of 14.7m^2. Living rooms have a minimum dimension of 4.3m and an area of 18.55m^2.	Minor variation required for min dimension to bedrooms

The proposed height and floorspace variations for the accommodation units are relatively minor (at 30cm) and as such will not pose unreasonable noticeable amenity issue for future occupants. The accommodation units will not be utilised as a primary place of residence and will be utilised on swings, for generally 1-3 weeks at a time. Moreover, the accommodation units have access to a 56m^2 shared veranda area, along with high quality communal facilities and landscaped areas which offset the minor variations. These communal facilities provide residents with all the practical amenities they may require, providing for a comfortable temporary stay. These are located both indoors and outdoors and include a shared dining space, a gymnasium, recreational building and barbecue areas.

In respect of the Townhouses, whilst a variation is sought to the minimum internal dimension, the bedrooms at least achieve the minimum master bedroom floor area of 10m^2, are each provided with their own ensuite and are supported by large internal living areas well in excess of the stated minimum dimension and area requirements. These internal living areas are supplemented by external living spaces areas and thus provide a high-level of long term residential amenity.

The development provides appropriate built form outcomes at the subject site, supporting liveability and the comfort of future residents. On this basis, it is considered that minor variations to floor area and height warrant support.

8.2 R-codes Volume 1 Assessment

8.2.1 Visitor Car Parking

The proposed development proposes secured, lit and screened car parking along Kennedy Street comprising:

- 96 x standard car parking bays
- 2 x accessible bays for persons with disabilities
- 18 x service car parking bays

In addition, the proposed development will include 30 screened car parking bays adjacent to Stanley Street at the rear of the proposed townhouses. The Townhouse car bays will be accessed via an internal secured one-way loop road which traverses around the site from the proposed Kennedy Street car park.

R-codes Volume 1 Deemed-to-Comply provision 2.3.1 requires a minimum 1 car bay per dwelling. The proposed 30 car parking bays therefore exceed the prescribed minimum for the 15 x R40 townhouse dwellings.

R-codes Deemed-to-comply Provision 2.3.4 requires 3 visitor bays plus 1 additional bay per 4 dwellings or 7 visitor bays total.

Together a total of 37 bays are required.

Whilst no designated visitor bays are provided at the rear of the Townhouses, there are an additional 10 car bays located in the Kennedy Street car park for use by Townhouse visitors. Refer to section 4.2 of this report and the TIS at Appendix G. In addition, townhouse visitors may park along Stanley Street and access the townhouses via the front courtyards.

9. Conclusion

This report is prepared on behalf of Grounded Construction Group, in support of a Workforce accommodation and Grouped dwelling development on Lot 51 Kennedy Street, South Hedland.

The proposed development will support the delivery of 297 accommodation rooms across 64 modular units (including two (2) accessible units) and 15 townhouses.

The bespoke development combines an interim 10 year Workforce accommodation development with permanent residential Grouped dwellings aimed at improving accommodation and housing access for a range of professional, construction, contractor and service workers in the Town of Port Hedland. The accommodation units and townhouses will be supported by a range of high quality centralised communal facilities as part of a landscape led design that reimagines the provision of workforce accommodation in urban settings.

The development concept is comprehensively supported by range of multi-disciplinary technical reports and investigations. Prior to lodgement, the design has been tested and refinement following extensive stakeholder engagement and Town of Port Hedland Design Review.

The proposed development addresses the relevant strategic policy objectives and statutory requirements of the local and state planning framework. It presents an innovative solution to facilitating long term residential development across the Pundulmurra Structure Plan Area that is supported by market analysis and local businesses in Port Hedland. The proposal is considered consistent with the principles of orderly and proper planning outcomes.

It is respectfully requested that the proposed development be approved by the Regional Joint Development Assessment Panel.

DESIGN INTENT & CONTEXT

SOUTH HEDLAND REGIONAL ACCOMMODATION VILLAGE

PROJECT OVERVIEW

CADDS GROUP HAS BEEN ENGAGED BY GROUNDED TO DESIGN AND DEVELOP A MASTERPLAN FOR LOT 51 KENNEDY STREET IN SOUTH HEDLAND. THIS BROWNFIELD SITE, FORMERLY THE BHP PUNDULMURRA CAMP, IS BEING TRANSFORMED INTO A CONTEMPORARY ACCOMMODATION VILLAGE THAT AIMS TO ELEVATE THE STANDARD FOR REGIONAL WORKER HOUSING.

THE SOUTH HEDLAND REGIONAL ACCOMMODATION (SHRA) VILLAGE WILL PROVIDE 252 SINGLE-BEDROOM ACCOMMODATION UNITS AND 15 THREE-BEDROOM TOWNHOUSES (A TOTAL OF 297 ROOMS), SUPPORTED BY COMMUNAL FACILITIES INCLUDING A DINING HALL WITH INTEGRATED CAFÉ/BAR, OUTDOOR ALFRESCO SPACES, RECREATION BUILDING, FULLY EQUIPPED GYMNASIUM WITH INDOOR AND OUTDOOR FITNESS AREAS, MULTI-USE SPORTS COURT AND SEA CONTAINER-STYLE POOL. THESE AMENITIES ARE COMPLEMENTED BY THOUGHTFULLY DESIGNED LANDSCAPE ZONES FEATURING BBQ AREAS, SHELTERS, AND COMMUNAL GATHERING SPACES.

THE PROJECT REPRESENTS A MEANINGFUL INVESTMENT IN SOUTH HEDLAND'S BUILT ENVIRONMENT AND SUGGESTS HOW REMOTE WORKER ACCOMMODATION MIGHT BE DELIVERED WITH SENSITIVITY TO ITS RESIDENTIAL CONTEXT. THROUGH THIS LENS, THE PROJECT ENDEAVOURS TO SHOW THAT COMMERCIALLY VIABLE DEVELOPMENT CAN ASPIRE TO EMBODY CORE DESIGN PRINCIPLES OF PLACE, PURPOSE, AND HUMAN EXPERIENCE

GUIDING PRINCIPLES

THE SHRA VILLAGE DESIGN PHILOSOPHY CENTRES ON CREATING A DIGNIFIED, COHESIVE, AND CONTEXTUALLY APPROPRIATE DEVELOPMENT WITHIN ESTABLISHED COMMERCIAL PARAMETERS. THESE FINANCIAL CONSIDERATIONS NECESSITATED TRANSPORTABLE BUILDING FORMS FOR BOTH ACCOMMODATION UNITS AND CENTRAL FACILITIES, WHICH HAS IN PART SHAPED THE COMPOSITIONAL APPROACH FROM THE OUTSET. RATHER THAN DISGUISING THESE ECONOMIC DRIVERS, THEY HAVE BEEN INTEGRATED TRANSPARENTLY INTO THE DESIGN NARRATIVE WHILE IMPLEMENTING STRATEGIC INTERVENTIONS TO ELEVATE THE OVERALL OUTCOME.

THE RESULTING DESIGN POSITS THAT ECONOMIC PRAGMATISM AND BUILT ENVIRONMENT QUALITY NEED NOT BE MUTUALLY EXCLUSIVE. BY FOCUSING ON SITE PLANNING, SPATIAL RELATIONSHIPS AND THOUGHTFUL INTEGRATION WITH SURROUNDING NEIGHBOURHOODS, THE DESIGN AIMS TO MOVE BEYOND A PURELY UTILITARIAN SOLUTION TOWARD CREATING A RESPONSIVE COMMUNITY ASSET.

THIS PROJECT MAKES A COMPELLING CASE THAT ACTIVATING VACANT LAND WITH A WELL-CONSIDERED DESIGN - EVEN ONE BUILT WITHIN BUDGET CONSTRAINTS - DELIVERS GREATER COMMUNITY VALUE THAN ALLOWING THE SITE TO REMAIN DORMANT. WHILE SIMPLE, THE DESIGN CREATES FUNCTIONAL SPACES THAT RESPECT THEIR CONTEXT, SUPPORT RESIDENT WELLBEING, AND CONTRIBUTE POSITIVELY TO SOUTH HEDLAND'S URBAN FABRIC.

DESIGN INTENT AND CONTEXT

BUILDING ON THESE COMMERCIAL PRACTICALITIES, THE DESIGN APPROACH FOR THE SHRA VILLAGE IS FOUNDED ON PRINCIPLES OF CONTEXTUAL INTEGRATION, INFRASTRUCTURE EFFICIENCY, COMMUNITY AND RESIDENT WELLBEING. THE DESIGN ETHOS PRIORITISES SUSTAINABLE REUSE OF PRE-EXISTING ASSETS AND INFRASTRUCTURE WHILE CREATING A RESIDENTIAL ENVIRONMENT THAT MAINTAINS HARMONY WITH THE SURROUNDING SUBURBAN FABRIC. RATHER THAN IMPOSING A WHOLLY NEW BUILT STATEMENT, A RESPONSIVE DESIGN HAS BEEN DEVELOPED WHICH RESPECTS BOTH SITE HISTORY AND NEIGHBOURHOOD CHARACTER.

SITE CONTEXT AND HERITAGE

THE SITE, FORMERLY HOME TO THE BHP PUNDULMURRA CAMP, HAS REMAINED VACANT FOR APPROXIMATELY A DECADE WHILE RETAINING VALUABLE INFRASTRUCTURE CONNECTIONS. THIS BROWNFIELD LOCATION OFFERS STRATEGIC ADVANTAGES WITH ITS PROXIMITY TO SOUTH HEDLAND TOWN CENTRE, EDUCATIONAL FACILITIES, AND RESIDENTIAL NEIGHBOURHOODS. THE DESIGN RESPONSE ACKNOWLEDGES AND LEVERAGES OFF THIS PAST USE WHILE REIMAGINING THE SPACE AS A CONTEMPORARY ACCOMMODATION VILLAGE THAT BETTER ADDRESSES ITS SURROUNDINGS

INFRASTRUCTURE-LED DESIGN

A FUNDAMENTAL DRIVER OF THE STRATEGY HAS BEEN THE INTELLIGENT REUSE OF EXISTING SITE INFRASTRUCTURE. BY LEVERAGING THE SITE'S ESTABLISHED CONNECTIONS TO ESSENTIAL SERVICES, EXISTING CROSSOVERS, AND PREVIOUSLY DEVELOPED INTERNAL CAR PARKS AND ROADWAYS, UNNECESSARY ENVIRONMENTAL DISRUPTION HAS BEEN MINIMISED WHILE OPTIMISING PROJECT RESOURCES. THE EXISTING KENNEDY STREET ENTRY POINT AND CAR PARK LOCATION CREATE NATURAL ANCHORS AROUND WHICH THE SITE PLAN ORGANICALLY DEVELOPED, WITH ADMINISTRATIVE AND COMMUNAL CENTRAL FACILITIES POSITIONED FOR LOGICAL ADJACENCY TO THESE ACCESS POINTS.

NEIGHBOURHOOD INTEGRATION

THE COMPOSITIONAL APPROACH DELIBERATELY MITIGATES VISUAL IMPACT ON SURROUNDING RESIDENTIAL STREETS. SINGLE-STORY ADMINISTRATIVE AND RECREATIONAL BUILDINGS (APPROX. 3M HIGH) ARE STRATEGICALLY POSITIONED ALONG KENNEDY STREET TO CREATE A VISUAL BUFFER THAT SCREENS ACCOMMODATION UNITS FROM STREET VIEW. THE TOWNHOUSES ARE ORIENTED TO ADDRESS STANLEY STREET WITH FORMAL FRONTAGES, WHILE BACK-OF-HOUSE FUNCTIONS (KITCHEN LOADING AREAS, BIN STORES, WATER TANKS, MAINTENANCE / LINEN SHED) ARE POSITIONED AWAY FROM RESIDENTIAL INTERFACES TO WHERE THERE ARE NO NEIGHBOURING HOUSES. THIS CONSIDERED ARRANGEMENT DEMONSTRATES RESPECT FOR NEIGHBOURHOOD CHARACTER WHILE MAINTAINING OPERATIONAL FUNCTIONALITY.

SPATIAL ORGANISATION

THE SITE LAYOUT AIMS TO SOFTEN THE UTILITARIAN APPROACH OFTEN ASSOCIATED WITH ACCOMMODATION VILLAGES. ACCOMMODATION BUILDINGS ARE SPACED 4-5M APART, EXCEEDING THE MINIMUM 3M NCC REQUIREMENT. THIS INCREASED SPACING NOT ONLY REDUCES VISUAL DENSITY AND CREATES BREATHING SPACE THROUGHOUT THE DEVELOPMENT BUT ALSO PROVIDES ROOMS WITH GREATER ACOUSTIC PRIVACY AND COMFORT, SUPPORTING IMPROVED SLEEP QUALITY AND ULTIMATELY BETTER RESIDENT HEALTH AND WELLBEING.

THE RADIAL ARRANGEMENT OF BUILDINGS ADDRESSES MORE THAN SITE DRAINAGE - THE SPATIAL LAYOUT INTRODUCES A MORE ORGANIC COMPOSITION THAN TRADITIONAL LINEAR CONFIGURATIONS, WITH CLEAR SIGHT LINES MAINTAINED TO COMMUNITY LANDMARKS LIKE THE ICONIC WATER TOWER. THIS ARRANGEMENT IS COMPLEMENTED BY THOUGHTFULLY DESIGNED LANDSCAPING AND INTEGRATED PATHWAYS TO ENSURE EASY NAVIGATION THROUGHOUT THE DEVELOPMENT. DISTRIBUTED BREAKOUT AREAS WITHIN THE LANDSCAPE FEATURE BBQS AND GARDENS, CREATING DEDICATED SPACES FOR SOCIAL GATHERINGS AND FOSTERING A SENSE OF COMMUNITY AMONG RESIDENTS

LEGIBILITY AND WAYFINDING

ARCHITECTURAL ELEMENTS ARE DEPLOYED STRATEGICALLY TO ENHANCE SITE LEGIBILITY AND WAYFINDING. THE BREEZEWAYS BETWEEN ADMINISTRATIVE, RECREATIONAL, AND GYMNASIUM BUILDINGS SERVE AS PRONOUNCED VISUAL ENTRIES FROM KENNEDY STREET, CREATING RECOGNISABLE GATEWAYS INTO THE DEVELOPMENT. THIS BUILT FORM GESTURE ADDRESSES THE CHALLENGE OF ORIENTATION WITHIN LARGER ACCOMMODATION FACILITIES, PROVIDING RESIDENTS WITH CLEAR VISUAL CUES FOR NAVIGATION AFTER LONG WORK DAYS.

THE DINING HALL'S PROMINENT POSITION ADJACENT TO THE BUS DROP-OFF POINT FURTHER REINFORCES INTUITIVE SITE NAVIGATION. ITS VISIBILITY CREATES AN IMMEDIATE REFERENCE POINT UPON ARRIVAL, WHILE THE INTEGRATED CAFÉ ALONG THE SOUTHERN FAÇADE OFFERS CONVENIENT TAKEAWAY COFFEE AND ON-THE-GO BREAKFAST OPTIONS FOR RESIDENTS DURING THEIR MORNING COMMUTE.

CLIMATE RESPONSE

THE DESIGN RESPONDS PRAGMATICALLY TO PORT HEDLAND'S DEMANDING CLIMATE. BUILDING ORIENTATIONS MINIMISE WESTERN SUN EXPOSURE WHILE MAXIMISING SHADED OUTDOOR AREAS DURING AFTERNOON PERIODS. COVERED WALKWAYS AND VERANDAHS CREATE PROTECTED CIRCULATION ROUTES, WHILE BUILDING FORMS FACILITATE NATURAL VENTILATION. MATERIAL SELECTIONS PRIORITISE DURABILITY IN CYCLONIC CONDITIONS AND HEAT RESISTANCE, WITH LIGHT-COLOURED ROOFING AND EXTERNAL FINISHES REDUCING HEAT ABSORPTION.

COMMUNITY FOCUS

A KEY CONSIDERATION IS THE CREATION OF A RESIDENTIAL ENVIRONMENT THAT SUPPORTS COMMUNITY WELLBEING. THE RECREATION PRECINCT, INCLUDING AN ELEVATED SEA-CONTAINER POOL, MULTI-COURT, SHADED OUTDOOR FIXED EQUIPMENT AND GYM IS POSITIONED AT THE DEVELOPMENT'S HEART, ENCOURAGING SOCIAL INTERACTION AND HEALTHY LIFESTYLES. IMPORTANTLY, THESE RECREATIONAL FACILITIES WILL BE WELL-LIT AND FULLY UNIVERSALLY ACCESSIBLE, ACTIVELY AVOIDING A BINARY APPROACH TO BUILDING AMENITIES THAT CAN UNDERMINE THE DIGNITY OF A DIVERSE RESIDENT COMMUNITY.

THE DINING HALL EXTENDS BEYOND FUNCTIONAL REQUIREMENTS, OFFERING ALFRESCO SPACES AND VARIED SEATING OPTIONS THAT FEEL LESS LIKE A DRY MESS AND MORE LIKE A LOCAL EATERY. THE INTEGRATED CAFÉ/BAR FUNCTION ENSURES FOOD IS SERVED WHERE ALCOHOL IS PROVIDED, SUPPORTING THE RESPONSIBLE CONSUMPTION OF ALCOHOL AND ALIGNMENT WITH SOCIAL CONNECTION. TOGETHER WITH OPERATIONAL POLICIES, THE DINING HALL AND CAFÉ/BAR AREA PROVIDE A RANGE OF DINING, BISTRO AND TAVERN SPACES THAT PROMOTE COMMUNAL GATHERING AND SOCIAL CONNECTION - ESSENTIAL ELEMENTS FOR RESIDENTS WORKING AWAY FROM HOME.

INTRODUCTION

On behalf of Grounded, Tim Davies Landscaping (TDL) has developed the Landscape Masterplan for the South Hedland Regional Accommodation Development (SHRA).

The site will incorporate accommodation units,15 three bedroom residential townhouses, community dining facilities, service pods, alfresco areas, and a range of recreational amenities, creating a well-integrated and functional living environment.

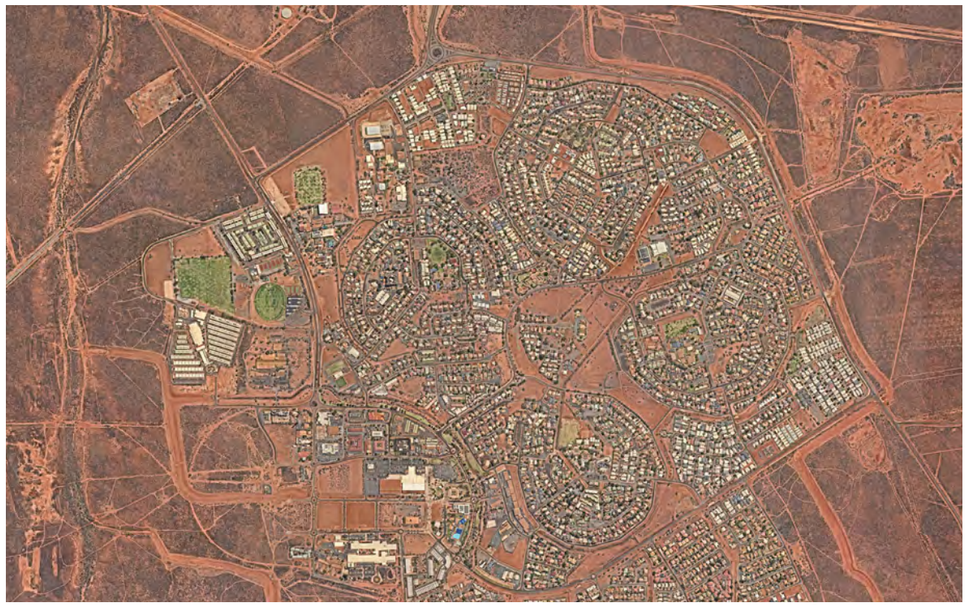
The landscape design vision is to establish a welcoming and cohesive environment for all residents, ensuring clear connectivity and legibility throughout the site while addressing the specific functional requirements of each zone. The design prioritises user comfort, accessibility, and the integration of high-quality green spaces.

The landscape concept responds to the site's diverse context, with residential streets to the east and south, educational facilities to the west, and service infrastructure to the north. Strategic vegetated interfaces and contextual planting strategies have been incorporated to enhance privacy, mitigate visual impacts, and create a seamless interface between the accommodation development and its surroundings.

The planting strategy features a curated mix of endemic and native species, complemented by select exotic trees to establish strong shade canopies, support recreational amenities, and enhance opportunities for passive recreation. This approach ensures a resilient, ecologically responsive, and visually engaging landscape that contributes to the overall liveability of the village.

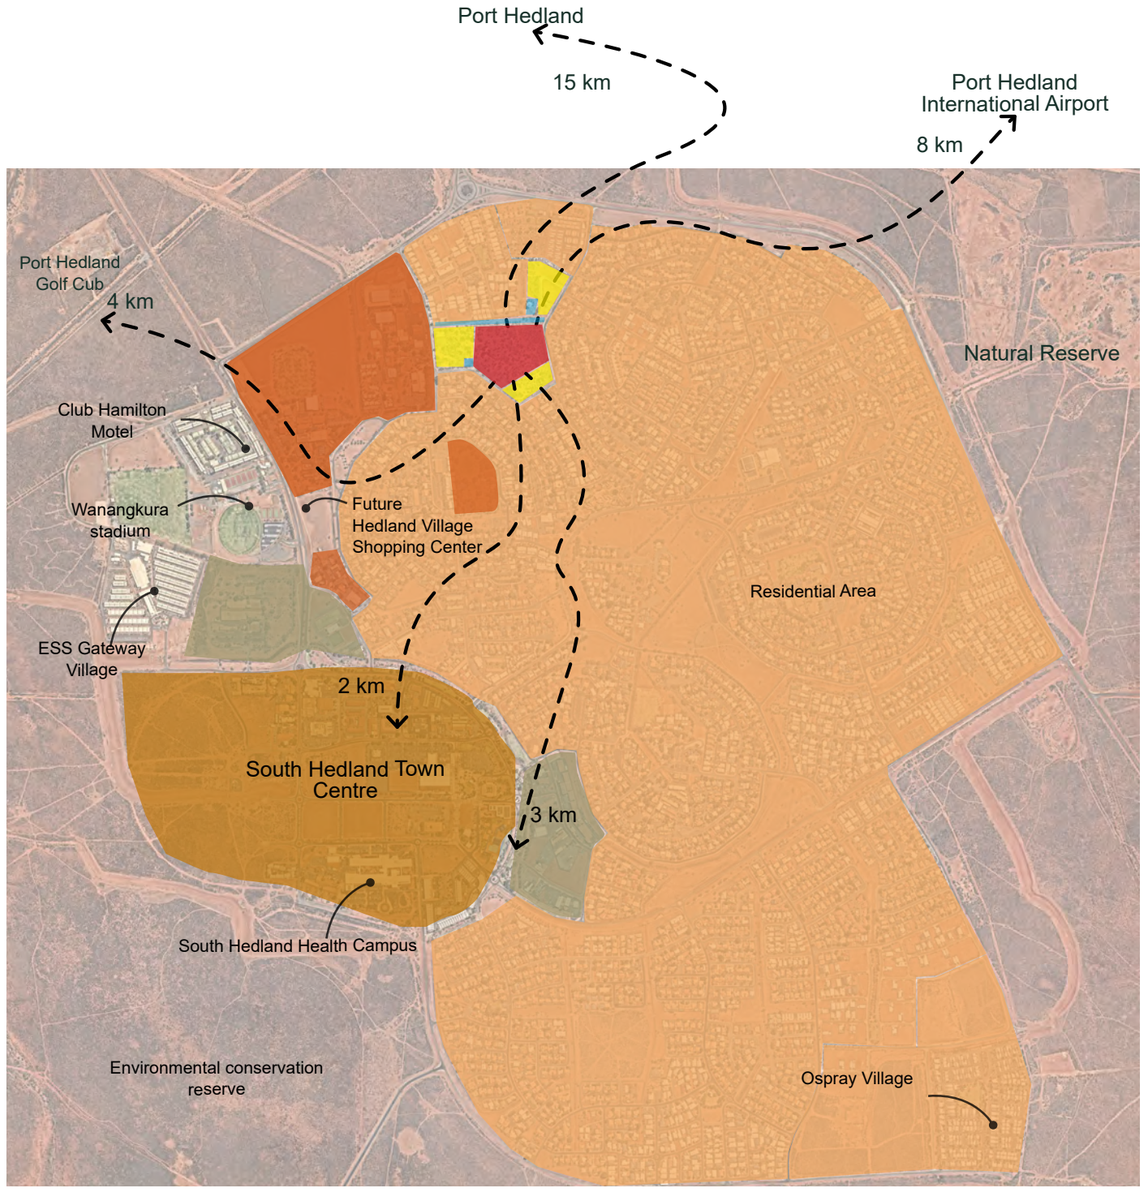
The following principals from the overarching landscape approach to site

- Material Selection – Utilise a robust palette of durable, high-quality materials suited to the Port Hedland environment, ensuring ease of management and long-term maintenance.
- Ecological Planting Strategy – Select a diverse palette of native and endemic species to enhance biodiversity, support local ecology, and contribute to a resilient landscape.
- Recreational Spaces – Design a balance of passive and active recreation areas that encourage social interaction through well-integrated sports facilities, seating areas, and shaded gathering spaces.
- Shaded Pedestrian Networks – Establish green corridors with dense tree canopies and layered planting to provide shade, enhance walkability, and improve overall user comfort.
- Water-Sensitive Design – Develop a planting and irrigation strategy that aligns with the site's water restrictions and Pilbara climate, incorporating drought-tolerant species and efficient water management solutions.
- Integrated Structural Elements – Align structural elements with the architectural material palette, ensuring a cohesive design language that blends seamlessly with the planting compositions. Elements such as trellises and shade structures will enhance both functionality and visual appeal within the landscape.



South Hedland

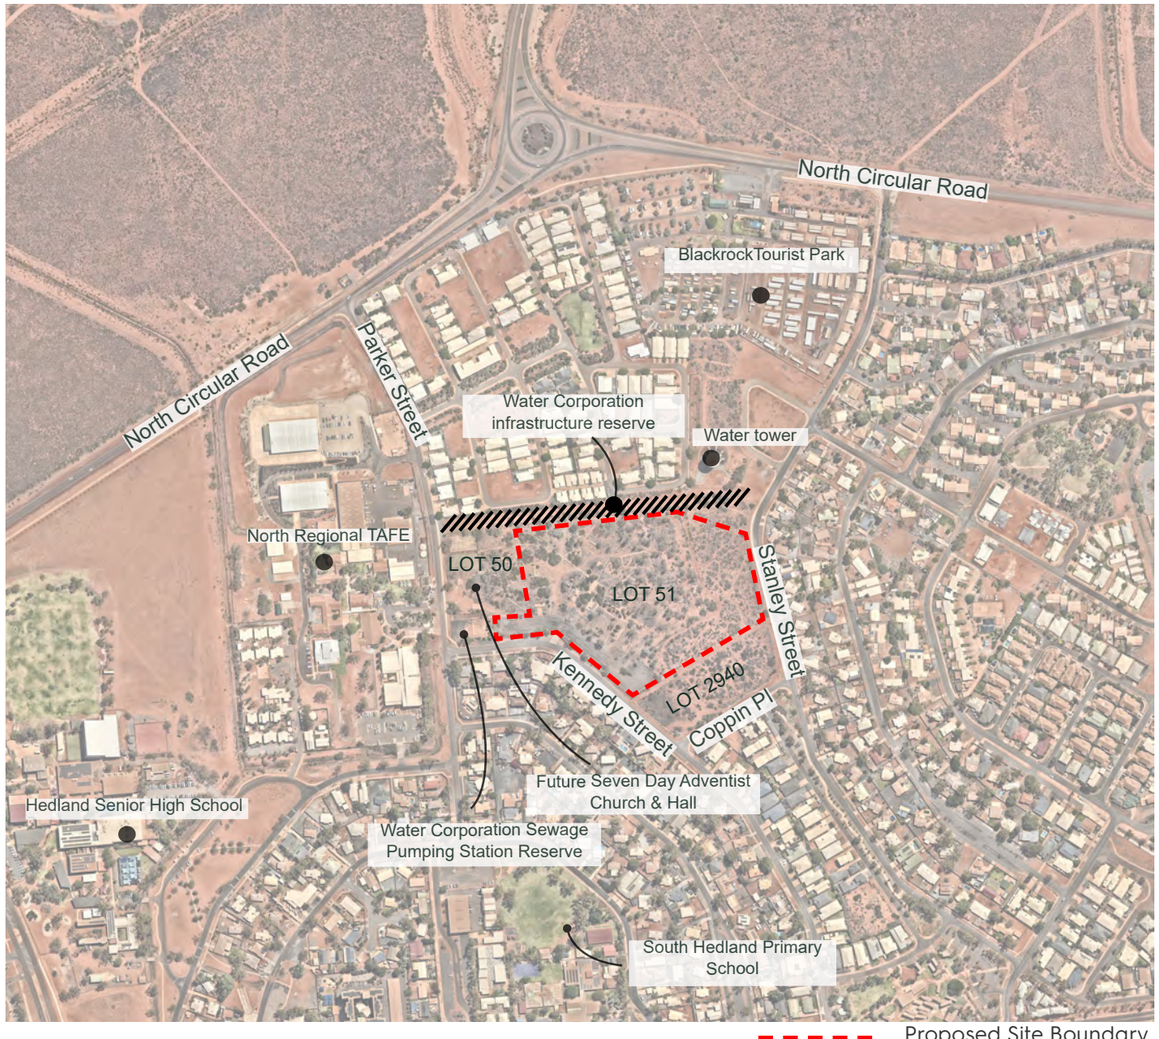
SITE ANALYSIS



Local Context

The site is surrounded by residential neighbourhood and is proximate to the South Hedland Town Centre, local schools, North Regional TAFE and recreation spaces.

- Site subject
- Residential Area
- Town Center
- Education Zone
- Light industrial
- Infrastructure service
- Urban Development



Proposed Site Boundary

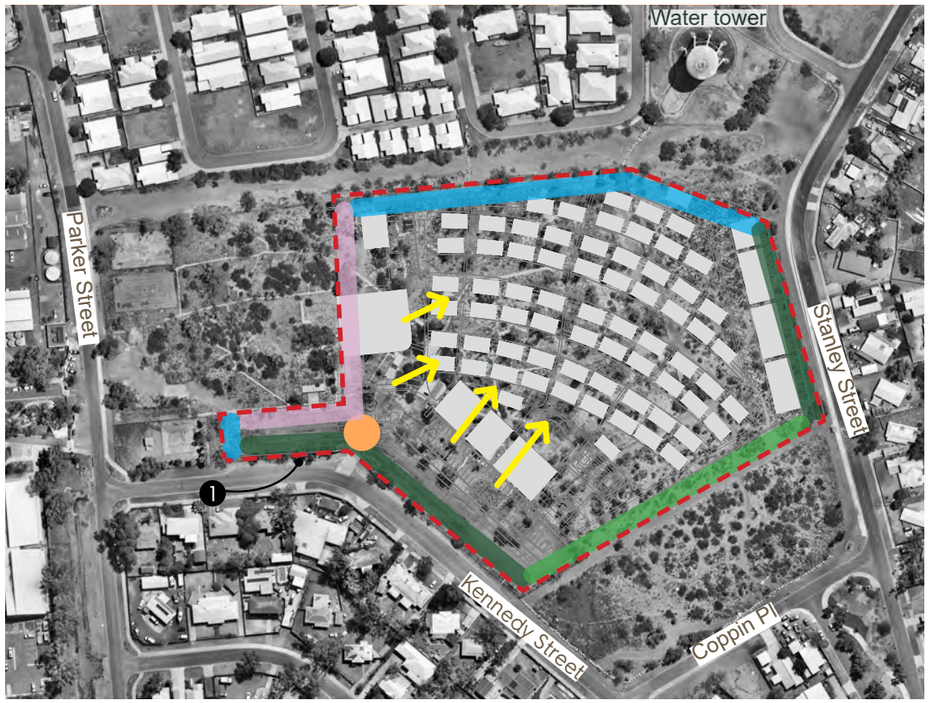
Immediate context

The proposed site is the former BHP Pundulmurra Camp site which has been cleared and vacant for approximately 10 years. Much of the existing the flora and fauna has been impacted by past site clearing. The existing site vegetation is classed as degraded to completely degraded due to past site clearing and does not have any conservation significance (as per PVG report 2025)

The Existing main entrance , slip road and cross overs are located on Kennedy street. State land located to the northern boundary is managed and owned by the Water Corporation. The Towns water tower forms part of the immediate surrounding infrastructure

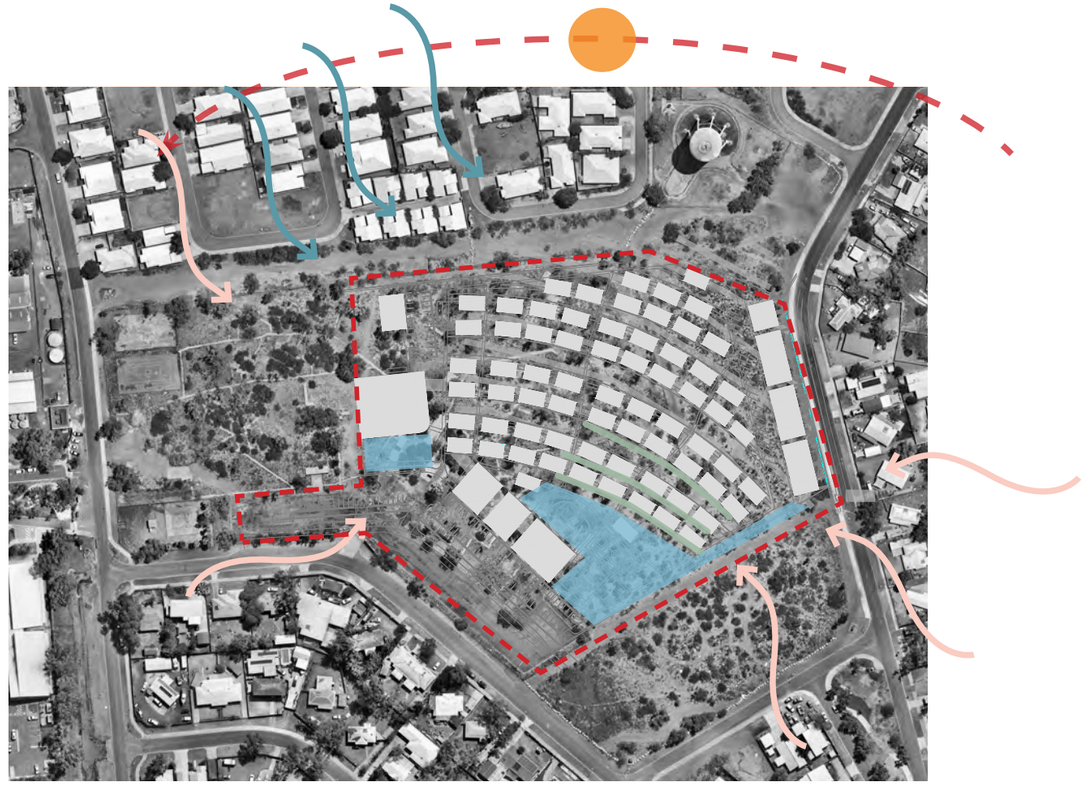
OPPORTUNITIES & CONSTRAINTS

Community Integration



SITE CONDITIONS	DESIGN RESPONSES
1 Existing slip road and crossover	Retain slip road infrastructure, cross over and previous development carpark location
Views to iconic water tower	Ensure site views to landmark water tower are retained
Main Entry	
Infrastructure interface	Create vegetative landscape response to infrastructure interfaces that contributes to overall tree canopy of site
Neighbourhood interface	
Open lot interface (owned by Horizons power)	Create street tree focused response which enhances neighborhood streetscape and tree Canopy . Develop Tree planting along Stanley street to respond to and enhances residential context.
Future SDAC Church and Hall interface	Develop landscape response that contributes sites canopy and ensures suitable approach to site devision and view lines from SDAC to back of house facilities

Sun & Wind Factors



SITE CONDITIONS	DESIGN RESPONSES
Wind Direction in Wet Season (November to March) Average Wind Speed Approximately 16km/h -18.5km/h	Incorporate the drought-resistant plants in activity zone and shade-tolerant plants in all day shade zone.
Wind Direction in Dry Season (April to October) Average Wind Speed Approximately 15km/h - 20km/h	Create vegetation buffers to protect open areas from prevailing winds.
All day Shade Zone	Create integrated landscape to provide shade and create micro climates for cooling effect in open spaces.
Protected Wind Zone	Select appropriate species of trees that are not prone to limb dropping and develop root systems
TDL note the increasing frequency of cyclone activity and gail force winds occurring on November through to April	

LANDSCAPE PRINCIPALS

TDL has developed the following four Principals to guide the design of the accommodation village. These Principals will be used as a continual reference point to develop the landscape throughout the project

Green Space Centered

- Provide shaded green pedestrian corridors to promote incidental connections to nature and community interactions.
- Ensure active and passive recreation areas are well shaded with structures and tree canopies.
- Create landscape driven site response that informs the setting and location of proposed built form and land uses.
- Develop a planting strategy that enhances current streetscape amenity.

Healthy Active by Design

- Ensure clear resident sight lines and passive surveillance for resident safety and navigation.
- Provide hierarchy of connected comfortable shaded pedestrian walking paths to promote physical activity and wayfinding throughout site
- Provide formal and informal landscape areas to support recreational sports, socialising, fitness and passive activities.

Context

- Landscape to respond to the local residential character of Port Hedland ensuring materiality and planting is reflective of the region.
- Create street tree focused solutions to neighborhood interfacing boundary's and enhance existing street scape.
- Consideration to visual sight lines to future lot 50 & 2940 development
- Create open site lines from communal spaces to water tower landmark

Sustainability

- Where possible use existing infrastructure (slip roads, vehicle entrys and cross over)
- Use water wise endemic species to increase sites biodiversity and minimize irrigation water usage requirements.
- Minimise the use of hard scape to reduce the heat island effect.
- Employ the use of best practice WSUD strategies , incorporating drainage basin and swales as landscape features
- Use recycled materials where possible, such as rocks and feature steel elements.

LANDSCAPE MASTER PLAN

LANDSCAPE LEGEND

1. Vehicle entry to main carpark
2. Bus set down / pick up, food trucks and bus shelter
3. Communal lawn and alfresco dining (see Dining Hall masterplan)
4. Shelter , BBQ and picnic seats
5. Storm water basin
6. Native swale planting in gravel mulch and feature boulders
7. Gravel mulch - service areas of accommodation units
8. Break out lawn areas
9. Activity Precinct (see Activity Precinct masterplan)
10. Periphery running track 600m
11. Pedestrian fob card access
12. Town House courtyard landscape
13. Street trees
14. Service and delivery entry
15. Boundary trees to buffer neighbours from view to service area
16. Local artist mural to water tanks
17. Trees and landscaping to car park

SURFACES LEGEND

- Pedestrian Access Paving
- Gravel mulch
- Heal safe Fiber reinforced plastic board walk
- Pedestrian shade canopy - Artist perforation design
- Turf
- Sports court
- Pool
- Native Swale mix - managed sparse
- Native shrub mix - managed
- Proposed Tree

05-A

ACTIVITY PRECINCT

The Activity Precinct is strategically designed within a tree canopy setting to enhance shade and user comfort. The layout integrates distinct zones for active and passive recreation, incorporating spectator seating, shelters for gatherings, and open lawns that accommodate five-a-side games and casual sports. A 600-meter pedestrian path defines the precinct's perimeter, serving as both a circulation route and a multi functional running track.

LANDSCAPE LEGEND

1. Swale planting through rock mulch
2. Multi court
3. Outdoor fitness equipment area and shade sails
4. Storage container
5. Bench seating
6. Seating, Benches and BBQ
7. Above ground shipping container pool
8. Arbor and pool lounge seating
9. Lawn
10. Administration building and Convenience Shop
11. Recreation building
12. Gymnasium
13. Laundry service pod
14. 2m wide Running track 600m around periphery
15. Open sports lawn

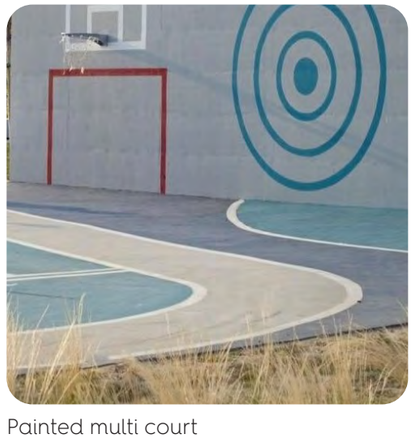
... Boundary fence

Inspiration Image

Raised recycled container pool

Cyclone rated shade structures

Outdoor fitness equipment



Painted multi court

Walking and running track

DINING HALL

The Dining Hall is strategically oriented to the east, maximising afternoon shade by mitigating exposure to the western sun whilst also opening view lines to the water tower. An expansive communal lawn provides a flexible space for group events, programmed food truck evenings, and smaller gatherings with individual BBQ facilities. The lawn overlooks a storm water basin, thoughtfully integrated as a landscape feature. The required storm water basin serves a dual purpose, functioning as both a visual and ecological asset while creating a natural buffer between the public realm and the adjacent quiet accommodation area.

LANDSCAPE LEGEND

1. Bus shelter and food truck location
2. Open communal lawn
3. Shelters, BBQ and picnic benches
4. Landscaped storm water basin
5. Back of house loading area
6. Administration building and Convenience shop
7. Bench seating
8. Picnic shelter and seating
9. Small sports lawn area and open space
10. Raised board walk
11. Undercover alfresco dining to Dining Hall
12. Fire water, potable water and Irrigation Tanks
13. Resident and visitor parking
14. Pedestrian Shade Canopy - Artist perforation design

• • • Boundary fence

Inspiration Image

Alfresco overlooking communal lawn

Raised walkway

Entry feature boulders and native grasses

Rockery storm water basin

Perforated shade canopy

ACCOMMODATION

Two primary pedestrian corridors provide direct access through the accommodation areas to the activity precincts and recreation buildings. The pathways are designed to accommodate tree canopies, ensuring shaded, comfortable walking environments for residents. Accommodation units are strategically arranged in clustered blocks, allowing for the rotation of quiet zones to support shift workers while maintaining efficient circulation. Travel distances are minimised, with no unit located more than 300 meters from the dining hall, ensuring convenient access to communal spaces.

LANDSCAPE LEGEND

1. Shaded 2.5m primary pedestrian path to activity precincts and
2. Residential style town houses with landscaped courtyards
3. Town House resident parking
4. Passive Open space with Shelter and BBQ facilities
5. Under cover secondary 2 pathways
6. Screening planting to Town houses
7. Pedestrian entry access (Fob Pass
8. Bicycle storage
9. Street tree
- Boundary fence

Inspiration Image

Water wise swale gardens

Local Feature rocks

Interspersed gravel and garden textures

Running path bordering landscape

Screening planting to town house and carpark interface

LANDSCAPE SECTION STORM WATER BASIN

The storm water basin has been designed as an integrated landscape feature that enhances the site's ecological biodiversity while providing a natural buffer between the active communal spaces and the quiet accommodation zones. Its multi functional design supports water management, habitat creation, and visual amenity, contributing to the overall sustainability and environmental resilience of the site.

LANDSCAPE LEGEND

1. Swale Planting

PLANTING STRATEGY

Planting Strategy
The planting strategy for the site is designed to establish a well-vegetated environmentally responsive, character-rich landscape that enhances the site's identity while responding to the local neighborhood character and contributing to the existing streetscape. The landscape framework prioritises a strong canopy cover to provide shade, improve thermal comfort, and enhance biodiversity. Carefully selected plant species will support the site's ecological functions while fostering passive connections between residents and the natural environment. The landscape design not only reinforces the site's sense of place but also contributes to its broader context, aiming to a cohesive and resilient green infrastructure that considers future planning and developments, responds to environmental factors, water availability and maintenance requirements.

Swale and Storm Water Basin
The planting within the stormwater basin is designed to withstand seasonal inundation as well as extended dry periods during the dry season. Given the initial filtration rate of 6 minutes, a diverse selection of resilient species has been specified to tolerate fluctuating moisture levels. These plantings will aid in water filtration, soil stabilization, and ecological enhancement, supporting the site's broader WSUD initiatives

Activity Precinct
Shade provision is a primary objective within the Activity Precinct to enhance user comfort. Large-canopy shade trees have been strategically placed to create a well-structured overhead cover, reducing heat exposure and improving thermal comfort within active and passive recreation spaces. Understory planting will complement the tree canopy, contributing to a visually appealing and ecologically functional landscape.

Accommodation Areas
The planting strategy within the accommodation areas prioritises clear sightlines to maintain passive surveillance while ensuring a comfortable and shaded environment. Medium-sized trees with robust, wind-resistant root systems have been selected to provide a balance of shade and visibility. Species have been carefully chosen to withstand cyclonic conditions and Pilbra environment

Residential Interfaces
Planting within the residential interfaces has been designed to align with South Hedland's existing street tree palette, reinforcing a cohesive streetscape character. Fencing has been set back 4 meters within the property boundary along Kennedy street, allowing the landscaped frontage to seamlessly integrate with the streetscape while contributing to much-needed urban canopy cover. Existing trees along interface will be retained and protected. Additional street trees have been proposed along Kennedy and Stanley street
This approach strengthens the site's connection to the broader residential context.

Water Efficient Irrigation System
Water Efficiency practices will be employed in the design and construction of the irrigation system. The landscape has been designed with water flow rates and limitations in mind. The design has been managed to ensure the allowance 50,000L per day for irrigation is not exceeded by the landscape requirements

Where possible plants and species will by hydro zoned allowing reticulation of endemic species to be managed separately with reductions to water requirements after establishment period enabled to be easily implemented.

An irrigation strategy will be prepared fro the project that will include the following considerations
- Low usage water emitters
- Hydro zoning
- Planting of water wise species
- Improvement of soil conditions

WSUD
The civil requirement for a large stormwater basin has been seamlessly integrated into the landscape design as a functional and aesthetic feature, aligning with Water Sensitive Urban Design (WSUD) principles. The stormwater basin, along with strategically placed garden beds between accommodation units, functions as a network of landscape swales. These swales capitalize on wet season rainfall, capturing runoff from pathways and accommodation roofs to support passive irrigation, reduce surface water flow, and promote groundwater recharge.

Permeable surfaces and infiltration trenches further enhance water infiltration, minimizing runoff while replenishing underground water reserves. Additionally, carefully selected native and deep-rooted plant species ensure resilience to periodic inundation during the wet season while thriving in drier conditions throughout the dry season. This approach not only enhances ecological biodiversity but also improves soil stability, mitigates erosion, and contributes to a self-sustaining landscape that efficiently manages water resources.

Pot sizes and species
Species selection will predominantly focus on native and endemic species appropriate to their respective planting zones. Early procurement and contract growing will be utilised to ensure the availability of suitable stock while supporting local nurseries. By collaborating with nurseries to develop appropriate plant palettes, the project aims to secure high-quality plant material that aligns with the design intent and can be delivered in line with construction timelines.

Pot sizes
Groundcover and shrubs - 140mmm -5L
Carpark and Verge trees - 45L
Swale and infill trees - 100L
Feature trees - 500L

Maintenance
The selected plant species have been chosen for their low-maintenance requirements. TDL will develop a detailed maintenance schedule, which will be implemented by Grounded to ensure the ongoing success of the landscape.

MATERIAL SELECTIONS

Material Strategy

A palette of robust, low-maintenance materials has been selected to align with the project's architectural context and broader South Hedland setting. These materials are chosen for their durability, suitability to the local environment, and ability to withstand the region's climatic conditions.

Key material considerations include:

- Contextual Integration – Materials that are sympathetic to the site and surrounding landscape, ensuring cohesion with the architectural language.
- Longevity & Maintenance – Selection of durable materials that offer long-term performance and maintenance.
- Sustainability & Environmental Impact – Responsibly sourced materials that balance cost, sustainability, and environmental footprint.
- Functional & Visual Cohesion – A material palette that enhances the site's ground plane, reinforcing wayfinding and defining functional spaces within the landscape.

grounded.
grounded.
MRC 40t

Director's Message

When I set out to establish Grounded Construction Group, there were a number of important things I knew I had to address before anything else. At the top of the list was putting together a specialised team of professionals with unrivalled skill and experience in the field.

Over time, we have had the privilege and opportunity to forge long-standing business relationships through the supply of robust, reliable infrastructure systems. We proudly employ environmentally-friendly infrastructure guidelines while actively engaging with key community and project stakeholders to achieve objectives and meet deadlines.

It fills me with great pride to look back on our success and how we have stayed true to our original business mission: to be grounded, of solid foundation with our feet firmly on the soil, yet flexible and diverse in our approach.

I look forward to working with you on your next project.

Paul Natoli | Managing Director

about us.

We specialise in the development of infrastructure for remote mining and civil projects Australia wide, including the design, construction, installation, refurbishment and relocation of mining villages and camps.

We facilitate the installation of both permanent and temporary modular portable buildings, mining camps, non-process infrastructure, operational facilities and long-term housing. Importantly, we enhance mining communities by ensuring they are equipped with all modern amenities and facilities required for comfort and wellbeing on site.

Our team of qualified, licensed personnel offer all-encompassing construction project management services and are capable of taking on challenging construction projects of various sizes and in various locations. Our team is made up of project managers, contract administrators, infrastructure designers, construction supervisors, carpenters, plumbers, electricians, plant operators and concrete workers.

Our strong, personal connections with contractors enables us to complete all projects in a timely and cost-efficient manner. We will always work our hardest to ensure that a project is run smoothly and that milestones are achieved with ease.

3 Values
That Drive Our Enterprise

built on **trust**

Trust is the cornerstone of our success. By embodying **integrity, transparency, and accountability,** we can all contribute to a culture where respect, loyalty and collaboration thrive, and where our clients can have confidence in the work we deliver.

delivered with **passion**

Every task we undertake should reflect our passion for our work and for excellence. **Passion fuels innovation,** and by embracing this value, we will create an environment where our love for what we do translates into exceptional outcomes for our clients.

together we **care**

A caring and compassionate work environment is essential to our success. As a team, we are responsible for fostering an environment of **trust, respect and wellness** by looking out for one another, for our clients, and for the communities we serve.

Quality
Work Health and Safety

We are committed to providing a safe working environment for all employees, contractors and any other person who interacts with our business and operations. Our management team is dedicated to upholding their ethical and legal responsibilities as prescribed by the relevant laws, regulations and standards.

Work Health and Safety Objectives

- To prevent work-related injuries, illnesses and incidents
- To identify, assess and control workplace hazards
- To develop procedures in order to ensure safe systems of work are implemented and maintained

As part of our Integrated Management System (IMS), we will:

- Train, educate and communicate with employees with respect to IMS development and work health and safety (WHS) expectations
- Engage contractors and other stakeholders who share our commitment to WHS
- Regularly review WHS practices
- Define and meet objectives by documenting and monitoring measurable WHS targets
- Conduct regular management meetings to review our IMS and WHS policy
- Report, investigate and apply corrective actions to all workplace incidents
- Conduct audits of key processes as part of our ongoing commitment to improve WHS
- Ensure our IMS conforms with and is certified to ISO 45001:2018 WHS Management Systems
- Review our WHS policy annually

Quality Objectives

- To provide an exceptionally high-level of quality products and services to our customers
- To manage our processes in a way that maximises efficiency and productivity
- To obtain customer feedback on our products and services

As part of our Integrated Management System (IMS), we will:

- Document and monitor measurable quality targets by establishing project criteria and specifications
- Apply a ‘plan, do, check, act’ methodology to our IMS
- Apply a risk-based approach with respect to our systems, operations and processes
- Conduct audits of key quality processes as part of our commitment to continual improvement
- Communicate our WHS policies and associated procedures to all employees and contractors
- Ensure our IMS conforms with and is certified to ISO 9001:2015 Quality Management Systems
- Review our quality management annually

Environmental

We recognise and appreciate the importance of environmental sustainability and we are committed to minimising our impact on the environment and the communities in which we operate.

Environmental Objectives:

- To prevent pollution, minimise waste and protect the environment
- To actively promote recycling on our work sites and in our offices

As part of our Integrated Management System (IMS), we will:

- Educate and communicate with employees and contractors with respect environmental sustainability and our expectations
- Document and monitor measurable environmental targets
- Conduct regular management meetings to review our IMS
- Conduct audits of key processes in order to ensure the efficient use of natural resources
- Report, investigate and apply corrective accidents to all environmental incidents and non-compliances
- Meet or exceed the minimum requirements to comply with all relevant environmental legislation, regulations, standards and codes
- Encourage ethical environmental practices and behaviours, including respect for the traditional rights, customs and cultural heritage of a site
- Review our environmental policy annually

Indigenous Engagement

We have developed an Indigenous Engagement Strategy that is aimed at facilitating engagement between Grounded staff and First Nations people and communities. We are dedicated to bridging the gap between Indigenous and non-Indigenous Australians by establishing and maintaining an open and meaningful dialogue. Through our genuine partnerships with First Nations people, we are committed to increasing cultural awareness amongst Grounded employees to foster an inclusive and rewarding workplace.

We recognise the importance of acknowledging the First Nations people's continuing relationship with our country and their unique perspectives in the regions in which we operate. We will offer ongoing support, training and employment opportunities to Indigenous Australians and know that their cultural knowledge will enrich our projects and strengthen our relationships with local communities.

We are confident that this Strategy will achieve great outcomes for both our clients and First Nations people, and will contribute to a more equitable, brighter future.

KANIYANG GROUNDED
JOINT VENTURE

our process.

Concept to Completion

We cover every aspect of project management for mining villages and civil projects, from concept to completion. Our team collaborates closely with clients to understand project goals, objectives and any relevant constraints. By doing so, our clients can proceed with confidence, knowing that any outcomes will align with their vision. During the initial stages of a project, our project managers will develop a roadmap outlining key milestones and time lines, and ensure adherence to these as the project progresses. By offering end-to-end project management services, we can ensure a seamless progression from a project's inception to its completion.

Our services include:

- Design and construction
- Transport
- Landscapes
- Earthworks
- Plumbing
- Electrical and communications

Design

We have a solid understanding of the specific needs and modern requirements of remote villages, which are taken into account during the design stage of a project.

Our team will begin with an initial concept before developing a master plan and site blueprint. All specifications and materials will be chosen and outlined during the design phase. We will also provide our clients with a render of each village prior to the commencement of construction.

A high attention to detail ensures that every facility that we design and construct is all-encompassing and of an extremely high quality.

grounded.
grounded.
grounded.

our projects.

Paris Grove

Albemarle

Accommodation Precinct Design, Construction and Installation

We have been engaged to construct the Paris Grove precinct on a portion of Paris Road in Australind. The precinct has become an integrated accommodation site spanning 16 hectares in size. The project included short term accommodation to accommodate 388 construction workers inclusive of 2 accessible rooms.

The precinct provides state-of-the-art central facilities for workers, including a large kitchen and dining hall, outdoor gym, administration building, maintenance shed, BBQ areas, fruit tree orchard and bush tucker garden.

Scope of works included:

- 386 accommodation rooms
- Earthworks and concreting
- Civil/structural works
- Plumbing
- Electrical
- Transportation
- Installation of verandahs
- Installation of a kitchen, dining hall, indoor gym, outdoor gym, laundry facilities, maintenance shed and BBQ areas

Rocklea Palms

Rio Tinto

Accommodation and Central Facility Expansion

The Rocklea Palms Village project involved the construction and installation of new double storey accommodation facilities, a new transit facility, a gymnasium, and locker room, together with the expansion and refurbishment of the existing dry mess and kitchen.

Scope of works included:

- 262 double storey accommodation rooms
- Supply and installation of supporting facilities
- Dry mess dining and crib area refurbishment
- Footpath expansion
- Laundry and cleaning facilities
- New gymnasium and locker room with showers and ablutions
- New transit facility with recreation lounge and outdoor facilities

Coral Bay

Coral Bay Caravan Park

Ningaloo Bayview Villas

We were engaged by the Ningaloo Coral Bay Caravan Park to design, manufacture and transport modular accommodation units in various configurations.

We constructed eight 2-storey, 2-bedroom units and two 2-storey, 3-bedroom units, each fully equipped with modern amenities, including air-conditioning and a dishwasher. The beachfront units feature floor-to-ceiling windows and a balcony or verandah offering sweeping ocean views.

Scope of works included:

- Design and manufacture of modular accomodation units
- Transport and installation engineering
- Minor earthworks and inground service connections

Cataby

Iluka Resources

Admin, Workshop and Warehouses Non-Processing Infrastructure

In addition to the processing and camp infrastructure for the Iluka Resources Dandaragan project, we were requested to build administration, storage and warehouse facilities.

Scope of works included:

- Design, construction and refurbishment of the site infrastructure area and utilities, including service connection and commissioning
- Completed bulk and detailed earthworks for the site
- Performed civil works and concreting
- Road base, two coat seal, line marking and curbing of carparks
- Constructed and installed modular administration buildings, admin offices and medical facilities
- Built retaining walls, installed fencing and roads within the site
- Supplied and constructed workshops and warehouses
- Installed bollards, signage, shelving, and storage
- Set up storm water drainage system

Christmas Creek

Fortescue Metals Group
200 Person Village Expansion

We were engaged by FMG to design, engineer and construct an additional 200 rooms to the already standing 1,700 person village in Christmas Creek.

Scope of works included:

- Design, engineering and construction
- Earthworks
- Plumbing
- Electrical
- Concreting
- Landscaping
- Construction of BBQ areas
- Concrete paths
- Installation of verandahs
- Stabilisation of existing loading dock
- Reconstruction of village entrance and roundabout

Karntama

Fortescue Metals Group
Wellness Centre

The FMG Karntama Wellness Centre is the newest addition to the existing Karntama Village at Christmas Creek. Grounded refurbished FMG's 12x12 retail shop into a fresh and vibrant wellness centre with a massage studio, hair salon and yoga facilities.

Scope of works included:

- Full internal fit out
- Designing and construction
- Reception, yoga studio, massage parlour and hair salon
- Cabinetry
- Wallpaper
- New ceiling and walls
- New electrical and audio

Eliwana

Fortescue Metals Group
200 Person Construction Camp

We employed innovative construction processes to deliver this compact but substantial accommodation asset safely, on-time, and within budget.

Following completion of this project, we signed a new contract with FMG to construct the much larger and more permanent main deposit camp with a 1000 person capacity.

Grounded staff lived comfortably in the Eliwana Construction Camp while undertaking work on the permanent village.

Eliwana

Fortescue Metals Group
1000 Room Village Reconfiguration

Having successfully completed a 200 person construction camp for Eliwana, we were contracted to build the much larger 1000 personnel main village.

Scope of works included:

- Unique innovative recreational and communal facilities
- Earthworks
- Concreting
- Civil/structural works
- Plumbing
- Communications
- Chemical storage facility
- Transportation infrastructure
- Installation of a relocated kitchen, laundry, maintenance shed, gym, sports courts and accommodation buildings

Dandaragan

Iluka Resources
180 Person Village

We recently delivered an 180 person mining village for the Cataby Mineral Sands project for Iluka Resources.

Scope of works included:

- Elevated campsite requiring build, earthworks, concreting, sealed roads, transport of buildings and cranage
- Generous outdoor recreational facilities and state-of-the-art accommodation facilities
- Waste and water treatment plants
- Electrical
- Plumbing
- Bitumen roads, line marking, car parks and a maintenance shed
- A communications tower for the support and distribution of Telstra networks

Cataby

Tronox Resources
260 Person Village

Delivered ahead of schedule, the Greenfield site required bulk earthworks, concreting, sealed roads, the transport of buildings, integrated landscaping, and recreational facilities.

In a contoured and spacious design, we constructed generous outdoor and sporting facilities, including a swimming pool, tennis court, gymnasium and BBQ area.

As with all of our projects, best practice methods were used to install the accommodation facilities and facilitate the electrical, plumbing, communications, waste, water and road works.

Brockman 2

Rio Tinto
Transit Facility Installation

We successfully completed the installation of a new lounge, locker, and 56 shower transit facility for outgoing RTIO staff members from the Brockman 2 Village. Works included the transformation of the existing car park, all in-ground services, and the landing and complexing of 17 building modules.

Scope of works included:

- Concrete pads and pavement linking the facility to the existing camp
- Structural steel and FRP covered breezeway
- Structural steel bus stop, bus shelters and staircases
- In-ground electrical and hydraulic services connecting facility with existing services
- Landscaping and swales to disperse storm water

Club Hamilton

Fortescue Metals Group
1000 Room Village Refurbishment and Reconfiguration

We were contracted to undertake construction works at Club Hamilton, a mining village owned and operated by FMG. The village has both single and two-storey accommodation blocks, with over 1000 rooms in total. The works were undertaken in stages to allow for the relocation of residents within the village, which remained operational throughout the duration of the works.

Scope of works included:

- Reconfiguration of single storey units
- Replacement of existing roof sheeting
- Replacement of internal walls
- New ensuites
- Polished concrete floors in bathrooms
- New cabinetry
- Plumbing/electrical replacement
- External cladding

Packsaddle

BHP Billiton
2000 Person Drymess

Grounded was engaged by DTMT for the Packsaddle refurbishment.

Scope of works included:

- Refurbishment of existing dining rooms
- Installation of 64 kitchens
- Floor modules
- Kitchen/dining extension
- Decomplexing of existing kitchen
- In situ building
- Structures construction
- Linen shed build
- Buggy shelter

Shay Gap

Fortescue Metals Group
200 Person Construction Camp

We were engaged by Black Diamond Group to relocate the existing 200 person construction camp that we installed in 2019 from the FMG Eliwana location to FMG Shay Gap.

Scope of works included:

- Earthworks and concreting
- Civil/structural works
- Plumbing
- Electrical
- Transportation
- Installation of verandahs
- Installation of a relocated kitchen, dry mess, accommodation buildings, laundry facilities, a maintenance shed, in situ gym and sports courts

To Whom It May Concern,

Re: Statement of Support – South Hedland Regional Accommodation

We are pleased to express our support for Grounded's proposed worker accommodation development, the South Hedland Regional Accommodation (SHRA), located on Kennedy Street, South Hedland.

The Seventh-day Adventist Church is also planning to develop the adjoining land at Lot 50 Parker Street, where we intend to establish a church and community hall to serve our local parishioners.

Over the past few months, Grounded has maintained consistent and open engagement regarding the progress of SHRA. We have been working collaboratively to ensure both developments integrate seamlessly into the local community and residential area.

We look forward to the successful completion of SHRA alongside our own project, confident that both will contribute positively to the region.

Sincerely,

Graeme Drinkall
Chief Financial Officer
WA Conference Office
Seventh-day Adventist Church

1 INTRODUCTION

1.1 Background

Lot 51 Parker Street, South Hedland is located approximately 3km to the south of Port Hedland, in the suburb of South Hedland (Figure 1). The lot is 4.8972 ha and is broadly bound by Kennedy Street and Coppin Place to the south, Stanley Street to the east, an unmade road reserve to the north and undeveloped land to the west (Figure 2).

This Flora, Vegetation and Fauna Survey was commissioned by Grounded to assess the environmental values of the site.

1.2 Scope of Works

1.2.1 Flora and Vegetation Survey

A Reconnaissance Flora and Vegetation Survey was undertaken in accordance with the *EPA Technical Guidance: Flora and Vegetation Surveys* (EPA, 2016). The survey included the following:

- A desktop search and review of the Department of Biodiversity, Conservation and Attractions' Declared Rare and Priority Flora databases;
- A search of the Commonwealth Government's Protected Matters Search Tool to identify species potentially occurring within the area that are protected under the *Environment Protection and Biodiversity Conservation* (EPBC) *Act 1999*;
- Field survey in December using 50m x 50m quadrats to record native and introduced species as well as a site walkover of representative areas of native vegetation;
- Recording the location of significant plant species;
- Description and mapping of vegetation types and vegetation condition;
- Assessment of the conservation status of any plant species and ecological communities;
- Compilation of a flora list; and
- Preparation of a report.

1.2.2 Fauna Survey

A Basic Fauna Survey was undertaken in accordance with EPA Technical Guidance *Fauna Surveys for Environmental Impact Assessment* (EPA, 2020). The survey included the following:

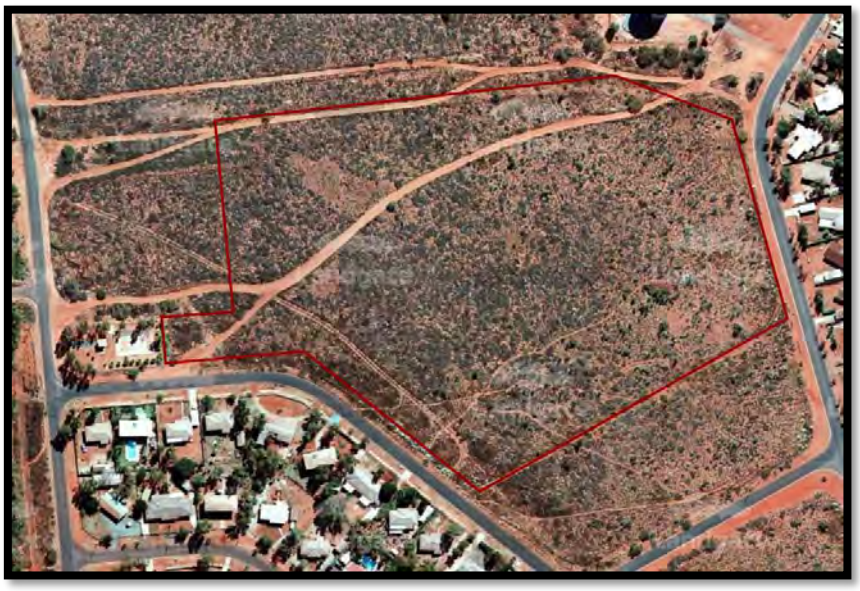
- A search of the DBCA Databases for the general area for Threatened and Priority Species;
- A search of the Atlas of Living Australia for Threatened and Priority Species;
- A search of the Commonwealth Government's Protected Matters Search Tool to identify species potentially occurring within the area that are protected under the EPBC Act or international migratory bird agreements (JAMBA/CAMBA);
- A review of studies previously undertaken in the vicinity of the site;
- A description of the fauna habitats present on the site from field surveys; and
- An assessment of the significance of the site for conservation significant species in a local and regional context.

2 EXISTING ENVIRONMENT

2.1 Land Use

Historical aerial photographs show that the lot was largely vegetated in 1995 (Plate 1).

Plate 1: Aerial Photograph from 1995 (Landgate, 2025)



The lot was mostly developed for a workers' camp between 1995 and 2001. The workers' camp was located on the western half of the lot. Some native vegetation appears to be present in the 2004 aerial photograph with the eastern end almost completely cleared apart from a few scattered trees or shrubs (Plate 2).

Plate 2: Aerial Photograph from 2004 (Landgate, 2025)

The aerial photograph from 2014 shows the eastern cleared area has regrown (Plate 3).

Plate 3: Aerial Photograph from 2014 (Landgate, 2025)

Most of the workers' camp buildings and infrastructure were removed in 2015. Some hardstand old carparks and tracks are still present (Plate 4).

Plate 4: Aerial Photograph from 2024 (Landgate, 2025)

2.2 Topography

The site is flat to gently undulating, generally sloping gently down to the west from 17m Australian Height Datum (AHD) to 14mAHD to the west (Topographic-map.com, 2025).

2.3 Geology and Soils

The site is situated within the De Grey Supergroup which is made up of clastic sedimentary rocks, banded iron-formation and chert, and subordinate mafic and felsic volcanic rocks that are weakly metamorphosed.

The soils mapped on the site are on the Uaroo system (281Ua) and are described as broad sandy plains, pebbly plains and drainage tracts supporting hard and soft spinifex hummock grasslands with scattered acacia shrubs (DPIRD, 2024).

2.4 Hydrology

There are some bores in proximity to the site with measured groundwater levels of:

- >12.8 mAHD approximately 5 km to the north-east of the site (ARMY C51); and
- >11.58 mAHD approximately 5 km to the north-north east of the site (ARMY C48) (Cardno, 2017).

There are no wetlands or expressions of groundwater on the site and no surface water ponding is evident.

3 FLORA AND VEGETATION

3.1 Methodology

3.1.1 Database Searches

Searches of the following databases were undertaken prior to the site survey:

- DBCA Threatened and Priority Flora Databases including the WA Herbarium database (WAHerb) and Threatened (Declared Rare) and Priority Flora Species List (TFPL) (Appendix 1) for a radius of 100 km that provides a list of Threatened and Priority species recorded in the area;
- Atlas of Living Australia (ALA, 2025) (Appendix 2) which shows all species that have been recorded within a 30km radius of the site.
- The EPBC Act Protected Matters Search Tool (DCCEEW, 2024) (Appendix 3) which identifies species that are listed as Endangered, Threatened or Priority under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) could potentially have habitat within a 5km radius of the site.
- DBCA Threatened and Priority Ecological Community Database for a radius of 30 km that provides a list of TECs and PECs recorded in the area.

3.1.2 Survey

A site Reconnaissance Flora and Vegetation Survey was undertaken on 12 December 2024 by Dr Paul van der Moezel of PGV Environmental. The survey included sampling from two 50m x 50m quadrats from within the different vegetation types as well as a thorough walk through the site. The low number of quadrats reflects the presence of native vegetation only in the eastern end of the site.

The track log for the survey is shown on Plate 5.

Plate 5: Track Log

Information on flora composition and vegetation structure was recorded in the non-permanent quadrats.

Plant specimens were photographed or taken for identification at the Perth Reference Herbarium or office using standard reference guides.

3.1.3 Survey Conditions

The conditions that the survey was undertaken in are presented in Table 1 in order to assess the adequacy of the survey. Rainfall for South Hedland (Measured at Port Hedland Airport, Site Number 004032) was below average in June and July being 10.8 and 0.0 mm compared to averages of 22.6 and 9.9mm. There was above average rainfall in August and September being 28.8 and 5.8mm compared to averages of 4.8 and 1.3mm. October, November and December were all slightly lower than average (BOM, 2025). The seasonal rainfall would not have significantly impacted on the survey.

Table 1: Statement of Botanical Survey Conditions

Issue	Constraints (Y/N)*	Comment
Competency/experience of the consultant conducting the survey	No	Dr Paul van der Moezel has extensive botanical survey experience throughout Western Australia including the near-coastal Pilbara area.
Proportion of the flora identified^	Yes	The timing of the survey in December was outside the optimal time for surveys in the Pilbara region. Some ephemeral species and grasses likely to not been able to be recorded on the site.
Sources of information (historic/recent or new data)	No	The flora of the Pilbara coastal area is well documented.
Proportion of the task achieved and further work that may need to be undertaken	No	No follow-up survey required as no Threatened Flora expected to occur in other seasons.
Timing/weather/season/cycle	Yes	The December survey was outside the optimal time for surveys in the Pilbara region.
Disturbances (Fire)	No	The site has not been recently burnt.
Intensity of survey (e.g. In retrospect was the intensity adequate)	No	The time spent on site, approximately 5 hours and relative ease of access made for a full coverage.
Completeness (e.g. was relevant area fully surveyed)	No	
Resources (e.g. degree of expertise available for plant identification)	No	Experienced botanist undertook most plant identifications at the WA Herbarium
Remoteness and/or access problems	No	Easily accessible site in the South Hedland townsite
Availability of contextual (e.g. bioregional) information for the study area.	No	WALGA statistics on remnant bushland

*Constraints have been rated as Significant, Moderate or No constraints

^Fungi and nonvascular flora (e.g. algae, mosses and liverworts) were not specifically surveyed for during the survey.

3.2 Desktop Results

3.2.1 TEC/PEC Database Searches

A search of DBCA's Threatened (TEC) and Priority Ecological Communities (PEC) database was conducted within a radius of 30 km around the site and no TECs or PECS were recorded within the search area (DBCA Pers Comm, 2025). The nearest PEC is associated with the vegetation in the coastal dunes of Eighty Mile Beach.

3.2.2 Flora Database Searches

The results from the database searches are shown in Table 2. There was one Threatened species and 25 Priority species identified in the database searches. Table 3 lists the likelihood that any of the conservation significant species identified in the database searches could occur on the site based on the soil types and location.

There were three species identified that may have habitat on the site being:

- *Tephrosia rosea* var. Port Hedland (A.S. George 1114), Priority 1;
- *Euploca mutica,* Priority 3; and
- *Gymnanthera cunninghamii,* Priority 3.

All three species are perennial and all three species would be recognisable at the time of survey.

Conservation Codes are in Appendix 4.

Tephrosia rosea var. Port Hedland (A.S. George 1114) (previously called *Tephrosia rosea* var. *venulosa* Pedley ms) has previously been recorded within the rail reserve approximately 1.2km north of the site.

Table 2: Identified Significant Flora Species and Likelihood of Occurring on the Site

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Quoya zonalis (Listed as *Pityrodia* sp. Marble Bar (G. Woodman & D. Coultas GWDC Opp 4) under the EPBC Act)	Pilbara Foxglove	Endangered	Endangered	Pilbara Foxglove found on steep, rocky, sandstone conglomerate and granite slopes in skeletal, brown, sandy loam soils of the Capricorn Land System and subpopulations are frequently distributed in a linear arrangement on slopes with a southerly or easterly aspect (Shepherd and Hislop, 2020).	Highly Unlikely – not suitable habitat
Atriplex eremitis		Priority 1		*Atriplex eremitis* occurs on level sand plains and a mosaic of saline plains (Cranfield, 2008).	Highly Unlikely – not suitable habitat
Euploca parviantrum		Priority 1		*Euploca parviantrum* occurs in sandy soils on flats, plains, rocky slopes.	Unlikely – not typical habitat
Tephrosia rosea var. Port Hedland (A.S. George 1114)		Priority 1		*Tephrosia rosea* var. Port Hedland (A.S. George 1114) is in crevices in granite outcrops and minor drainage lines(ALA, 2024).	Possible – habitat may occur on the site
Themeda sp. Panorama (J. Nelson et al. NS 102)		Priority 1		*Themeda* sp. Panorama occurs in proximity to waterways and colluvial or rocky footslopes, on loam or clay loam, in areas of ironstone range, tussock and hummock grassland or open grassland, occasionally with shrubs or trees.	Highly Unlikely – not suitable habitat
Triodia degreyensis	De Grey Spinifex	Priority 1		De Grey Spinifex is recorded near the De Grey River (Barrett *et al.*, 2023).	Highly Unlikely – not suitable habitat
Euphorbia inappendiculata var. *inappendiculata*		Priority 2		*Euphorbia inappendiculata* var. *inappendiculata* grows on heavy clay soils on open plains or gentle slopes (Halford and Harris, 2012).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Gomphrena pusilla		Priority 2		*Gomphrena pusilla* is recorded from fine beach sand behind foredune, on limestone (Western Australian Herbarium, 1979).	Highly Unlikely – not suitable habitat
Abutilon sp. *Pritzelianum* (S. van Leeuwen 5095)		Priority 3		*Abutilon* sp. *Pritzelianum* grows on red sand dunes.	Highly Unlikely – not sand dune habitat
Dolichocarpa sp. Hamersley Station (A.A. Mitchell PRP 1479)		Priority 3		*Dolichocarpa* sp. Hamersley Station grows in cracking clay, basalt on gently undulating plain with large surface rocks, flat crabholed plain.	Highly Unlikely – not suitable habitat
Eragrostis crateriformis		Priority 3		*Eragrostis crateriformis* grows in clayey loam or clay on creek banks, depressions.	Highly Unlikely – not suitable habitat
Euphorbia clementii		Priority 3		*Euphorbia clementii* occurs on gravelly hillsides, stony grounds.	Highly Unlikely – not suitable habitat
Euploca mutica		Priority 3		*Euploca mutica* is recorded from flat sand plains (Western Australian Herbarium, 2012).	Possible – habitat may occur on the site
Gomphrena leptophylla		Priority 3		*Gomphrena leptophylla* grows in sand, sandy to clayey loam, granite, quartzite on open flats, sandy creek beds, edges salt pans and marshes, stony hillsides.	Unlikely – not typical habitat
Goodenia obscurata		Priority 3		*Goodenia obscurata* occurs on floodplains or low rocky ridges, growing in red-brown sandy clay or lateritic loam over banded ironstone (Shepherd and Lepschi, 2023).	Highly Unlikely – not suitable habitat
Gymnanthera cunninghamii		Priority 3		*Gymnanthera cunninghamii* occurs in sandy soils.	Possible – habitat may occur on the site

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Nicotiana umbratica		Priority 3		*Nicotiana umbratica* occurs in shallow soils near rocky outcrops.	Highly Unlikely – not suitable habitat
Phyllanthus hebecarpus		Priority 3		*Phyllanthus hebecarpus* is recorded from a granite outcrop in red sandy loam (Western Australian Herbarium, 2013).	Highly Unlikely – not suitable habitat
Rothia indica subsp. *australis*		Priority 3		*Rothia indica* subsp. *australis* occurs in sandy soils on sandhills and sandy flats.	Unlikely – not typical habitat
Stylidium weeliwolli		Priority 3		*Stylidium weeliwolli* grows in gritty sand soil, sandy clay on the edge of watercourses.	Highly Unlikely – not suitable habitat
Terminalia supranitifolia		Priority 3		*Terminalia supranitifolia* grows in sand among basalt rocks.	Highly Unlikely – not suitable habitat
Triodia basitricha	Pilbara Curly Spinifex	Priority 3		Pilbara Curly Spinifex occurs on slopes or crests of rocky hills (Barrett and Barrett, 2015).	Highly Unlikely – not suitable habitat
Triodia chichesterensis		Priority 3		*Triodia chichesterensis* occurs in rocky to gravelly substrates of loam or sand, often with quartzite pieces evident on the surface (Anderson et al., 2017).	Highly Unlikely – not suitable habitat
Vigna triodiophila		Priority 3		*Vigna triodiophila* occurs in basalt rockpile habitats in the northwest of the Pilbara bioregion (Holland and Butcher, 2016).	Highly Unlikely – not suitable habitat
Bulbostylis burbidgeae		Priority 4		Bulbostylis burbidgeae grows in granitic soils on granite outcrops, cliff bases.	Unlikely – not typical habitat
Ptilotus mollis		Priority 4		Ptilotus mollis occur son stony hills and screes.	Highly Unlikely – not suitable habitat

* sourced from Florabase as well as the DBCA database searches unless otherwise denoted

3.3 Flora

A total of 34 plant species were recorded on the site including 19 native and 15 (44.1%) introduced species. Some of the Acacia species may have been planted in the old workers' camp site, however as all the species occur naturally in the Port Hedland region they have been treated as locally native to the site.

The high percentage of introduced species (44%) reflects the overall condition of the vegetation on the site which has been previously cleared and planted the old workers' camp planted with exotic species.

Two tree species, *Eucalyptus camaldulensis* and *Melaleuca leucadendra* native to the Pilbara area were recorded on the site. These trees are considered to have been planted or have established from nearby garden plants.

The plant Family with the greatest number of species was the Fabaceae (15 species - 13 native and one non-native) including 10 species of *Acacia*.

3.4 Vegetation Complexes

Vegetation Complexes are a broad level of vegetation description which is based on the underlying geomorphology and rainfall (Heddle *et al*., 1980). The site is mapped as Abydos Plain_647 which is described as:

> *Hummock grassland with scattered shrubs or mallee Triodia spp. Acacia spp., Grevillea spp. Eucalyptus spp* (Shepherd *et al.,* 2002).

3.5 Vegetation Types

Vegetation types are a finer level of vegetation description and mapping used for small scale sites, such as the survey area. Vegetation types are described based on the structure of the vegetation (eg. woodland, heath) and the dominant species in each structure.

Two native vegetation types were described and mapped on the site as well as one non-native vegetation type (Figure 3). The vegetation types are described in Table 3. * denotes exotic species.

pgv ENVIRONMENTAL

Table 3: Vegetation Types on the Site

Vegetation Type		Description	Photograph
As	*Acacia sclerosperma* Tall Open Shrubland over *Acacia stellaticeps* Low Open Shrubland over **Cenchrus setiger/Triodia epactia* Open Grassland	Occurs at the eastern end of the site. *Acacia sclerosperma* is the dominant tall shrub which is around 2-2.5m in the area previously cleared and up to 4-5m inside the fenced old camp site. *Acacia stellaticeps* is the main low shrub at around 0.m high and averaging 1% cover. The grass cover is a mix of native *Triodia epactia* and the introduced *Cenchrus setiger* (Birdwood Grass). The shrub and grass cover is far less dense in the old camp site. The soils are orange-red sandy loam. Quadrat SH1 is representative of this vegetation type	
Sf	**Sesbania formosa* Shrubland over **Cenchrus setiger/Triodia epactia* Grassland	This vegetation type is similar to the As type but with the introduced *Sesbania formosa* the dominant shrub averaging 1.5-2m high and around 20% cover. The composition of the lower shrubs and grasses is the same as for the As vegetation type. The soils are orange-red sandy loam. Quadrat SH2 is representative of this vegetation type	

Vegetation Type	Description	Photograph
Ex Exotic Trees	The vegetation that currently occurs in the area once occupied by the workers' camp buildings and paths contains mostly planted and exotic tree and shrub species such as River Red Gum (*Eucalyptus camaldulensis*), Cape Lilac (*Melia azedarach*), Broadleaf Paperbark (*Melaleuca leucadendra*) and Bottlebrush (*Callistemon* Kings Park Special). A large number of Acacia species were recorded in this area, some of which would be native to the site such as *A. stellaticeps*, and others may have been planted.	

3.6 Vegetation Condition

The condition of the vegetation was assessed according to the system devised by Keighery and described in Bush Forever (Government of Western Australia, 2000) (Table 4).

Table 4: Vegetation Condition Rating Scale.

Condition	Description
Pristine	Pristine or nearly so, no obvious signs of disturbance.
Excellent	Vegetation structure intact, disturbance affecting individual species and weeds are non-aggressive species.
Very Good	Vegetation structure altered, obvious signs of disturbance. For example, disturbance to vegetation structure caused by repeated fires, the presence of some more aggressive weeds, dieback, logging and grazing.
Good	Vegetation structure significantly altered by very obvious signs of multiple disturbance. Retains basic vegetation structure or ability to regenerate it. For example, disturbance to vegetation structure caused by very frequent fires, the presence of some very aggressive weeds at high density, partial clearing, dieback and grazing.
Degraded	Basic vegetation structure severely impacted by disturbance. Scope for regeneration but not to a state approaching good condition without intensive management. For example, disturbance to vegetation structure caused by very frequent fires, the presence of very aggressive weeds, partial clearing, dieback and grazing.
Completely Degraded	The structure of the vegetation is no longer intact and the area is completely or almost completely without native species. These are often described as 'parkland cleared' with the flora comprising weed or crop species with isolated native trees or shrubs.

Source: Government of Western Australia, 2000.

The vegetation on the site was rated as Degraded and Completely Degraded. The Degraded areas contained a high percentage cover of weedy species, particularly Buffel Grass, Birdwood Grass and Kapok (*Aerva javanica*), but also contained some native shrub and herb species. Completely Degraded areas included the cleared tracks, areas that were previously developed and the areas where native species were absent or almost absent.

3.7 Conservation Significance of Vegetation and Flora

3.7.1 Vegetation

Vegetation Complexes

Abydos Plain_647 occurs on the site. There is a total of 184,590.14ha of Abydos Plain_647 remaining which is 97.81% of the pre-European extent of this complex (DBCA, 2015). There is 124,395ha in secure reserves which is 14% of the current extent that is protected for conservation (DBCA, 2015).

The percentage retention is above EPA's target for minimum 30% retention of vegetation complexes State-wide.

The Degraded and Completely Degraded vegetation has no conservation significance in terms of protecting good quality vegetation within the vegetation complex.

Threatened and Priority Ecological Communities

The site is too degraded to be representative of any TEC or PEC and there are no TECs or PECs recorded in the region so the vegetation is not representative of a TEC or PEC.

3.7.2 Flora

No Threatened or Priority species were recorded on the site and Priority species identified as having habitat on the site are perennial species so would have been recognisable at the time of the survey. No conservation significant species are likely to occur on the site.

There were no Declared Pests under the *Biosecurity and Agriculture Management Act 2007* or Weeds of National Significance (WoNS) recorded on the site

3.8 Tree Retention

There are very few trees on the site, however the retention of the large Washington Palm (*Washingtonia filifera*) (Plate 6) and some of the River Red Gums (*Eucalyptus camaldulensis*) and Paperbark (*Melaleuca leucadendra*) (Plate 7) would provide some amenity to the future development.

Plate 6: Washington Palm

Plate 7: River Red Gum and Paperbark

4 BASIC FAUNA SURVEY

4.1 Methodology

A Basic Fauna Survey was undertaken in accordance with EPA Technical Guidance *Fauna Surveys for Environmental Impact Assessment* (EPA, 2020). Desktop studies were undertaken to identify habitats and potential threatened species that may occur on the site.

Searches of the following databases were undertaken prior to the site survey:

- DBCA Threatened and Priority Fauna Database (Appendix 5) for a radius of 30 km that provides a list of Threatened and Priority species recorded in the area (Reference 08-0125FA);
- Atlas of Living Australia (ALA, 2025) which shows all species that have been recorded within a 10km radius of the site (Appendix 2).
- The EPBC Act Protected Matters Search Tool (DCCEEW, 2025) (Appendix 3) which identifies species that are listed under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) that could potentially have habitat within a 5km radius of the site.

A site reconnaissance was conducted by PGV Environmental on 12 December 2024 to describe the fauna habitats on the sites. Desktop studies were undertaken to identify habitats and potential threatened species that may occur on the site. The likelihood of the site providing habitat to identified conservation significant fauna species was determined.

4.2 Fauna Habitats

The fauna habitats on the site consist of:

- Open shrubland habitat (Plate 8);
- Planted tree habitat (Plate 9); and
- Cleared areas.

Plate 8: Open Shrubland Habitat

Plate 9: Planted Tree Habitat

Fauna habitat can be assessed using a number of factors including, the size of the habitat, the level of habitat connectivity, availability of specific resources (e.g., tree hollows) and overall vegetation quality. The habitat was assessed according to the categories in Table 5.

Table 5: Fauna Habitat Value

Habitat Value	Description
High Quality Fauna Habitat	These areas closely approximate the vegetation mix and quality that would have been in the area prior to any disturbance. The habitat has connectivity with other habitats and is likely to contain the most natural vertebrate fauna assemblage.
Very Good Fauna Habitat	These areas show minimal signs of disturbance (e.g., grazing, clearing, fragmentation, weeds) and generally retain many of the characteristics of the habitat if it had not been disturbed. The habitat has connectivity with other habitats and fauna assemblages in these areas are likely to be minimally affected by disturbance.
Good Fauna Habitat	These areas showed signs of disturbance (e.g., grazing, clearing, fragmentation, weeds) but generally retain many of the characteristics of the habitat if it had not been disturbed. The habitat has connectivity with other habitats and fauna assemblages in these areas are likely to be affected by disturbance.
Disturbed Fauna Habitat	These areas showed signs of significant disturbance. Many of the trees, shrubs and undergrowth are cleared. These areas may be in the early succession and regeneration stages. Areas may show signs of significant grazing, contain weeds or have been damaged by vehicle or machinery. Habitats are fragmented or have limited connectivity with other fauna habitats. Fauna assemblages in these areas are likely to differ significantly from what might be expected in the area had the disturbance not occurred.
Highly Degraded Fauna Habitat	These areas often have a significant loss of vegetation, an abundance of weeds, and a large number of vehicle tracks or are completely cleared. Limited or no fauna habitat connectivity. Faunal assemblages in these areas are likely to be significantly different to what might have been in the area pre-disturbance.

From: Coffey Environments, 2009

The habitat is Completely Degraded vegetation with little connectivity to surrounding habitats and therefore is considered to be Highly Degraded Fauna Habitat.

4.3 Database Searches for Conservation Significant Fauna Species

Outlined below in Table 6 is a short description of the preferred habitat for each of the species that were identified in the database searches for the sites located on the Pinjarra Refinery and the species identified and their preferred habitats for the database searches for the Wagerup Refinery are in Table 8. The preferred habitat has been compared to the habitats on the site described above and the likelihood of each species to be present was determined. Species recorded in the database search results that live in the ocean or birds that are marine and pelagic have not been included in the assessment. Conservation codes are in Appendix 5.

There were no Threatened or Priority species identified that have suitable habitat on the site.

There was habitat on the site for the following species:

- *Hirundo rustica* (Barn Swallow), Migratory in Western Australia and Marine/Migratory under the EPBC Act; and
- *Merops ornatus* (Rainbow Bee-eater), Marine under the EPBC Act.

Both species may be intermittent visitors to the site but are unlikely to rely on the site for survival.

Table 6: Identified Significant Fauna Species and Likelihood of Occurring on the Site

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Calidris ferruginea	Curlew Sandpiper	Critically Endangered	Critically Endangered	Curlew Sandpipers mainly occur on intertidal mudflats in sheltered coastal areas, such as estuaries, bays, inlets and lagoons, and also around non-tidal swamps, lakes and lagoons near the coast, and ponds in saltworks and sewage farms.	Highly Unlikely – not suitable habitat
Calidris tenuirostris	Great Knot	Critically Endangered	Vulnerable/ Marine/ Migratory	The Great Knot winters in Australia, occurring in sheltered coastal habitats such as inlets, bays, harbours, estuaries and lagoons with large intertidal mud and sandflats, oceanic sandy beaches with nearby mudflats, sandy spits and islets, muddy shorelines with mangroves and occasionally exposed reefs or rock platforms. It roosts in refuges such as shallow water in sheltered sites, on coastal dunes or on saltflats amongst mangroves during high tides (BirdLife International, 2015a).	Highly Unlikely – not mangrove habitat
Limosa lapponica menzbieri	Bar-tailed Godwit (northern Siberian)	Critically Endangered	Vulnerable/ Marine/ Migratory	The Bar-tailed Godwit is found mainly in coastal habitats such as large intertidal sandflats, banks, mudflats, estuaries, inlets, harbours, coastal lagoons and bays. It is found often around beds of seagrass and, sometimes, in nearby saltmarsh.	Highly Unlikely – not suitable habitat
Numenius madagascariensis	Eastern Curlew	Critically Endangered	Critically Endangered	The Eastern Curlew is most commonly associated with sheltered coasts, especially estuaries, bays, harbours, inlets and coastal lagoons, with large intertidal mudflats or sandflats, often with beds of seagrass. Occasionally, the species occurs on ocean beaches (often near estuaries), and coral reefs, rock platforms, or rocky islets.	Highly Unlikely – not suitable habitat
Pezoporus occidentalis	Night Parrot	Critically Endangered	Endangered	The night parrot is a highly elusive nocturnal ground dwelling parrot found in the arid and semi-arid zones of Australia; it is one of only three ground-dwelling parrots in Australia. The Night Parrot is known to occur within Spinifex grasslands in stony or sandy areas. Suitable habitat is characterized by the presence of large and dense clumps of	Unlikely – habitat occurs on the site however the site is too disturbed

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
				Spinifex, and it may prefer mature spinifex that is long and unburnt (OEH, 2017).	
Calidris canutus	Red Knot	Endangered	Vulnerable/ Marine/ Migratory	In Australasia the Red Knot mainly inhabit intertidal mudflats, sandflats and sandy beaches of sheltered coasts, in estuaries, bays, inlets, lagoons and harbours; sometimes on sandy ocean beaches or shallow pools on exposed wave-cut rock platforms or coral reefs.	Highly Unlikely – not suitable habitat
Charadrius mongolus	Lesser Sand Plover	Endangered	Marine/ Migratory	The Lesser Sand Plover species prefers coastal littoral and estuarine environments. It inhabits large intertidal sandflats or mudflats in sheltered bays, harbours and estuaries, and occasionally sandy ocean beaches, coral reefs, wave-cut rock platforms and rocky outcrops. It also sometime occurs in short saltmarsh or among mangroves.	Highly Unlikely – not suitable habitat
Dasyurus hallucatus	Northern Quoll	Endangered	Endangered	The Northern Quoll habitats across its range which includes rocky areas, eucalypt forest and woodlands, rainforests, sandy lowlands and beaches, shrubland, grasslands and desert.	Highly Unlikely – the site is too disturbed
Rostratula australis	Australian Painted Snipe	Endangered	Endangered Marine/ Migratory	The Australian Painted Snipe has been recorded at wetlands in all states of Australia but is most common in eastern Australia. It generally inhabits shallow terrestrial freshwater (occasionally brackish) wetlands, including temporary and permanent lakes, swamps and claypans. It also uses inundated or waterlogged grassland or saltmarsh, dams, rice crops, sewage farms and bore drains. Typical sites include a cover of vegetation, including grasses.	Highly Unlikely – not suitable habitat
Charadrius leschenaultii	Greater Sand Plover	Vulnerable	Vulnerable/ Marine/ Migratory	In Australasia, the Greater Sand Plover is almost entirely coastal, inhabiting littoral and estuarine habitats. They mainly occur on sheltered sandy, shelly or muddy beaches with large intertidal mudflats or sandbanks, as well as sandy estuarine lagoons.	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Erythrotriorchis radiatus	Red Goshawk	Vulnerable	Vulnerable	The Red Goshawk occurs in coastal and sub-coastal areas in wooded and forested lands of tropical and warm-temperate Australia .	Highly Unlikely – not suitable habitat
Falco hypoleucos	Grey Falcon	Vulnerable	Vulnerable	The Grey Falcon favours timbered lowland plains, particularly acacia shrublands that are crossed by tree-lined watercourses, but frequents other grassland and woodland habitats (Birdlife International, 2014a).	Highly Unlikely – the site is too open and degraded
Lagostrophus fasciatus fasciatus	Banded Hare-wallaby, Mernine	Vulnerable	Vulnerable	The Banded Hare-wallaby occurs in all types of habitat on the islands including dunes, grassland and heathland, however, higher densities occur in areas of thicker vegetation.	Highly Unlikely – the site is too open and degraded
Liasis olivaceus barroni	Pilbara Olive Python	Vulnerable	Vulnerable	The Olive Python (Pilbara subspecies) prefers escarpments, gorges and water holes in the ranges of the Pilbara region.	Highly Unlikely – not suitable habitat
Macroderma gigas	Ghost Bat	Vulnerable	Vulnerable	Ghost bats occur in a wide range of habitats from rainforest, monsoon and vine scrub, to open woodlands in arid areas. These habitats are used for foraging, while roost habitat is more specific. Favoured roosting sites of the ghost bat are undisturbed caves or mineshafts which have several openings (DEHP, 2015).	Highly Unlikely – not suitable habitat
Macrotis lagotis	Bilby, Dalgyte, Ninu	Vulnerable	Vulnerable	The greater Bilby is a nocturnal omnivorous marsupial that shrub species, such as *Acacia kempeana* and *A. hilliana*, which have root-dwelling larvae that provide a constant food source for the Greater Bilby. They also utilise Spinifex hummocks which are quite uniform and discrete, providing runways between hummocks, enabling easier movement and foraging.	Unlikely – habitat occurs on the site however the site is too disturbed

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Rhinonicteris aurantia (Pilbara)	Pilbara Leaf-nosed Bat	Vulnerable	Vulnerable	The Pilbara Leaf-nosed Bat is restricted to caves and mine adits (horizontal shafts) with stable, warm and humid microclimates because of its poor ability to thermos-regulate and retain water.	Highly Unlikely – not suitable habitat
Sternula nereis nereis	Australian Fairy Tern	Vulnerable	Vulnerable	The Fairy Tern (Australian) nests on sheltered sandy beaches, spits and banks above the high tide line and below vegetation.	Highly Unlikely – not suitable habitat
Actitis hypoleucos	Common Sandpiper	Migratory	Marine/ Migratory	The Common Sandpiper is mostly found around muddy margins or rocky shores. Generally the species forages in shallow water and on bare soft mud at the edges of wetlands.	Highly Unlikely – not suitable habitat
Anous stolidus	Common Noddy	Migratory	Marine/ Migratory	The Common Noddy feeds on small fish, squid, pelagic molluscs, insects and even Pandanus fruit. Most items are skimmed from the surface of the ocean by dipping and breeds on islands (Birdlife Australia, 2020).	Highly Unlikely – not suitable habitat
Apus pacificus	Fork-tailed Swift	Migratory	Marine/Migratory	The Fork-tailed Swift is almost exclusively aerial and is not known to breed in Australia. They are seen in inland plains but sometimes above foothills or in coastal areas. They often occur over cliffs and beaches and also over islands and sometimes well out to sea. They also occur over settled areas, including towns, urban areas and cities. Apus pacificus subsp. pacificus is the only subspecies to migrate to Australia.	Highly Unlikely – maty fly overhead but unlikely to land
Arenaria interpres	Ruddy Turnstone	Migratory	Vulnerable/ Marine/ Migratory	The Ruddy Turnstone is mainly found on coastal regions with exposed rock coast lines or coral reefs. It also lives near platforms and shelves, often with shallow tidal pools and rocky, shingle or gravel beaches.	Highly Unlikely – not suitable habitat
Calidris acuminata	Sharp-tailed Sandpiper	Migratory	Vulnerable/ Marine/ Migratory	The Sharp-tailed Sandpiper prefers muddy edges of shallow fresh or brackish wetlands, with inundated or emergent sedges, grass, saltmarsh or other low vegetation.	Highly Unlikely – not suitable habitat
Calidris alba	Sanderling	Migratory	Marine/ Migratory	Sanderlings occur on most of the coast from Eyre to Derby, and also around Wyndham. They are more often recorded on the south and southwest coasts, north to around southern Shark Bay, with more	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
				sparsely scattered records further north in Gascoyne and Pilbara Regions and the Kimberley Division.	
Calidris melanotos	Pectoral Sandpiper	Migratory	Marine/ Migratory	The Pectoral Sandpiper prefers shallow fresh to saline wetlands and is found at coastal lagoons, estuaries, bays, swamps, lakes, inundated grasslands, saltmarshes, river pools, creeks, floodplains and artificial wetlands.	Highly Unlikely – not suitable habitat
Calidris ruficollis	Red-necked Stint	Migratory	Marine/ Migratory	The Red-necked Stint is mostly found in coastal areas, including in sheltered inlets, bays, lagoons and estuaries with intertidal mudflats, often near spits, islets and banks and, sometimes, on protected sandy or coralline shores.	Highly Unlikely – not suitable habitat
Calidris subminuta	Long-toed Stint	Migratory	Marine/ Migratory	The Long-toed Stint prefers shallow freshwater or brackish wetlands including lakes, swamps, river floodplains, streams, lagoons and sewage ponds. The species is also fond of areas of muddy shoreline, growths of short grass, weeds, sedges, low or floating aquatic vegetation, reeds, rushes and occasionally stunted samphire.	Highly Unlikely – not suitable habitat
Charadrius veredus	Oriental Plover, Oriental Dotterel	Migratory	Marine/ Migratory	Oriental Plovers spend a few weeks in coastal habitats such as estuarine mudflats and sandbanks, on sandy or rocky ocean beaches or nearby reefs, or in near-coastal grasslands before moving to the interior to short open grasslands.	Highly Unlikely – the site is too disturbed
Chlidonias leucopterus	White-winged Black tern, White-winged Tern	Migratory	Marine/ Migratory	In Australia, the White-winged Black tern mostly inhabits fresh, brackish or saline, and coastal or subcoastal wetlands.	Highly Unlikely – not suitable habitat
Fregata ariel	Lesser Frigatebird	Migratory	Marine/ Migratory	The Lesser Frigatebird breeds on small, remote tropical and sub-tropical islands, in mangroves or bushes, and even on bare ground (Birdlife International, 2014b).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Gallinago stenura	Pin-tailed Snipe	Migratory	Marine/ Migratory	The Pin-tailed Snipe occurs most often in or at the edges of shallow freshwater swamps, ponds and lakes with emergent, sparse to dense cover of grass/sedge or other vegetation.	Highly Unlikely – not suitable habitat
Gelochelidon nilotica (Listed Marine under the EPBC Act as *Sterna nilotica*)	Gull-billed Tern	Migratory	Marine/ Migratory	The Gull-billed Tern occurs in coastal areas and breeds in colonies on lakes, marshes and coasts (including bays and earthen levees) and uses the north-western Australian coast as a non-breeding area, but it does so mainly during the dry season and also uses grasslands and inland wetlands (Birdlife International, 2015b).	Unlikely – not typical habitat and the site is too disturbed
Glareola maldivarum	Oriental Pratincole	Migratory	Marine/ Migratory	The Oriental Pratincole usually inhabits open plains, floodplains or short grassland (including farmland or airstrips), often with extensive bare areas. They often occur near terrestrial wetlands, such as billabongs, lakes or creeks, and artificial wetlands such as reservoirs, saltworks and sewage farms, especially around the margins. The species also occurs along the coast, inhabiting beaches, mudflats and islands, or around coastal lagoons.	Unlikely – not typical habitat
Hirundo rustica	Barn Swallow	Migratory	Marine/ Migratory	The Barn Swallow is recorded in open country in coastal lowlands, often near water, towns and cities and also in or over freshwater wetlands, paperbark Melaleuca woodland, mesophyll shrub thickets and tussock grassland.	Possible – habitat may occur on the site
Hydroprogne caspia (Listed as Marien under the EPBC Act as Sterna caspia)	Caspian Tern	Migratory	Marine/ Migratory	The Caspian Tern is mostly found in sheltered coastal embayments (harbours, lagoons, inlets, bays, estuaries and river deltas) and those with sandy or muddy margins are preferred.	Highly Unlikely – not suitable habitat
Limosa lapponica	Bar-tailed Godwit	Migratory	Marine/ Migratory	The Bar-tailed Godwit is found mainly in coastal habitats such as large intertidal sandflats, banks, mudflats, estuaries, inlets, harbours, coastal lagoons and bays.	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Limosa limosa	Black-tailed Godwit	Migratory	Endangered /Migratory/ Marine	The Black-tailed Godwit is found mainly in coastal habitats such as large intertidal sandflats, banks, mudflats, estuaries, inlets, harbours, coastal lagoons and bays. It is found often around beds of seagrass and, sometimes, in nearby saltmarsh.	Highly Unlikely – not suitable habitat
Motacilla cinerea	Grey Wagtail	Migratory	Migratory/ Marine	The Grey Wagtail is mostly recorded in coastal areas in Western Australia (ALA, 2015) however is widespread. There is non-breeding habitat only in Australia and the species has a strong association with water, particularly rocky substrates along water courses but also lakes and marshes.	Highly Unlikely – not suitable habitat
Motacilla flava	Yellow Wagtail	Migratory	Migratory/ Marine	The Yellow Wagtail is an insectivorous bird that inhabits open country near water, such as wet meadows (Birdlife International, 2014c).	Highly Unlikely – not suitable habitat
Numenius minutus	Little Curlew, Little Whimbrel	Migratory	Marine/ Migratory	The Little Curlew congregates around pools, river beds and water-filled tidal channels, and shallow water at edges of billabongs. The species prefers pools with bare dry mud (including mudbanks in shallow water).	Highly Unlikely – not suitable habitat
Numenius phaeopus	Whimbrel	Migratory	Marine/ Migratory	The Whimbrel is often found on the intertidal mudflats of sheltered coasts. It is also found in harbours, lagoons, estuaries and river deltas, often those with mangroves, but also open, un-vegetated mudflats.	Highly Unlikely – not suitable habitat
Onychoprion anaethetus	Bridled Tern	Migratory	Marine/ Migratory	Bridled Terns are only rarely found in inshore continental waters and along mainland coastlines.	Highly Unlikely – not suitable habitat
Pandion haliaetus	Osprey	Migratory	Marine/ Migratory	Ospreys occur in littoral and coastal habitats and terrestrial wetlands of tropical and temperate Australia and offshore islands. They feed on fish, especially mullet where available, and rarely take molluscs, crustaceans, insects, reptiles, birds and mammals.	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Phalaropus lobatus	Red-necked Phalarope	Migratory	Migratory/ Marine	During non-breeding period the Red-necked Phalarope occurs mainly at sea. In Australia it is recorded at both inland and coastal lakes/swamps, including highly saline waters and artificial wetlands notably salt fields.	Highly Unlikely – not suitable habitat
Plegadis falcinellus	Glossy Ibis	Migratory	Marine/Migratory	The Glossy Ibis is the smallest ibis known in Australia. This species preferred habitat for foraging and breeding are fresh water marshes at the edges of lakes and rivers, lagoons, flood-plains, wet meadows, swamps, reservoirs, sewage ponds, rice-fields and cultivated areas under irrigation but do not breed in South-west Western Australia.	Highly Unlikely – not suitable habitat
Pluvialis fulva	Pacific Golden Plover	Migratory	Marine/ Migratory	Pacific Golden Plovers usually occur on beaches, mudflats and sandflats (sometimes in vegetation such as mangroves, low saltmarsh such as *Sarcocornia*, or beds of seagrass) in sheltered areas including harbours, estuaries and lagoons, and also in evaporation ponds in salt works.	Highly Unlikely – not suitable habitat
Pluvialis squatarola	Grey Plover	Migratory	Vulnerable/ Marine/ Migratory	Grey Plovers occur almost entirely in coastal areas, where they usually inhabit sheltered embayments, estuaries and lagoons with mudflats and sandflats, and occasionally on rocky coasts with wave-cut platforms or reef-flats, or on reefs within muddy lagoons.	Highly Unlikely – not suitable habitat
Sternula albifrons (Listed marine under the EPBC Act as *Sterna albifrons*)	Little Tern	Migratory	Marine/ Migratory	In Australia, Little Terns inhabit sheltered coastal environments, including lagoons, estuaries, river mouths and deltas, lakes, bays, harbours and inlets, especially those with exposed sandbanks or sand-spits, and also on exposed ocean beaches .	Highly Unlikely – not suitable habitat
Thalasseus bergii (Sterna bergii)	Crested Tern	Migratory	Marine/ Migratory	The Crested Tern occurs in coastal areas and forages in the shallow waters of lagoons, coral reefs, estuaries, bays, harbours and inlets, along sandy, rocky, coral or muddy shores, on rocky outcrops in open sea, in mangrove swamps and also far out to sea on open water and prefers to nest offshore (Birdlife Australia, 2018).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Tringa brevipes (Listed as marine under the EPBC Act as *Heteroscelus brevipes*)	Grey-tailed Tattler	Migratory/ Priority 4	Marine/ Migratory	The Grey-tailed Tattler is often found on sheltered coasts with reefs and rock platforms or with intertidal mudflats. It can also be found at intertidal rocky, coral or stony reefs as well as platforms and islets that are exposed at low tide.	Highly Unlikely – not suitable habitat
Tringa glareola	Wood Sandpiper	Migratory	Marine/ Migratory	The Wood Sandpiper uses well-vegetated, shallow, freshwater wetlands, such as swamps, billabongs, lakes, pools and waterholes. They are typically associated with emergent, aquatic plants or grass, and dominated by taller fringing vegetation, such as dense stands of rushes or reeds, shrubs, or dead or live trees, especially Melaleuca and River Red Gums Eucalyptus camaldulensis and often with fallen timber.	Highly Unlikely – not suitable habitat
Tringa nebularia	Common Greenshank	Migratory	Endangered /Marine/ Migratory	The Common Greenshank is a wader and does not breed in Australia. This species can be found in many types of wetlands and has the widest distribution of any shorebird in Australia. This species typically feeds on molluscs, crustaceans, insects, and occasionally fish and frogs.	Highly Unlikely – not suitable habitat
Xenus cinereus	Terek Sandpiper	Migratory	Vulnerable/ Marine/ Migratory	The Terek Sandpiper mostly forages in the open, on soft wet intertidal mudflats or in sheltered estuaries, embayments, harbours or lagoons. The species has also been recorded on islets, mudbanks, sandbanks and spits, and near mangroves and occasionally in samphire (*Halosarcia* spp.).	Highly Unlikely – not suitable habitat
Falco peregrinus	Peregrine Falcon	Other Specially Protected Species	Marine/ Migratory	The Peregrine Falcon is found in a variety of habitats but nests on high cliff ledges or artificial structures. It feeds primarily on small-medium sized birds, but occasionally taking insects, such as moths, cicadas and locusts (Birdlife Australia, 2012).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Ardea alba	Great Egret, White Egret		Marine	The Eastern Great Egret has been reported in a wide range of wetland habitats and usually frequents shallow waters. This species feeds on fish, insects, crustaceans, molluscs, frogs, lizards, snakes and small birds and mammals.	Highly Unlikely – not suitable habitat
Bubulcus ibis	Cattle Egret		Marine	The Cattle Egret occurs in tropical and temperate grasslands, wooded lands and terrestrial wetlands with breeding in Western Australia recorded in the far north in Wyndham in colonies in wooded swamps such as mangrove forest. This species forages away from water on low lying grasslands, improved pastures and croplands generally in areas that have livestock eating insects, frog, lizards and small mammals.	Highly Unlikely – not suitable habitat
Chrysococcyx osculans	Black-eared Cuckoo		Marine	The Black-eared Cuckoo Dry open forests, scrublands, mallee, mulga, lignum, saltbush and riverside thickets, preferring to fly directly between low trees and shrubs, rather than large trees and are rare in subhumid areas (ALA, 2019).	Unlikely – the site is too disturbed
Egretta sacra	Eastern Reef Egret, Eastern Reef Heron		Marine	The Eastern Reef Egret nests in trees in island woodlands, or on the ground under shrubs or rock ledges and feeds on small fish, crustaceans and insects (Birdlife Australia, 2021).	Highly Unlikely – not suitable habitat
Haliaeetus leucogaster	White-bellied Sea-eagle		Marine	The White-bellied Sea-Eagle is found in coastal habitats with large areas of open water, especially those close to the sea-shore. This species feeds opportunistically on a variety of fish, birds, reptiles, mammals and crustaceans, and on carrion and offal.	Highly Unlikely – not suitable habitat
Himantopus himantopus	Black-winged Stilt		Marine	The Black-winged Stilt is found near coastal lagoons and shallow freshwater or brackish pools with extensive areas of mudflats, salt meadows, saltpans, coastal marshes and swamps (Birdlife International, 2014d).	Highly Unlikely – not suitable habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Larus pacificus	Pacific Gull		Marine	Australia's largest gull, the Pacific Gull occurs only along the coasts of southern Australia. Despite its name, the species is seldom seen on the Pacific coastline, and is far more common on the beaches bordering the Southern and Indian Oceans. They breed in colonies on islands, extending from the Furneaux Group in eastern Bass Strait, west to Shark Bay. Their nests may consist of either a scrape in the ground, sometimes lined with gravel, or a neat nest made from grass, sticks or seaweed (Birdlife Australia, 2015c).	Highly Unlikely – not suitable habitat
Merops ornatus	Rainbow Bee-eater		Marine	Populations of the Rainbow Bee-eater that breed in northern Australia are considered to be resident, and in many northern localities the Rainbow Bee-eater is present throughout the year. The Rainbow Bee-eater nests in a burrow dug in the ground. It is found across the better-watered parts of WA including islands preferring lightly wooded, sandy country near water.	Possible – habitat may occur but unlikely to rely on the site for survival
Recurvirostra novaehollandiae	Red-necked Avocet		Marine/ Migratory	The Red-necked Avocet occurs in wetland areas including bogs, marshes, swamps and Permanent Saline, Brackish or Alkaline Lakes (Birdlife International, 2014d).	Highly Unlikely – not suitable habitat
Thalasseus bengalensis	Lesser Crested Tern		Marine/ Migratory	The Lesser Crested Tern inhabits tropical and subtropical sandy and coral coasts and estuaries breeding on low-lying offshore islands, coral flats, sandbanks and flat sandy beaches foraging in the surf and over offshore waters (Birdlife International, 2014e).	Highly Unlikely – not suitable habitat
Ozimops cobourgianus	North-western Free-tailed Bat	Priority 1		The North-western Free-tailed Bat occurs in Mangrove areas.	Highly Unlikely – not mangrove habitat

Scientific Name	Common Name	Conservation Status (WA)	Status under EPBC Act	Habitat*	Likelihood to occur on the site
Ctenotus angusticeps	Airlie Island Ctenotus	Priority 3		The Airlie Island Ctenotus generally inhabits the landward fringe of salt marsh communities in samphire shrubland or marine couch grassland in the intertidal zone along mangrove.	Highly Unlikely – not suitable habitat
Dasycercus blythi	Brush-tailed Mulgara, Ampurta	Priority 4		The Brush-tailed Mulgara occupies spinifex (Triodia spp.) grasslands, and burrows in flats between sand dunes. It is generally a solitary species that hunts at night, although it is not strictly nocturnal (Woolley 2008).	Highly Unlikely – the site is too disturbed
Dasycercus cristicauda	Crest-tailed Mulgara, Minyiminyi	Priority 4		The Crest-tailed Mulgara occurs on sand dunes with a sparse cover of Sandhill Canegrass (*Zygochloa paradoxa*) or areas around salt lakes with Nitre Bush (*Nitraria billardieri*).	Highly Unlikely – not suitable habitat
Elanus scriptus	Letter-winged Kite	Priority 4		The Letter-winged Kite is found in open or sparsely wooded country (Johnstone and Storr, 1998).	Highly Unlikely – not suitable habitat
Leggadina lakedownensis	Lakeland Downs Mouse, Kerakenga	Priority 4		The Lakeland Downs Mouse occurs in *Acacia* shrublands and low shrublands on deep sandy soil.	Highly Unlikely – the site is too disturbed
Pseudomys chapmani	Western Pebble-mound Mouse, Ngadji	Priority 4		The Western Pebble-mound Mouse is a small rodent that inhabits rocky, hummock grassland areas with little or no soil in which to burrow but with plentiful supply of pebbles (Dunlop and Pound, 1981).	Highly Unlikely – not suitable habitat

* Sourced from the SPRAT Database (DoEE, 2018) unless otherwise indicated

4.4 Pest Fauna

There are several pest species that are likely to be present on the site outlined in Table 7.

Table 7: Pest Species Likely to Occur on the Site

Taxa	Family	Species Name	Common Name
Mammalia	Canidae	*Vulpes vulpes*	Red fox
	Felidae	*Felis catus*	Feral cat
	Leporidae	*Oryctolagus cuniculus*	European Rabbit
	Muridae	*Mus musculus*	House Mouse
		Rattus rattus	Black Rat

4.5 Biodiversity Value

The EPA's (2002) *Terrestrial Biological Surveys as an Element of Biodiversity Protection Position Statement No. 3* indicated an ecological assessment of a site must consider its biodiversity value at the genetic, species and ecosystem levels; and its ecological functional value at the ecosystem level. The vegetation on the site is highly disturbed, with the likely presence of feral species such as foxes, cats and rabbits which would have modified the fauna assemblage from pre-European settlement.

5 Environmental Approvals

5.1 State

5.1.1 *Environmental Protection Act 1986*

Development Applications or subdivisions can be referred to the Environmental Protection Authority (EPA) by the responsible authority for a decision by the EPA on whether to assess them under the formal environmental impact assessment (EIA) process. If it was to be referred it is highly unlikely that a formal assessment would be required.

5.1.2 Clearing Permit

The clearing of native vegetation in Western Australia requires a clearing permit under the *Environmental Protection Act 1986* (EP Act) unless an exemption applies.

Native vegetation does not include vegetation that was planted, unless that planting was required under the EP Act. The planted trees and shrubs would not have been planted as a requirement of any assessment under the EP Act. Therefore, the vegetation on the western part of the site, mapped as the Ex vegetation type, is not classified as native vegetation and a clearing permit is not required for the planted trees and shrubs.

Native vegetation occurs on the eastern part of the site and if there is no applicable exemption a clearing permit would be required.

The first type of exemption is a Schedule 6 of the EP Act exemption. There are 14 Clauses in Schedule 6 that could result in an exemption. The most likely Schedule 6 exemption that would be applied would be a subdivision approval. An approved subdivision that has conditions that would require clearing for development provides an exemption from a clearing permit.

The second type of exemption are those included in the *Environmental Protection (Clearing of Native Vegetation) Regulations 2004* (the Regulations). There are 25 Items under the Regulations that could result in an exemption. Item 1 Regulation 5 allows the clearing of less than 5ha in a calendar year for the lawful construction of a building or structure. This exemption may apply to the proposed development.

The exemption does not apply in Environmentally Sensitive Areas (ESA) or for the clearing of riparian (wetland) vegetation. The site is not mapped as an ESA and is not riparian vegetation so the exemptions under the regulations would apply.

5.2 Commonwealth

The Barn Swallow and Rainbow Bee-eater are listed under the Commonwealth EPBC Act. While these two species may intermittently occur on the site they would not rely on it for survival and would not be significantly impacted by the proposed development. Therefore, a referral under the EPBC Act should not be required.

6 SUMMARY AND CONCLUSION

6.1 Summary

The Flora, Vegetation and Fauna survey of Lot 51 Parker Street, South Hedland found the following:

- The western half of the site has previously been cleared for a worker's camp that has since been demolished. The eastern half was mostly cleared around 2004 and has since regrown;
- A total of 34 plant species were recorded on the site including 19 native and 15 (44.1%) introduced species;
- No Threatened or Priority flora were recorded on the site;
- Three vegetation types were recorded and mapped on the site, including two vegetation types with native species and one vegetation type in the old workers' camp site primarily dominated by introduced species;
- Buffel Grass and Birdwood Grass very common over all vegetated parts of the site;
- There was one large Washington Palm and some mature River Red Gums and Paperbark trees that could be considered for retention;
- The vegetation was rated as Degraded to Completely Degraded due to the sparsity of native shrubs and density of introduced grasses;
- The fauna habitat on the site is considered Highly Degraded Fauna Habitat;
- The Barn Swallow (*Hirundo rustica*) and Rainbow Bee-eater (*Merops ornatus*) may potentially utilise some sections of the site as part of a much larger home range though only likely to occur infrequently.

6.2 Conclusion

The flora, vegetation and fauna values of Lot 51 Parker Street South Hedland have been impacted by past clearing and development of most of the site for a worker's camp. The vegetation is Degraded to Completely Degraded and does not have any conservation significance for Threatened or Priority flora species or Threatened and Priority Ecological Communities. The fauna habitat values have been significantly impacted. The site is not likely to provide significant habitat for conservation significant fauna.

Future development of the site is not constrained by the environmental values of the site.

Vegetation Condition

- Degraded
- Completely Degraded

Vegetation Condition
(SOURCE: Bush Forever, Govt. of W.A., 2000)

P - Pristine
Pristine or nearly so, no obvious signs of disturbance.

Ex - Excellent
Vegetation structure intact, disturbance affecting individual species and weeds are non aggressive species.

VG - Very Good
Vegetation structure altered, obvious signs of disturbance. For example, disturbance to vegetation structure caused by repeated fires, the presence of some more aggressive weeds, dieback, logging and grazing.

G - Good
Vegetation structure significantly altered by very obvious signs of multiple disturbance. Retains basic vegetation structure or ability to regenerate it. For example, disturbance to vegetation structure caused by very frequent fires, the presence of some very aggressive weeds at high density, partial clearing, dieback and grazing.

D - Degraded
Basic vegetation structure severely impacted by disturbance. Scope for regeneration but not to a state approaching good condition without intensive management. For example, disturbance to vegetation structure caused by very frequent fires, the presence of very aggressive weeds, partial clearing, dieback and grazing.

CD - Completely Degraded
The structure of the vegetation is no longer intact and the areas is completely or almost completely without native species. These areas are often described as 'parkland cleared' with the flora composing weed or crop species with isolated native trees or shrubs.

CI - Cleared
No native vegetation remaining.

APPENDIX 3

Protected Matters Search Tool Report

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected. Please see the caveat for interpretation of information provided here.

Report created: 09-Jan-2025

Summary
Details
- Matters of NES
- Other Matters Protected by the EPBC Act
- Extra Information

Summary

Matters of National Environment Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the Administrative Guidelines on Significance.

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance (Ramsar	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	None
Listed Threatened Ecological Communities:	None
Listed Threatened Species:	28
Listed Migratory Species:	39

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at https://www.dcceew.gov.au/parks-heritage/heritage

A permit may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Lands:	37
Commonwealth Heritage Places:	None
Listed Marine Species:	33
Whales and Other Cetaceans:	5
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Australian Marine Parks:	None
Habitat Critical to the Survival of Marine Turtles:	1

Extra Information

This part of the report provides information that may also be relevant to the area you have

State and Territory Reserves:	None
Regional Forest Agreements:	None
Nationally Important Wetlands:	None
EPBC Act Referrals:	23
Key Ecological Features (Marine):	None
Biologically Important Areas:	2
Bioregional Assessments:	None
Geological and Bioregional Assessments:	None

Details

Matters of National Environmental Significance

Listed Threatened Species			[Resource Information]
Status of Conservation Dependent and Extinct are not MNES under the EPBC Act. Number is the current name ID.			
Scientific Name	Threatened Category	Presence Text	Buffer Status
BIRD			
Calidris acuminata Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat known to occur within area	In feature area
Calidris canutus Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area	In feature area
Calidris ferruginea Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Charadrius leschenaultii Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area	In feature area
Erythrotriorchis radiatus Red Goshawk [942]	Endangered	Species or species habitat may occur within area	In feature area
Falco hypoleucos Grey Falcon [929]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Limnodromus semipalmatus Asian Dowitcher [843]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Limosa lapponica menzbieri Northern Siberian Bar-tailed Godwit, Russkoye Bar-tailed Godwit [86432]	Endangered	Species or species habitat known to occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Macronectes giganteus Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area	In buffer area only
Numenius madagascariensis Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area	In feature area
Pezoporus occidentalis Night Parrot [59350]	Endangered	Species or species habitat may occur within area	In feature area
Phaethon rubricauda westralis Red-tailed Tropicbird (Indian Ocean), Indian Ocean Red-tailed Tropicbird [91824]	Endangered	Species or species habitat likely to occur within area	In buffer area only
Rostratula australis Australian Painted Snipe [77037]	Endangered	Species or species habitat may occur within area	In feature area
Tringa nebularia Common Greenshank, Greenshank [832]	Endangered	Species or species habitat likely to occur within area	In feature area
MAMMAL			
Dasyurus hallucatus Northern Quoll, Digul [Gogo-Yimidir], Wijingadda [Dambimangari], Wiminji [Martu] [331]	Endangered	Species or species habitat known to occur within area	In feature area
Macroderma gigas Ghost Bat [174]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Macrotis lagotis Greater Bilby [282]	Vulnerable	Species or species habitat likely to occur within area	In feature area
Rhinonicteris aurantia (Pilbara form) Pilbara Leaf-nosed Bat [82790]	Vulnerable	Species or species habitat may occur within area	In feature area
REPTILE			
Caretta caretta Loggerhead Turtle [1763]	Endangered	Species or species habitat known to occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
Chelonia mydas Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area	In buffer area only
Dermochelys coriacea Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour likely to occur within area	In buffer area only
Eretmochelys imbricata Hawksbill Turtle [1766]	Vulnerable	Species or species habitat known to occur within area	In buffer area only
Liasis olivaceus barroni Pilbara Olive Python [66699]	Vulnerable	Species or species habitat may occur within area	In feature area
Natator depressus Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area	In buffer area only
SHARK			
Pristis clavata Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area	In buffer area only
Pristis pristis Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area	In feature area
Pristis zijsron Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Breeding likely to occur within area	In buffer area only
Sphyrna lewini Scalloped Hammerhead [85267]	Conservation Dependent	Species or species habitat likely to occur within area	In buffer area only

Listed Migratory Species		[Resource Information]	
Scientific Name	Threatened Category	Presence Text	Buffer Status
Migratory Marine Birds			
Anous stolidus Common Noddy [825]		Species or species habitat may occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
[Apus pacificus](#) Fork-tailed Swift [678]		Species or species habitat likely to occur within area	In feature area
[Calonectris leucomelas](#) Streaked Shearwater [1077]		Species or species habitat may occur within area	In buffer area only
[Fregata ariel](#) Lesser Frigatebird, Least Frigatebird [1012]		Species or species habitat known to occur within area	In buffer area only
[Macronectes giganteus](#) Southern Giant-Petrel, Southern Giant Petrel [1060]	Endangered	Species or species habitat may occur within area	In buffer area only
[Phaethon lepturus](#) White-tailed Tropicbird [1014]		Species or species habitat likely to occur within area	In buffer area only
Migratory Marine Species			
[Anoxypristis cuspidata](#) Narrow Sawfish, Knifetooth Sawfish [68448]		Species or species habitat likely to occur within area	In buffer area only
[Balaenoptera edeni](#) Bryde's Whale [35]		Species or species habitat may occur within area	In buffer area only
[Caretta caretta](#) Loggerhead Turtle [1763]	Endangered	Species or species habitat known to occur within area	In buffer area only
[Chelonia mydas](#) Green Turtle [1765]	Vulnerable	Foraging, feeding or related behaviour known to occur within area	In buffer area only
[Crocodylus porosus](#) Salt-water Crocodile, Estuarine Crocodile [1774]		Species or species habitat may occur within area	In feature area
[Dermochelys coriacea](#) Leatherback Turtle, Leathery Turtle, Luth [1768]	Endangered	Foraging, feeding or related behaviour likely to occur within area	In buffer area only

Scientific Name	Threatened Category	Presence Text	Buffer Status
[Eretmochelys imbricata](#) Hawksbill Turtle [1766]	Vulnerable	Species or species habitat known to occur within area	In buffer area only
[Megaptera novaeangliae](#) Humpback Whale [38]		Species or species habitat known to occur within area	In buffer area only
[Mobula alfredi as Manta alfredi](#) Reef Manta Ray, Coastal Manta Ray [90033]		Species or species habitat known to occur within area	In buffer area only
[Mobula birostris as Manta birostris](#) Giant Manta Ray [90034]		Species or species habitat likely to occur within area	In buffer area only
[Natator depressus](#) Flatback Turtle [59257]	Vulnerable	Foraging, feeding or related behaviour known to occur within area	In buffer area only
[Orcaella heinsohni](#) Australian Snubfin Dolphin [81322]		Species or species habitat may occur within area	In buffer area only
[Pristis clavata](#) Dwarf Sawfish, Queensland Sawfish [68447]	Vulnerable	Species or species habitat known to occur within area	In buffer area only
[Pristis pristis](#) Freshwater Sawfish, Largetooth Sawfish, River Sawfish, Leichhardt's Sawfish, Northern Sawfish [60756]	Vulnerable	Species or species habitat may occur within area	In feature area
[Pristis zijsron](#) Green Sawfish, Dindagubba, Narrowsnout Sawfish [68442]	Vulnerable	Breeding likely to occur within area	In buffer area only
[Sousa sahulensis as Sousa chinensis](#) Australian Humpback Dolphin [87942]		Species or species habitat may occur within area	In buffer area only
[Tursiops aduncus (Arafura/Timor Sea populations)](#) Spotted Bottlenose Dolphin (Arafura/Timor Sea populations) [78900]		Species or species habitat known to occur within area	In buffer area only

Migratory Terrestrial Species

Scientific Name	Threatened Category	Presence Text	Buffer Status
[Hirundo rustica](#) Barn Swallow [662]		Species or species habitat known to occur within area	In feature area
[Motacilla cinerea](#) Grey Wagtail [642]		Species or species habitat may occur within area	In feature area
[Motacilla flava](#) Yellow Wagtail [644]		Species or species habitat known to occur within area	In feature area
Migratory Wetlands Species			
[Actitis hypoleucos](#) Common Sandpiper [59309]		Species or species habitat known to occur within area	In feature area
[Calidris acuminata](#) Sharp-tailed Sandpiper [874]	Vulnerable	Species or species habitat known to occur within area	In feature area
[Calidris canutus](#) Red Knot, Knot [855]	Vulnerable	Species or species habitat known to occur within area	In feature area
[Calidris ferruginea](#) Curlew Sandpiper [856]	Critically Endangered	Species or species habitat known to occur within area	In feature area
[Calidris melanotos](#) Pectoral Sandpiper [858]		Species or species habitat likely to occur within area	In feature area
[Charadrius leschenaultii](#) Greater Sand Plover, Large Sand Plover [877]	Vulnerable	Species or species habitat known to occur within area	In feature area
[Charadrius veredus](#) Oriental Plover, Oriental Dotterel [882]		Species or species habitat may occur within area	In feature area
[Glareola maldivarum](#) Oriental Pratincole [840]		Species or species habitat may occur within area	In feature area

Scientific Name	Threatened Category	Presence Text	Buffer Status
[Limnodromus semipalmatus](#) Asian Dowitcher [843]	Vulnerable	Species or species habitat likely to occur within area	In feature area
[Limosa lapponica](#) Bar-tailed Godwit [844]		Species or species habitat known to occur within area	In buffer area only
[Numenius madagascariensis](#) Eastern Curlew, Far Eastern Curlew [847]	Critically Endangered	Species or species habitat known to occur within area	In feature area
[Pandion haliaetus](#) Osprey [952]		Breeding known to occur within area	In buffer area only
[Tringa nebularia](#) Common Greenshank, Greenshank [832]	Endangered	Species or species habitat likely to occur within area	In feature area

Other Matters Protected by the EPBC Act

Commonwealth Lands [Resource Information]

The Commonwealth area listed below may indicate the presence of Commonwealth land in this vicinity. Due to the unreliability of the data source, all proposals should be checked as to whether it impacts on a Commonwealth area, before making a definitive decision. Contact the State or Territory government land department for further information.

Commonwealth Land Name	State	Buffer Status
Unknown		
Commonwealth Land - [50327]	WA	In buffer area only

Caveat

1 PURPOSE

This report is designed to assist in identifying the location of matters of national environmental significance (MNES) and other matters protected by the Environment Protection and Biodiversity Conservation Act 1999 (Cth) (EPBC Act) which may be relevant in determining obligations and requirements under the EPBC Act.

The report contains the mapped locations of:

- World and National Heritage properties;
- Wetlands of International and National Importance;
- Commonwealth and State/Territory reserves;
- distribution of listed threatened, migratory and marine species;
- listed threatened ecological communities; and
- other information that may be useful as an indicator of potential habitat value.

2 DISCLAIMER

This report is not intended to be exhaustive and should only be relied upon as a general guide as mapped data is not available for all species or ecological communities listed under the EPBC Act (see below). Persons seeking to use the information contained in this report to inform the referral of a proposed action under the EPBC Act should consider the limitations noted below and whether additional information is required to determine the existence and location of MNES and other protected matters.

Where data is available to inform the mapping of protected species, the presence type (e.g. known, likely or may occur) that can be determined from the data is indicated in general terms. It is the responsibility of any person using or relying on the information in this report to ensure that it is suitable for the circumstances of any proposed use. The Commonwealth cannot accept responsibility for the consequences of any use of the report or any part thereof. To the maximum extent allowed under governing law, the Commonwealth will not be liable for any loss or damage that may be occasioned directly or indirectly through the use of, or reliance on the contents of this report.

3 DATA SOURCES

Threatened ecological communities

For threatened ecological communities where the distribution is well known, maps are generated based on information contained in recovery plans, State vegetation maps and remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Threatened, migratory and marine species

Threatened, migratory and marine species distributions have been discerned through a variety of methods. Where distributions are well known and if time permits, distributions are inferred from either thematic spatial data (i.e. vegetation, soils, geology, elevation, aspect, terrain, etc.) together with point locations and described habitat; or modelled (MAXENT or BIOCLIM habitat modelling) using point locations and environmental data layers.

Where little information is available for a species or large number of maps are required in a short time-frame, maps are derived either from 0.04 or 0.02 decimal degree cells; by an automated process using polygon capture techniques (static two kilometre grid cells, alpha-hull and convex hull); or captured manually or by using topographic features (national park boundaries, islands, etc.).

In the early stages of the distribution mapping process (1999-early 2000s) distributions were defined by degree blocks, 100K or 250K map sheets to rapidly create distribution maps. More detailed distribution mapping methods are used to update these distributions when time permits.

4 LIMITATIONS

The following species and ecological communities have not been mapped and do not appear in this report:

- threatened species listed as extinct or considered vagrants;
- some recently listed species and ecological communities;
- some listed migratory and listed marine species, which are not listed as threatened species; and
- migratory species that are very widespread, vagrant, or only occur in Australia in small numbers.

The following groups have been mapped, but may not cover the complete distribution of the species:

- listed migratory and/or listed marine seabirds, which are not listed as threatened, have only been mapped for recorded breeding sites; and
- seals which have only been mapped for breeding sites near the Australian continent

The breeding sites may be important for the protection of the Commonwealth Marine environment.

Refer to the metadata for the feature group (using the Resource Information link) for the currency of the information.

Acknowledgements

This database has been compiled from a range of data sources. The department acknowledges the following custodians who have contributed valuable data and advice:

APPENDIX 4

Conservation Codes

Conservation Codes for Western Australian Flora and Fauna

Threatened, Extinct and Specially Protected fauna or flora are species which have been adequately searched for and are deemed to be, in the wild, threatened, extinct or in need of special protection, and have been gazetted as such.

The lists of Threatened, Extinct and Specially Protected species are listed under Part 2 of the Biodiversity Conservation Act 2016.

Categories of Threatened, Extinct and Specially Protected fauna and flora are:

T Threatened species

Listed by order of the Minister as Threatened in the category of critically endangered, endangered or vulnerable under section 19(1), or is a rediscovered species to be regarded as threatened species under section 26(2) of the *Biodiversity Conservation Act 2016* (BC Act).

> ***Threatened fauna*** is the species of fauna that are listed as critically endangered, endangered or vulnerable threatened species.
>
> ***Threatened flora*** is the species of flora that are listed as critically endangered, endangered or vulnerable threatened species.

The assessment of the conservation status of threatened species is in accordance with the BC Act listing criteria and the requirements of Ministerial Guideline (Number 1) and Ministerial Guideline (Number 2) that adopts the use of the International Union for Conservation of Nature (IUCN) Red List of Threatened Species Categories and Criteria 4, and is based on the national distribution of the species.

CR Critically endangered species

> Threatened species considered to be "*facing an extremely high risk of extinction in the wild in the immediate future, as determined in accordance with criteria set out in the ministerial guidelines*".
>
> Listed as critically endangered under section 19(1)(a) of the BC Act in accordance with the criteria set out in section 20 and the ministerial guidelines.

EN Endangered species

> Threatened species considered to be "*facing a very high risk of extinction in the wild in the near future, as determined in accordance with criteria set out in the ministerial guidelines*".
>
> Listed as endangered under section 19(1)(b) of the BC Act in accordance with the criteria set out in section 21 and the ministerial guidelines.

VU Vulnerable species

> Threatened species considered to be "*facing a high risk of extinction in the wild in the medium-term future, as determined in accordance with criteria set out in the ministerial guidelines*".

Listed as vulnerable under section 19(1)(c) of the BC Act in accordance with the criteria set out in section 22 and the ministerial guidelines.

Extinct Species

EX Presumed extinct species

Species where "*there is no reasonable doubt that the last member of the species has died*", and listing is otherwise in accordance with the ministerial guidelines (section 24 of the BC Act).

EW Extinct in the wild species

Species that "*is known only to survive in cultivation, in captivity or as a naturalised population well outside its past range; and it has not been recorded in its known habitat or expected habitat, at appropriate seasons, anywhere in its past range, despite surveys over a time frame appropriate to its life cycle and form*", and listing is otherwise in accordance with the ministerial guidelines (section 25 of the BC Act).

Currently there are no threatened fauna or threatened flora species listed as extinct in the wild. If listing of a species as extinct in the wild occurs, then a schedule will be added to the applicable notice.

Specially protected species

Listed by order of the Minister as specially protected under section 13(1) of the BC Act. Meeting one or more of the following categories: species of special conservation interest; migratory species; cetaceans; species subject to international agreement; or species otherwise in need of special protection.

Species that are listed as threatened species (critically endangered, endangered or vulnerable) or extinct species under the BC Act cannot also be listed as Specially Protected species.

MI Migratory species

Fauna that periodically or occasionally visit Australia or an external Territory or the exclusive economic zone; or the species is subject of an international agreement that relates to the protection of migratory species and that binds the Commonwealth; and listing is otherwise in accordance with the ministerial guidelines (section 15 of the BC Act).

Includes birds that are subject to an agreement between the government of Australia and the governments of Japan (JAMBA), China (CAMBA) and The Republic of Korea (ROKAMBA), and fauna subject to the Convention on the Conservation of Migratory Species of Wild Animals (Bonn Convention), an environmental treaty under the United Nations Environment Program. Migratory species listed under the BC Act are a subset of the migratory animals, that are known to visit Western Australia, protected under the international agreements or treaties, excluding species that are listed as Threatened species.

CD Species of special conservation interest (conservation dependent fauna)

Fauna of special conservation need being species dependent on ongoing conservation intervention to prevent it becoming eligible for listing as threatened, and listing is otherwise in accordance with the ministerial guidelines (section 14 of the BC Act).

Currently only fauna are listed as species of special conservation interest.

OS Other specially protected species

Fauna otherwise in need of special protection to ensure their conservation, and listing is otherwise in accordance with the ministerial guidelines (section 18 of the BC Act).

Currently only fauna are listed as species otherwise in need of special protection.

P Priority species

Priority is not a listing category under the BC Act.

All fauna and flora are protected in WA following the provisions in Part 10 of the BC Act. The protection applies even when a species is not listed as threatened or specially protected, and regardless of land tenure (State managed land (Crown land), private land, or Commonwealth land).

Species that may possibly be threatened species that do not meet the criteria for listing under the BC Act because of insufficient survey or are otherwise data deficient, are added to the Priority Fauna or Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of prioritisation for survey and evaluation of conservation status so that consideration can be given to potential listing as threatened.

Species that are adequately known, meet criteria for near threatened, or are rare but not threatened, or that have been recently removed from the threatened species list or conservation dependent or other specially protected fauna lists for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring.

Assessment of priority status is based on the Western Australian distribution of the species, unless the distribution in WA is part of a contiguous population extending into adjacent States, as defined by the known spread of locations.

Priority 1: Poorly-known species

Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either: very small; or on lands not managed for conservation, for example, agricultural or pastoral lands, urban areas, road and rail reserves, gravel reserves and active mineral leases; or otherwise under threat of habitat destruction or degradation.

Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements for threatened listing and appear to be under immediate threat from known threatening processes. These species are in urgent need of further survey.

Priority 2: Poorly-known species

Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, for example, national parks, conservation parks, nature reserves and other lands with secure tenure being managed for conservation.

Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements for threatened listing and appear to be under threat from known threatening processes. These species are in urgent need of further survey.

Priority 3: Poorly-known species

Species that are known from several locations and the species does not appear to be under imminent threat or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat.

Species may be included if they are comparatively well known from several locations but do not meet adequacy of survey requirements and known threatening processes exist that could affect them. These species need further survey.

Priority 4: Rare, Near Threatened and other species in need of monitoring

(a) Rare. Species that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection but could be if present circumstances change. These species are usually represented on conservation lands.

(b) Near Threatened. Species that are considered to have been adequately surveyed and that are close to qualifying for vulnerable but are not listed as a conservation dependent specially protected species.

(c) Species that have been removed from the list of threatened species or lists of conservation dependent or other specially protected species, during the past five years for reasons other than taxonomy.

(d) Other species in need of monitoring.

Western Australian Ecological Communities

<u>Threatened Ecological Communities</u>

The BC Act provides for the statutory listing of threatened ecological communities (TECs) by the Minister.

Presumed Totally Destroyed (PD)

An ecological community that has been adequately searched for but for which no representative occurrences have been located. The community has been found to be totally

destroyed or so extensively modified throughout its range that no occurrence of it is likely to recover its species composition and/or structure in the foreseeable future.

Critically Endangered (CR)

An ecological community that has been adequately surveyed and found to have been subject to a major contraction in area and/or that was originally of limited distribution and is facing severe modification or destruction throughout its range in the immediate future, or is already severely degraded throughout its range but capable of being substantially restored or rehabilitated.

Endangered (EN)

An ecological community that has been adequately surveyed and found to have been subject to a major contraction in area and/or was originally of limited distribution and is in danger of significant modification throughout its range or severe modification or destruction over most of its range in the near future.

Vulnerable (VU)

An ecological community that has been adequately surveyed and is found to be declining and/or has declined in distribution and/or condition and whose ultimate security has not yet been assured and/or a community that is still widespread but is believed likely to move into a category of higher threat in the near future if threatening processes continue or begin operating throughout its range.

Priority Ecological Communities

Possible threatened ecological communities that do not meet survey criteria or that are not adequately defined are added to the Priority Ecological Community List under priorities 1, 2 and 3. These three categories are ranked in order of priority for survey and/or definition of the community. Ecological communities that are adequately known, and are rare but not threatened or meet criteria for Near Threatened, or that have been recently removed from the threatened list, are placed in Priority 4. These ecological communities require regular monitoring. Conservation Dependent ecological communities are placed in Priority 5.

Priority One: Poorly-known ecological communities

Ecological communities that are known from very few occurrences with a very restricted distribution (generally ≤5 occurrences or a total area of ≤ 100ha).

Occurrences are believed to be under threat either due to limited extent, or being on lands under immediate threat (e.g. within agricultural or pastoral lands, urban areas, active mineral leases) or for which current threats exist. May include communities with occurrences on protected lands. Communities may be included if they are comparatively well-known from one or more localities but do not meet adequacy of survey requirements, and/or are not well defined, and appear to be under immediate threat from known threatening processes across their range.

Priority Two: Poorly-known ecological communities

Communities that are known from few occurrences with a restricted distribution (generally ≤10 occurrences or a total area of ≤200ha). At least some occurrences are not believed to be under immediate threat (within approximately 10 years) of destruction or degradation. Communities may be included if they are comparatively well known from one or more localities but do not meet adequacy of survey requirements, and/or are not well defined, and appear to be under threat from known threatening processes.

Priority Three: Poorly known ecological communities

(i) Communities that are known from several to many occurrences, a significant number or area of which are not under threat of habitat destruction or degradation or:

(ii) communities known from a few widespread occurrences, which are either large or with significant remaining areas of habitat in which other occurrences may occur, much of it not under imminent threat (within approximately 10 years), or;

(iii) munities made up of large, and/or widespread occurrences, that may or may not be represented in the reserve system, but are under threat of modification across much of their range from processes such as grazing by domestic and/or feral stock, inappropriate fire regimes, clearing, hydrological change etc.

Communities may be included if they are comparatively well known from several localities but do not meet adequacy of survey requirements and/or are not well defined, and known threatening processes exist that could affect them.

Priority Four: Ecological communities that are adequately known, rare but not threatened or meet criteria for Near Threatened, or that have been recently removed from the threatened list. These communities require regular monitoring.

(i) Rare. Ecological communities known from few occurrences that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection, but could be if present circumstances change. These communities are usually represented on conservation lands.

(ii) Near Threatened. Ecological communities that are considered to have been adequately surveyed and that do not qualify for Conservation Dependent, but that are close to qualifying for a higher threat category.

(iii) Ecological communities that have been removed from the list of threatened communities during the past five years.

Priority Five: Conservation Dependent ecological communities

Ecological communities that are not threatened but are subject to a specific conservation program, the cessation of which would result in the community becoming threatened within five years.

Commonwealth of Australia Conservation Codes

Threatened Flora and Fauna

Threatened fauna and flora may be listed under Section 178 of the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act) in any one of the following six categories:

Extinct

A native species is eligible to be included in the extinct category at a particular time if, at that time, there is no reasonable doubt that the last member of the species has died.

Extinct in the wild

A native species is eligible to be included in the extinct in the wild category at a particular time if, at that time:

a) it is known only to survive in cultivation, in captivity or as a naturalised population well outside its past range; or
b) it has not been recorded in its known and/or expected habitat, at appropriate seasons, anywhere in its past range, despite exhaustive surveys over a time frame appropriate to its life cycle and form.

Critically endangered

A taxon is Critically Endangered when the best available evidence indicates that it meets any of the five criteria for the category identified in Part 7.01 of the EPBC Regulations, and it is therefore considered to be facing an extremely high risk of extinction in the wild.

Endangered

A taxon is Endangered when the best available evidence indicates that it meets any of the five criteria for the category identified in Part 7.01 of the EPBC Regulations, and it is therefore considered to be facing a very high risk of extinction in the wild.

Vulnerable

A taxon is Vulnerable when the best available evidence indicates that it meets any of the five criteria for the category identified in Part 7.01 of the EPBC Regulations, and it is therefore considered to be facing a high risk of extinction in the wild.

Conservation dependent

A native species is eligible to be included in the conservation dependent category at a particular time if, at that time:

a) the species is the focus of a specific conservation program the cessation of which would result in the species becoming vulnerable, endangered or critically endangered; or
b) the following subparagraphs are satisfied:
    i. the species is a species of fish;

ii. the species is the focus of a plan of management that provides for management actions necessary to stop the decline of, and support the recovery of, the species so that its chances of long term survival in nature are maximised;
iii. the plan of management is in force under a law of the Commonwealth or of a State or Territory;
iv. cessation of the plan of management would adversely affect the conservation status of the species.

The EPBC Act does not provide for listing in a data deficient category. Where sufficient data (evidence) is unavailable to allow assessment by the Threatened Species Scientific Committee against the criteria for listing, the species are found to be ineligible. A recommendation is made to the Minister to not include the species in any category under the EPBC Act. For reasons of transparency and to inform future research, the Threatened Species Scientific Committee publishes the names of those species found to be data deficient. As data deficient is not a listing category under the EPBC Act, this has no statutory implications and the species is not considered to be listed under the EPBC Act.

Threatened Ecological Communities

Threatened Ecological communities under the EPBC Act are listed in three categories.

Critically endangered

If, at that time, an ecological community is facing an extremely high risk of extinction in the wild in the immediate future (indicative timeframe being the next 10 years).

Endangered

If, at that time, an ecological community is not critically endangered but is facing a very high risk of extinction in the wild in the near future (indicative timeframe being the next 20 years).

Vulnerable

If, at that time, an ecological community is not critically endangered or endangered, but is facing a high risk of extinction in the wild in the medium–term future (indicative timeframe being the next 50 years).

Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	12/02/2013	134242	FAUNASURVEY	Certain	Survey	Unknown		4	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	20/11/2012	134243	FAUNASURVEY	Certain	Survey	Secondary sign		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	20/11/2012	134244	FAUNASURVEY	Certain	Survey	Secondary sign		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	20/11/2012	134245	FAUNASURVEY	Certain	Survey	Secondary sign		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	20/11/2012	134246	FAUNASURVEY	Certain	Survey	Secondary sign		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	20/11/2012	134247	FAUNASURVEY	Certain	Survey	Secondary sign		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	20/11/2012	134248	FAUNASURVEY	Certain	Survey	Secondary sign		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	20/11/2012	134249	FAUNASURVEY	Certain	Survey	Secondary sign		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	20/11/2012	134250	FAUNASURVEY	Certain	Survey	Secondary sign		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	20/11/2012	134251	FAUNASURVEY	Certain	Survey	Secondary sign		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	16/11/2013	134260	FAUNASURVEY	Certain	Survey	Unknown		202	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	6/11/2013	134522	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	6/11/2013	134523	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	6/11/2013	134524	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	6/11/2013	134525	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	6/11/2013	134526	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	6/11/2013	134527	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	6/11/2013	134528	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	6/11/2013	134529	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	6/11/2013	134530	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	6/11/2013	134531	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134532	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134533	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134534	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134535	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134536	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134537	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134538	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134539	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134540	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134541	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134542	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134543	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
Natator depressus	flatback turtle	REPTILE	Threatened - Vulnerable	VU	VU & MI	7/11/2013	134544	FAUNASURVEY	Certain	Survey	Unknown		1	Cheloniidae
